LETTER OF TRANSMITTAL.

Hon. Samuel M. Ralston, Governor of Indiana:

SIR—In compliance with the law creating the Indiana Bureau of Statistics, I take pleasure in presenting to you, and through you to the members of the Sixty-ninth General Assembly of Indiana, the Fifteenth Biennial Report of this Bureau.

Included as a part of this volume is a report of the Department of Free Employment, which is under the direction of the Chief of this Bureau.

Very respectfully yours,

THOS. W. BROLLEY,
Chief of Bureau.

GENERAL REMARKS.

The Indiana Bureau of Statistics under the present arrangements serves a dual purpose. In addition to the regular statistical work engaged in, the Bureau now has under its direction five free employment offices and the supervision of the private employment agencies in the State. In carrying out the duties of this office during the past two years we have attempted in a conscientious manner to render the people the service to which they are properly entitled.

The statistical work of the department has been carried on along practically the same lines as were laid down in the preceding report. While some of the tables in that report, naturally, were eliminated, many other tables of valuable and interesting information have been added. Chief among these are tabulations showing the receipts and disbursements of moneys under the Motor Vehicle Registration Law, the congressional enumeration of voters, and information concerning the registrations and elections of 1912 and 1914.

The section of the report devoted to agriculture has been enlarged upon, and this important subject is now receiving more attention than ever before. Not only have new lines of information been added to this subject, but we are also able at this time to present to the people of Indiana a report showing the methods pursued and the work done by the County Agricultural Agents in those counties having an agent during the past year. Through the hearty co-operation of Prof. G. I. Christie, State Leader, and the county agents we are thus enabled, in a way, to assist in the great agricultural extension work now being pushed with such vigor all over the United States. Many students and teachers are already making use of the reports of the Bureau in their study of agriculture, and with this added feature we feel safe in predicting a greatly increased demand for this volume.

As regards the Free Employment Offices I am deeply gratified for the good showing they have made. During the past two years they have been instrumental in securing employment, free of charge, for 30,195 men and women who have applied for work. Many of the positions secured have been permanent and the benefits derived incalculable. May their good work go on.

The problem of unemployment is a serious one and is national in extent. Free employment bureaus are now established in twenty-four States and are doing much toward solving this problem. The American Association of Public Employment Offices has been formed and upon our invitation the Second Annual Convention of the Association was held in the State House September 24-25, 1914. Delegates from twenty-four States of the Union and two Provinces of Canada were present. A special agent of the United States Commission on Industrial Relations also was in attendance and took part in the discussions. Every phase of the subject of employment bureaus was discussed at length, and considerable time was given to the proposed plan for a National System of Labor Exchanges to co-operate with state and local employment agencies and to regulate private agencies. The delegates were heartily in favor of the plan and it was the consensus of opinion that federal control was only a matter of a short time. The superintendents of all the Indiana offices were present and took part in the proceedings.

The Licensed Employment Bureaus are now under much better control and we have not had near as many complaints as during my first term of office. This is due in a great measure to the amendments passed at the last session of the legislature. By one amendment the plan of registration of applicants was changed from a fee of \$2.00 for registration and ten days given to the agent to supply the employment and in case of his failure to do so the applicant could demand 75 per cent. of his fee of \$2.00 to be returned to him. Under that law we found agents taking fees indiscriminately without any assurance of being able to supply the employment and if the applicant was sufficiently persevering he or she had the 75 per cent. of fee returned and we were kept busy settling disputes of that kind. As amended the law provides that the agent have a bona fide order from a reputable employer of labor before he can accept a registration fee and then he is not permitted to charge more than 10 per cent. of the first month's salary. If for any reason, other than his fault, applicant should not work a full month or does not accept the position for which he has paid a fee, then, forthwith on demand, the agency must return all or the unearned portion of the fee paid, as the case may be.

Another amendment to the law which is a good thing is the provision that compels agents to have a bona fide order from a reputable employer of labor in the place where applicant is sent when sending citizens of Indiana out of the State. Of course in

order to prosecute this section of the law it is necessary for those who have been sent out of the State, contrary to law, to return and appear against the agency. In one case it was alleged that an Indianapolis agency violated this section of the law and complaint was made by Hon. O. B. Towne, Manager of the Keokuk Industrial Association, to Mr. Lewis, Secretary of the Indianapolis Chamber of Commerce, who notified this department. We began an investigation at once, and took the matter up with Mr. Towne, who furnished us with the names of the supposed victims, and we made every possible effort to get into communication with them, without success, for we could get no answer to our inquiries. The investigation made, however, seemed to have the desired effect, for it called the attention of the agencies to that part of the law, and no further complaints have been received.

It was necessary in only one case to prosecute a licensed agency, and we secured a conviction in the City Police Court, a fine of \$50 and costs being assessed. We also prosecuted and secured convictions of persons in Indianapolis, Huntington and Gary for operating without a license; in this we were ably assisted by Frank J. Murphy, Superintendent of South Bend, and L. S. C. Schroeder, Superintendent, and Harry Lowry (our late lamented clerk of Fort Wayne), who handled the Huntington and Gary cases. In only one prosecution have we failed to obtain a conviction.

On the whole I feel deeply gratified on the conduct of the entire department during this term of office, and I take this opportunity to express my kindest appreciation to my assistants for their efficiency and devotion for the work. Especially do I extend my sincerest thanks to Prof. G. I. Christie and Mr. T. A. Coleman, of Purdue University, who so heartily co-operated in the section of this report relating to the county agents.

Yours very truly,

THOMAS W. BROLLEY, Chief.

INDIANAPOLIS FREE EMPLOYMENT BUREAU.

Hon. Thomas W. Brolley, Chief Indiana Bureau of Statistics:

DEAR SIR—I respectfully submit, herewith, a report of the business done by this, the Indianapolis branch of the Indiana Free Employment Offices for the two years beginning October 1, 1912, and ending September 30, 1914, completing the fifth year of its existence. The following tables show, in detail, results accomplished by the office in bringing employer and employe together. While the figures tabulated do not show any increase during the last year over previous years, owing to the general depression in many lines of trade, especially the manufacturing industries in this city as well as all over the State, we, nevertheless, have been instrumental in securing a large number of permanent positions for men and women. We have been very successful in sending men to the rural districts where they found by working on farms, they could, even at a lower wage than paid in the cities, save more of their earnings and provide a more comfortable living for themselves and their families. During the past two years 8,754 persons applied for positions at this office and out of that number 6,923 were placed.

We are experiencing the same difficulty now that we have always had since the office was removed to the basement in handling female help. On account of the large number of men who frequent the office our present quarters are not inviting to female applicants and we are unable to fill the demand for such help. We receive calls daily from the best homes in the city and country asking for good domestic help, and while we have supplied a large number, yet our efficiency would be increased to a large extent if we could arrange for separate quarters for ladies. I would recommend that you petition for the room adjoining our present quarters and which could be arranged at little cost for this purpose.

Respectfully yours,

OSWALD STAHN, Superintendent.
ALBERT M. AGAN, Clerk.

EVANSVILLE FREE EMPLOYMENT OFFICE.

Hon. Thomas W. Brolley, Chief Bureau of Statistics:

Dear Sir—I respectfully submit herewith a detailed report of work of the Evansville Branch of the Free Employment Offices covering the two years.

The Evansville Branch of the Indiana Free Employment Offices was opened for business in the basement of the Vanderburg County Court House, June 1, 1911. The first effort to bring the office before the public was made through the local newspapers and a circular letter addressed to practically every business house in the city. The returns from this effort were very satisfactory; we received replies from almost every firm of importance in the city. In every instance the reply was encouraging, and by comparing these letters carefully we were able to learn the various difficulties experienced by local concerns in securing their help. This helped us a great deal, as it enabled us to avoid the same vexing difficulties they had experienced in securing help.

The next proposition for this office to overcome was to secure the confidence of the people. Evansville people have been imposed upon by employment bureaus that charged a registration fee and gave nothing in return. This circumstance caused the people of this district to look with some doubt upon an employment bureau. However, after it became known definitely that there were no charges and that an effort would be made to secure them a position we began to receive applications from all classes of labor and from skilled mechanics. As these applications increased, we were able to fill practically all of the demands for help except common labor. Owing to the great amount of construction work during the latter part of 1911 and the year 1912, we were not able to supply the demand for labor.

Securing domestic help has also been difficult. Not many women apply for that class of work. This is due to the fact that cigar manufacturing companies and large department stores usually offer enough employment for the girls and women of this district. We have at no time been able to fill the demands for domestic help.

In the early part of 1913 we sent out more circular letters to the business men and later followed them up by a personal interview. By this means we were able to explain more fully the intention of this Bureau and to reach a still better understanding with local employers. It also resulted in the abandonment of the Manufacturer's Employment Bureau, an institution that had been operating in Evansville for some time, maintained by subscriptions of various manufacturing concerns.

This office enjoyed considerable success until the winter of 1913, at which time there was no construction work or demand for labor, and also a slight relapse in business of all kinds became noticeable. This caused a reduction of all working forces, the first time in the history of this office that the demand for work was greater than the demand for help. During the spring and summer of 1914 and to date, the business of this office has fallen off about 20 per cent below the year of 1913. This is due, directly, to the war in Mexico. Evansville's flour mills, furniture factories, stove works, and wagon works, have for the past ten years been marketing the bulk of their products in Mexico and Central America. The trouble in Mexico closed the market for these firms and their efforts to secure new business have not been successful enough to allow them to maintain a full working force.

This condition, however, is only temporary, and the prospects for the year of 1915 are better than ever. A Coliseum, three large office buildings and a hotel will be built in addition to the regular annual building. Several street car lines will be extended and streets improved. This will employ all of our labor, and with this class of people at work, stores will do steady business and conditions in general will be far better than at present. To all indications the year of 1915 will be the banner year in this Branch of The Indiana Free Employment Offices.

RICHARD WITTY, Superintendent.
ELMER POGUE, Clerk.

FORT WAYNE FREE EMPLOYMENT OFFICE.

To Thomas W. Brolley, Chief Bureau of Statistics:

Dear Sir—The Fort Wayne Branch of the Indiana State Free Employment Office has been in operation for a little over three years and in that time has accomplished a great deal of good, benefiting the employers of the city who needed help and the unemployed looking for jobs. Nearly every factory in the city has at some time made use of the office and in no case have we been obliged to turn down the request for help because of a shortage of men.

The calls for help have not been as frequent as we have desired, but this is because nearly every large manufacturer maintains his own employment department in the factory and does not depend on outside assistance to get his help. These men only come to us for help when they need men and have no applications at their own employment department. Considering existing conditions, therefore, the record for the local office during the past two years has been good.

It will be seen from our report that the demand for skilled labor has increased during the past two years and that we have been able to send more men to fill these positions. The farmers, too, are beginning to realize that this office is the place where farm hands can be secured. We are receiving calls from farmers throughout this section of the State every day and have not been obliged to turn down one request.

Our greatest difficulty has been in supplying girls for general house-work. We are rapidly overcoming this, however, and now we have on our list a number of good girls for such positions. Girls for factory work are more easily secured and we experience little difficulty in getting any number wanted.

Altogether our business for the past two years has been most satisfactory. We have received a number of complimentary letters from manufacturers and others who have secured help from our office, and as the public becomes better acquainted with the scope of the work done here we expect a steady increase in the volume of business for our office.

Yours very truly,

LOUIS S. C. SCHROEDER, Superintendent.
JOHN J. BAUER, Clerk.

SOUTH BEND FREE EMPLOYMENT OFFICE.

To Hon. Thomas W. Brolley, Chief Bureau of Statistics:

Dear Sir—I respectfully submit herewith a detailed report of the accomplishments of the South Bend Branch of the Free Employment Bureau for a period covering the last two years. That portion of the report, up to January 15, 1914, represents the efforts of my predecessor, Mr. Peter J. Kruyer, the remaining portion of the report giving a detailed retrospection of what I have been able to do since assuming charge of the office.

In this connection I beg leave to suggest that the results accomplished during the past two years, are not commensurate to the effort which has been expended, by reason of the fact that since the year 1907, the various manufacturing plants in our immediate field have been operating with a more or less reduced force. This condition has been accentuated by reason of the European conflict, which has had disastrous effect upon certain of our more important factories which engaged largely in export operations. While this office has been unable to show the volume of work that might be expected, the work actually done has been of more importance, and has relieved more serious conditions among the unemployed, than would have been true had there been ready employment for all laborers in this vicinity.

Recognizing that the factories were unable to care for the unemployed, I devoted my efforts in placing men in other lines, particularly household and agricultural pursuits. In this work I feel that this branch of your Bureau has been very successful and the efforts put forth have been frequently commended by satisfied employers, as well as by grateful recipients of suitable and satisfactory positions.

Since assuming charge of the office I have been able, largely through the assistance of our worthy Chief, in procuring from the commissioners of St. Joseph County, a convenient, centrally located and spacious headquarters, free of charge, in lieu of the very unsatisfactory location for which we were required to pay a rental, heretofore. In addition to the work of placing employes, I have, at your suggestion, been able to conduct several prosecu-

tions and assisted in the conviction of a number of men illegally engaged in selling positions in some of the larger institutions of Northern Indiana. I firmly believe that a wholesome effect of these prosecutions and convictions has been instrumental in breaking down the custom of shop foremen charging a fee for placing men in their departments.

At this time I wish to extend my sincere and heartfelt thanks to you for your hearty support and co-operation, which has enabled me to make the very creditable showing evidenced by the attached report, with the assurance of the desire and determination to make this office as useful in every way, as the Legislature of Indiana intended, in establishing this beneficial and important department of governmental work.

FRANK J. MURPHY, Superintendent.

GEORGE H. HESS, Clerk.

TERRE HAUTE FREE EMPLOYMENT OFFICE.

To Hon. Thomas W. Brolley, Chief Bureau of Statistics:

Dear Sir—I hand you herewith the biennial report of the Terre Haute Branch of the Indiana Free Employment Offices, showing the number of applications filed by, as well as the number filled with, those seeking employment; also the number of applications filed by employers desiring help and the number of these which were filled by parties sent out from this office.

In submitting this report, it is with a measure of satisfaction, mingled with a pardonable pride, born of a consciousness of having been one of the factors who under and by your direction have carried into effect the intents and purposes of the law-making body by which the State Free Employment Offices were created. I am of the opinion that those who were instrumental in the framing and passage of the law by which these offices were established, “built better than he knew,” and I am impelled to this opinion by the knowledge of the great benefits that have accrued to both the employer and employe, by time and money saved as well as the help extended to those who only asked an opportunity to labor that they might live and maintain their families, in a semblance at least, of comfort and decency; and of the many men and women who have been assisted in obtaining employment through this office, who were, on account of their financial condition and the futility of their own efforts to find work, driven almost to the verge of desperation. I am constrained to believe in many of these cases the assistance afforded by the Free Employment Offices prevented many from becoming charges upon the public either as wards in charitable, or inmates of penal institutions.

These are some of the numerous benefits that emanate from these offices established by the State for the convenience and assistance of her citizens, and are not apparent to the casual reader of the printed reports which only show in figures the number of applications filed and filled, the reading of which gives but a superficial knowledge of the real good accomplished and for which it would take volumes to enumerate.

In this great commonwealth there are thousands of citizens who have cause to and do praise the law and its makers for the convenience provided by which they were enabled to find employment when it was sorely needed. And the offices not only deserve, but have the confidence and hearty co-operation of all employers of labor in the community in which they have been established.

Respectfully yours,

CHARLES R. DUFFIN, Superintendent.

WILLIAM HEPPNER, Clerk.

AN ACT CONCERNING EMPLOYMENT AGENCIES.

Chapter 94, Acts of 1909.

(Approved and in Force March 5, 1909, and Amended March 6, 1911.)

Chapter 273, Acts of 1911.

(Amended March 15, 1913, Chapters 321 and 353, Acts of 1913.)

Bureau of Statistics—Employment Agencies—License.

Section 1. Be it enacted by the general assembly of the State of Indiana, That no person, firm, or corporation shall in this state open, operate or maintain an employment agency without first obtaining a license for the same from the chief of the bureau of statistics. Every license shall contain a designation of the city or town, street, and number of the building where the licensed person, firm or corporation conducts said employment agency. The license, together with a copy of this law, shall be posted in a conspicuous place in each and every place or office where said agency does business. No agency shall print, publish, or paint, in any way, any sign, card, or advertisement in any way similar to the name, "Indiana Free Public Employment Bureau." All advertisements and statements, window signs, door signs, and all literature of private employment agencies shall contain the words "Licensed Employment Agency," together with the regularly licensed name of the agency. The said chief of the bureau of statistics shall require each and every applicant for a license to execute to the State of Indiana a bond in the penal sum of one thousand (\$1,000) dollars with a surety company, or with two solvent resident freeholders, conditioned that the obligor will not violate any of the duties, terms, conditions, or provisions of this act, which said bond shall be approved by the said chief of the bureau of statistics. The said chief is authorized to cause an action to be brought on said bond, in the name of the State of Indiana, for any violation of any of the conditions of said bond, and may, upon a full hearing revoke such license whenever, in his judgment, the party licensed has violated any of the provisions of this act or has been convicted of the violation of any criminal law of this or other states, subject to an appeal by the person, firm or corporation whose license is so revoked within ten days from the date of such revocation to the circuit or superior court of the county in which the business of said person, firm or corporation is located. It is hereby made the duty of the attorney general to prosecute any action brought by the chief in such cases.

License Fee.

Sec. 2. A fee of twenty-five (\$25.00) dollars shall be paid annually for each license granted under the provisions of this act.

Agency Register.

Sec. 3. It shall be the duty of every licensed agency to keep a register of all persons applying for employment, together with their names, address, age, nativity, sex, color, trade, occupation or profession; also the names and addresses of persons, firms, and corporations to whom such applicant has been referred, and the positions which have been secured for such applicants. Such agency shall also keep a register of every person, firm or corporation applying for help or servants, the names of all persons referred to them, and the results. All of this information shall be reported on the first day of each month to the chief of the bureau of statistics, under oath of the person or firm conducting such agency; or, if a corporation, it shall be subscribed under oath by two officers thereof. Said register shall, at all times, be open for inspection by the chief of the bureau of statistics, the sheriff of any county or the chief of police of any city in which the said employment agency is located or any person delegated by either of said officers to inspect the same.

Registration Fee of Agencies.

Sec. 4. Where a registration fee is charged for filing or receiving applications for employment, said fee shall in no case exceed ten per cent. (10%) of the first month's wages or portion thereof, and upon payment of said fee a receipt shall be given containing the name of the applicant, the amount of the fee, the date and the name and the character of the work or situation to be procured. And there shall be printed on the back of said receipt in readable form in the English language this section of this act and on the front of the receipt the words "Read the law on the back of this receipt." In case the said applicant shall not obtain a situation or employment through said licensed agency, the said licensed agency shall forthwith on demand repay and return to said applicant all of the fee paid by said applicant to said agency; if such applicant shall have obtained a situation or employment through such licensed agency and shall voluntarily leave or abandon such situation or employment and without cause, he shall not be entitled to receive the fee or any part thereof paid by the applicant to the

agency; and no agency or person shall accept any fee from an applicant without having a bona fide order for employment or work: Provided, however, That this section shall not apply to agencies, bureaus, or associations duly organized under the laws of the State of Indiana, for the purpose of obtaining employment for their members of an educational or professional character.

Penalty.

Sec. 5. Any person, firm, or corporation guilty of violating any of the provisions of this act shall, upon conviction, be fined in any sum not less than fifty (\$50) dollars, nor more than one hundred (\$100) dollars, to which may be added imprisonment in the county jail for a term not exceeding six months. It shall be the duty of the chief of the bureau of statistics to enforce this act and institute criminal or civil proceedings whenever informed of any violation of its provisions. Upon instituting any such proceedings, the name of said chief shall be entered upon the docket, and upon conviction a fee of ten (\$10) dollars shall be allowed in favor of said chief, which fee, when collected, shall be accounted for as other money received by said chief under this act.

Accounting for Fees.

Sec. 6. All fees received by said chief of the bureau of statistics under this act, shall be held by said chief and shall constitute a fund for the carrying out of the provisions of this act, and to maintain a free public employment bureau in the office of the said chief of the bureau of statistics. The said chief shall, at the end of his term, make an account of said fund, and shall pay into the state treasury whatever remains after paying the necessary expenses as aforesaid.

Definitions.

Sec. 7. "Private employment agency" is defined and interpreted to mean any person, firm or corporation who shall furnish employment or help, or who shall display any employment card, sign, bulletin, or other advertisement, or who, through any card, sign, circular, pamphlet, or other medium or advertisement, shall offer employment or help: Provided, That regularly established educational institutions, religious, labor, charitable and benevolent organizations, and departments or bureaus maintained by persons, firms or corporations or associations, for the purpose of obtaining

help for themselves or employment for their members, for which no fee or compensation is charged or received, directly or indirectly, shall be exempt from the payment of a license fee, but all such persons, firms or corporations, departments and associations shall, before being authorized to conduct such employment agency or department, secure a permit from the chief of the bureau of statistics by filing with him an application giving such information as he may require. No charge shall be made for the issuance of such permit, which may be revoked on the same terms as a license is revocable. This act shall not apply to any one who secures employment for his friends, fellow craftsmen, or members of his family without charge.

Further Definitions.

Sec. 8. The term, "applicant for employment," as used in this act, shall be construed to mean any person seeking work of any lawful character; and "applicant for help" shall mean any person, firm or corporation, seeking help or offering to employ labor in any legitimate enterprise. Nothing in this act shall be construed as limiting the term, "work," to manual labor, but it shall include professional and all legitimate service: Provided, That nothing in this act shall be construed to apply to agencies, bureaus or associations duly organized under the laws of the State of Indiana for the purpose of obtaining employment for their members of an educational or professional character.

Cause for Forfeiture of Rights.

Sec. 9. No agency, or person, whether licensed or unlicensed, shall send or cause to be sent any help or person to any place of bad repute, house of ill fame or assignation or place of amusement kept for immoral purpose, or for the purpose of securing a position for any applicant, or otherwise circulate, publish, record or issue any report or information to cause the discharge of any person employed in any legitimate service. It shall be unlawful for any person, firm or corporation to send, or cause to be sent from the State of Indiana, for the purpose of obtaining employment, any person resident of said State of Indiana, without first having secured bona fide, an order for, or guarantee of employment for such person from a reputable and responsible employer of labor at the place where such person seeking employment may be sent. No agency shall publish, or cause to be published, or circulate any false or fraudulent notice, advertisement, or statement, or give any

false information, or make any false representation or promise concerning work or employment, or help, to any one who shall register for help or employment, and no such agency shall make any false entry in any book, record, or register kept by it in connection with its business. No such agency shall conduct its business in a building where intoxicating liquors are sold. Any agency, whether licensed or unlicensed, violating any of the provisions of this act, or of any law in force in this State, shall forfeit all rights to continue in business.

Repeal.

Sec. 10. All laws and parts of laws in conflict herewith are repealed.

Emergency.

Sec. 11. Whereas an emergency exists for the immediate taking effect of this act, it shall be in full force and effect on and after its passage.

MOTOR VEHICLE REGISTRATION

Fees Charged.

Section 6. The following fees shall be paid to the Secretary of State upon the registration or re-registration for each calendar year for each motor bicycle so registered, the sum of two dollars (\$2.00); for each motor vehicle of twenty-five horsepower or less the sum of five dollars (\$5.00); for each motor vehicle of forty horsepower or less and more than twenty-five horsepower, the sum of eight dollars (\$8.00); for each motor vehicle of fifty horsepower or less and more than forty horsepower the sum of fifteen dollars (\$15.00), and for each motor vehicle of more than fifty horsepower, the sum of twenty dollars (\$20.00), and for each and every electric propelled motor vehicle so registered the sum of three dollars (\$3.00: *Provided*, That for motor vehicles which are used or to be used solely for commercial purposes, the fee for such registration shall be five dollars (\$5.00) annually.

Disposition of Registration Fees.

Part of section 20 provides that all moneys derived under the provisions of this act shall be set apart in the state treasury as a road fund, which fund, less the cost of procuring and delivering registration certificates, number plates, and other expenses, including an amount sufficient to pay the cost of necessary assistants in the office of the Secretary of State, to be determined by the Secretary of State, with the approval of the Governor, shall be paid semi-annually on January 1st and July 1st on warrants of the Auditor of State to the counties of the State as herein provided.

The fund shall be distributed as follows:

One-third shall be divided equally among the counties of the State. One-third shall be divided among the counties in the proportion which the number of miles of free gravel or macadam roads in the county bears to the whole number of such roads in the State. One-third shall be divided among the counties on the basis of the amount received from the counties from such registration tax.

In case the amount received by any county shall exceed one hundred dollars (\$100.00) per mile for each mile of free gravel or macadam roads the excess shall be paid into the road fund of the various townships in proportion to the number of miles of township roads, which shall be expended in the maintenance of township roads.

MOTOR VEHICLE REGISTRATION

(By the Secretary of State.)

FIRST SEMI-ANNUAL REPORT.

Receipts and disbursements of moneys received from the registration of motor vehicles from July 1, 1913, to January 1, 1914:

Total amount received.....	\$150,235 30
Expense	31,989 72
Net amount distributed.....	118,245 58

SECOND SEMI-ANNUAL REPORT.

Receipts and disbursements of moneys received from the registration of motor vehicles from January 1, 1914, to July 1, 1914:

Receipts—

Automobile registrations	\$342,541 00	
Dealer's license	12,025 00	
Chauffeur's license	4,616 00	
Motorcycle license	17,762 00	
Duplicates	1,899 00	
Transfers	881 00	
Interest	2,151 10	
		<hr/>
		\$381,875 10
Total receipts		<hr/>
		\$381,875 10

Disbursements—

Automobile and motorcycle plates.....	\$20,006 41	
Chauffeur badges	660 00	
Parcel post and postage.....	5,580 00	
Printing and office supplies.....	2,510 00	
Salaries	7,920 10	
Rebates	834 89	
		<hr/>
Total disbursements		\$37,511 40
		<hr/>
Net amount distributed.....		\$344,363 70

Agricultural Statistics.

STATE TOTALS, 1912.

STATISTICAL REPORT OF TOWNSHIP ASSESSORS FOR YEAR 1912, MADE IN 1913.

Total number farms (5 acres or over) in Indiana, reporting	217,012
Total acres in farms included in this report	20,348,189
Number acres land leased or rented	4,249,724
Number acres waste land	691,078
Number acres in pasture land	5,179,552
Number acres of timber land	2,348,526
Number acres in orchard	288,432
Number silos in Indiana	9,978
Number windmills in Indiana	43,808

QUESTIONS FOR 1913.

	Acres.	Bushels.
Report entire crop wheat produced in 1912	1,477,453	14,144,445
Report entire crop corn produced in 1912	4,452,369	172,290,495
Report entire crop oats produced in 1912	1,955,272	77,085,136
Report entire crop rye produced in 1912	104,025	1,597,515
Report entire crop barley produced in 1912	8,738	219,904
Report entire crop buckwheat produced in 1912	7,054	111,649
Report entire crop potatoes, Irish and sweet, produced for market in 1912	43,790	3,847,984
Report entire crop onions produced for market in 1912	6,363	2,156,893
Report all fruit (apples, peaches, etc.) produced for market in 1912	25,739	859,467
Report entire crop berries produced for market in 1912	4,505	247,222
		Value.
Report entire crop watermelons and canteloupes produced in 1912	8,454	\$344,783
		Pounds.
Report entire crop tobacco produced for market in 1912	12,952	11,265,868
		Tons.
Report entire crop tomatoes produced for market in 1912	27,068	97,333
Report entire crop timothy hay produced in 1912	1,365,387	1,481,979
Report entire crop alfalfa hay produced in 1912	27,601	53,406
Report entire crop prairie, wild, millet or marsh hay produced in 1912	86,138	88,242
Report entire crop clover hay produced in 1912	609,254	688,948
		Bushels.
Report entire crop clover seed produced in 1912	282,676	349,317
		Tons.
Report entire crop cowpeas and soybeans produced in 1912	70,740	84,147
	Number.	Selling value.
Horses and colts sold in 1912	97,062	\$11,779,860
Horses and colts on hand January 1, 1913	633,039	64,038,385
Mules sold in 1912	24,760	3,063,440
Mules on hand January 1, 1913	75,060	8,411,023
Average number cows milked in 1912	454,124	18,380,951
	Gallons.	
Report entire amount milk produced in 1912	211,985,747	24,764,577
Report entire amount cream sold in 1912	5,249,747	2,733,989
	Pounds.	
Report entire amount butter produced in 1912	40,101,978	8,905,206
	Number.	
Cattle on hand January 1, 1913 (all kinds and ages included)	938,481	31,074,808
Cattle sold in 1912 (all kinds and ages included)	451,537	18,213,645
Cattle died of disease in 1912 (all kinds and ages included)	19,570	443,513
Hogs on hand January 1, 1913	1,793,849	15,054,566
Hogs sold in 1912	2,607,256	33,354,896
Hogs died of disease in 1912	562,542	3,685,303
Sheep on hand January 1, 1913	548,199	2,481,689
Sheep sold in 1912	513,443	2,356,939
Sheep died of disease in 1912	39,322	160,634
	Pounds.	
Wool clip in 1912	3,516,054	742,087
	No. Dozen.	
Total number dozen of all kinds of poultry sold in 1912	615,155	3,305,881
Average number dozen all kinds of laying hens in 1912	802,981	4,357,694
Total number dozen hens' eggs produced in 1912	72,991,078	13,897,373

STATE TOTALS, 1913.

STATISTICAL REPORT OF TOWNSHIP ASSESSORS FOR YEAR 1913, MADE IN 1914.

Total number farms (5 acres or over) in Indiana, reporting.....	218,314
Total acres in farms included in this report.....	20,522,793
Number acres land leased or rented.....	4,410,880
Number acres of waste land.....	720,802
Number acres in pasture land.....	4,372,777
Number acres of timber land.....	2,369,712
Number acres in orchard.....	291,247
Number silos in Indiana.....	14,441
Number windmills in Indiana.....	47,774

QUESTIONS FOR 1914.

G. I. CHRISTIE, *State Leader.*

T. A. COLEMAN, *Asst. State Leader.*

The county agent is an outgrowth of a demand on the part of the farmer to be in constant touch with the latest and best agricultural thought. The farmers' institute was the prime mover in this awakening. The industrial trains and the short courses were able aids. The value of the work being apparent, the demand soon came for a man thoroughly trained in the agricultural sciences to spend all of his time among the farmers, advising as to better methods and in every way possible strengthening the practices of the farm.

Prior to July 1, 1913, four counties, Laporte, Montgomery, Parke and St. Joseph, by means of co-operation with the U. S. Department of Agriculture and Purdue University, had secured county agents. On this date, the Vocational Education Law becoming effective, six additional counties, Benton, Jasper, Grant, Wayne, Boone and Starke availed themselves of the privileges of Section 12 of the law and secured county agents. At the same time St. Joseph and Parke counties elected to change from the co-operative plan to that of the state law. On August 1st, four additional counties, Porter, Elkhart, Decatur and Lawrence, secured the appointment of county agents, and Laporte changed from the co-operative plan to that of state.

Additions to the list under the provisions of the Vocational Law were as follows:

On September 1, 5 counties; Henry, Gibson, Clark, Clinton, and Sullivan; on October 1, Madison; on November 1, Pulaski and Marion; on December 15, Randolph; on January 1, 1914, Hendricks; on February 1, Bartholomew and Lake, and on June 1, Delaware County.

Applications are pending awaiting immediate action from Posey, Allen and Wells counties.

Through a co-operative plan between the U. S. Department of Agriculture, Purdue University, the school trustees of Washington Township, Hamilton County, and the "Better Farming Association" of that township, a township agent was appointed who devotes eight months to teaching agriculture in the seventh and eighth grades and high school and the remaining four months to

doing advisory work among the farmers and boys and girls agricultural clubs.

The complete list of field men is as follows:

Prof. G. I. Christie, State Leader, Lafayette.

T. A. Coleman, Assistant State Leader, Lafayette.

From the work of arranging for the appointment of these men with the various boards of education, consulting with the county agent in his office and addressing groups of farmers on work relating to the county agents, the following summary is shown:

Meetings with Boards of Education.....	44
Visits to County Agents.....	131
Farmers meetings addressed.....	70

The first annual conference of county agents was held in Agricultural Hall, Purdue University, on October 13-14, 1913. The following program was given:

CONFERENCE
of
COUNTY AGENTS.
Monday and Tuesday, October 13th-14th
at
PURDUE UNIVERSITY
Lafayette Indiana.

MONDAY, OCTOBER 13, 1913.

1:30 p. m.	Prof. G. I. Christie.
2:00 p. m.	Dr. C. B. Smith, U. S. Dept. of Agriculture.
2:30 p. m.	Problems of County Agents. Soils and Crops. Animal Husbandry. Weed Control.
6:00 p. m.	Dinner at Lahr House.
Speakers: President W. E. Stone, Mr. O. H. Benson and others.	

TUESDAY, OCTOBER 14, 1913.

8:00 a. m.	Problems of County Agents. Dairying and Horticulture. Veterinary Insect Control.
10:00 a. m.	W. J. Jones, Jr., State Chemist. Z. M. Smith.
Miscellaneous Business.	

The work of the county agent naturally divides itself into two main divisions, namely, with the young people and with adults.

The county agents have rendered valuable service to county superintendents and teachers by assisting with the school and club work. The agents have prepared special outlines for work in agriculture and have issued bulletins on helps for teachers. As many as nineteen bulletins on school agriculture and club work were issued by county agents prior to June 30, 1914. During the year the county agents visited 935 schools and gave instruction to the teachers relative to the work in agriculture. In some cases they directed the field and laboratory exercises and during the summer supervised the club projects. One hundred thirty-four township and county institutes were attended by county agents and instruction in agricultural work was given. Twenty-five thousand boys and girls enrolled for club work during the summer of 1914. This large enrollment was made possible by the well directed efforts of the county agents during the spring and early summer.

The county agents were instrumental in securing, for fifty-seven school community meetings, speakers who were specialists

in the phase of agricultural work which they discussed. The value of these meetings in respect to creating public opinion favorable to the school work in agriculture is beyond calculation.

The outlook for assistance from the county agents in the agricultural and club work for the year 1914-15 is exceedingly bright.

Of the work with the farmer, that which presents itself first is the consideration of a single question of the individual. This line of work is to be encouraged, as it enables the new county agent to extend his acquaintance and to come in closer contact with the people than would otherwise be possible. However, owing to the possibility of reaching so many more people, the township or community-center club is an agency whose value can not be overlooked. The well planned farmers' club soon becomes a self-supporting organization. Every community has men or women who are doing some part of the farm or home work in a better way than the average man or woman. Through the stimulus of the club discussions, these better methods are brought to the attention of the membership and thus become a part of the common knowledge and practice of the neighborhood. Through such a club the efficiency of the county agent is increased many fold. The work of organization incident to a meeting or series of meetings is reduced to a minimum. More people are actively engaged and are therefore interested in the success of the project. In almost every township in the counties having county agents, there is now some form of farmers' club. In many instances it is the regular Farmers' Institute Association, in others the Grange, the Gleaners, or a division of a County Better Farming Association. Through the less busy seasons, regular monthly or semi-monthly meetings are held at which seasonal topics of general interest are discussed.

The experiment of using these clubs and sending a man to assist the county agent in a series of eight or ten meetings in a special seasonal campaign was tried out in Laporte and Wayne counties on "Wheat Production."

SUMMARY OF WHEAT CAMPAIGN.

<i>County.</i>	<i>No. Meetings.</i>	<i>Attendance.</i>
Laporte	9	837
Wayne	8	190
	—	—
Total	17	1,027
Average per meeting, 60.		

These meetings were so well attended and, in the language of one of the reports, "reached the people who will get the most good out of it" that it was decided to enlarge this type of work.

During the last week of September and the first week of October fifteen county agents arranged a series of eight to twelve "Seed Corn Selection" meetings. The Agricultural Extension Department co-operated by sending an assistant with all expenses paid to aid in the discussions.

SUMMARY OF THE SEED CORN CAMPAIGN.

<i>County.</i>	<i>No. Meetings.</i>	<i>Attendance.</i>
Benton	12	732
Boone	8	200
Clark	8	504
Decatur	14	208
Elkhart	7	172
Gibson	10	428
Henry	12	1,050
Jasper	7	198
Laporte	8	344
Lawrence	8	294
Parke	10	314

In all 138 meetings were held at which the total attendance was 5,829, or an average per meeting of 42.23. In each case the county agent arranged the meetings on the farms of successful corn growers. The meetings were held in the cornfield, where type of ear, stalk from which it came, time and methods of selecting and storing were thoroughly discussed.

During the winter the Animal Husbandry Division held a series of meetings in Parke and Laporte counties in which the value of the draft horse was discussed. Fourteen meetings were held with a total attendance of 1,169, an average of 83.

During February and the first half of March the Botanical Division assisted the county agents in the "oats producing" counties with a series of meetings at which the "Prevention of Oat Smut and Potato Scab" was discussed.

SUMMARY OF OAT SMUT AND POTATO SCAB CAMPAIGN.

Madison	5	187
Montgomery	4	276
Porter	5	189
Pulaski	5	205
Randolph	4	418

Twelve counties were reached with a total of fifty meetings at which the attendance was 3,168. In these meetings, the oat smut and potato scab were thoroughly discussed and demonstrations of the formalin treatment as a preventative were given.

Beginning March 9th and continuing until May 26th, the Horticultural Division assisted the county agents in twenty-seven counties in a study of horticultural conditions and a demonstration of best methods of orchard management, including a pruning and spraying demonstration.

St. Joseph	2	153
Sullivan	3	290
Washington Township ...	1	50

Forty-eight meetings were held in the orchards with a total attendance of 2,489, an average of 52 per meeting. During this trip 157 farms were visited and 1,469 miles were traveled by automobile within the counties.

Beginning March 17th and continuing till May 9th, the Veterinary Division joined the Animal Husbandry Division in assisting the county agents in seventeen of the hog producing counties with a campaign on pork production. The meetings were held on hog breeders' farms.

The principal topic discussed were the "Feeding and Sanitary Management of the Brood Sow and Her Litter," and the "Serum Treatment for Cholera."

SUMMARY OF PORK PRODUCTION CAMPAIGN.

Starke	3	80
St. Joseph	2	84
Sullivan	3	133
Wayne	1	11

Thirty-eight meetings were held at which the attendance was 1,568, an average of 41.

During the early spring the Botanical Division held a few meetings in the southern part of the State in which the eradication of wild onion and garlic by means of spraying the plants with orchard heating oil was explained.

Meetings were held as follows:

<i>County.</i>	<i>No. Meetings.</i>	<i>Attendance.</i>
Clark	2	40
Gibson	1	102
Sullivan	1	9
<hr/>		<hr/>
Total	4	151

Several demonstrations on areas ranging from a small plot to several acres were treated according to directions, and while no detailed report has been made at this time, those in charge feel the work was most effective.

The discovery of this remedy and a demonstration of its effectiveness will be worth much to the farmers of the sections infested by these troublesome pests.

In the latter part of May, 1913, Montgomery and St. Joseph counties each conducted a two days' alfalfa campaign, which resulted in such great interest being awakened to the value of this crop and methods to be pursued in securing a stand that it was decided to conduct similar tours this year.

Arrangements were made with twenty county agents to assist them in the work. A man from the Crops and Soils Division and one from the Animal Husbandry Division was detailed to help in the work, one to talk on "Growing Alfalfa" and the other on the "Utilization of the Crop."

The plan was to arrange an automobile tour to visit six or eight fields each day to study the conditions under which each farmer was growing alfalfa. A general discussion of the fields visited was had at the noon hour. Usually an evening meeting was held in the county seat.

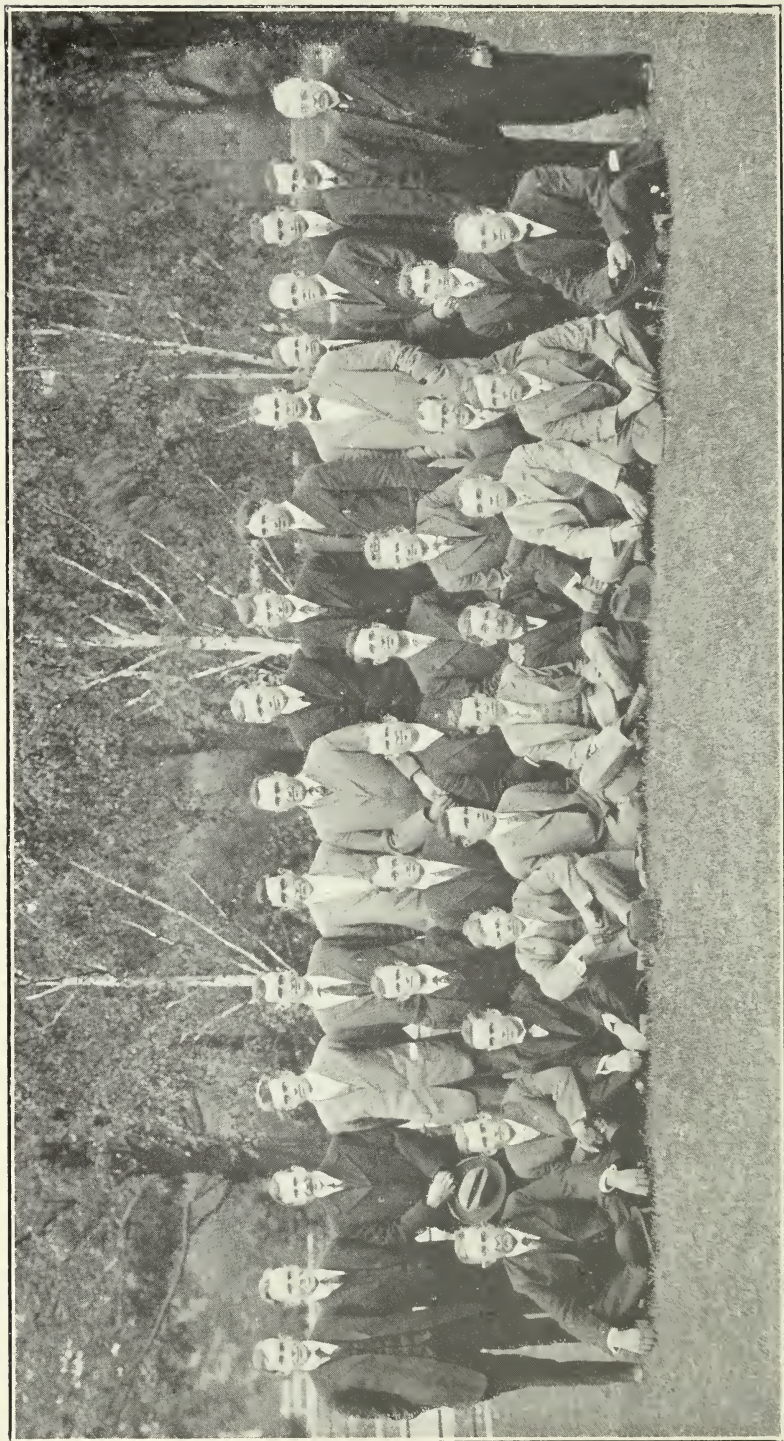

SUMMARY OF ALFALFA CAMPAIGN.

THE COUNTY AGENTS OF INDIANA, AND THE STATE AND FEDERAL LEADERS.

Dr. A. C. True and Dr. C. B. Smith, U. S. Dept. of Agriculture. Prof. G. I. Christie, State Leader. T. A. Coleman, W. L. Elser and T. W. Harvey, Assistants.

In addition to the above special projects, the county agents through the medium of township or community farmers' clubs and schools held 3,336 meetings, with a total attendance of 305,022, at which seasonal topics were discussed. Probably more time was devoted to the soil and the problems relating to the maintenance of its fertility than all others combined. Keen interest was manifested in this subject, particularly the relation of lime and legumes, as clover, soybeans, cowpeas, etc.

A summary of the year's activities shows a total of 3,778 meetings at which the attendance was 333,651. Eighteen thousand, nine hundred and eighty-five people called at the county agents' offices with a special problem, and 8,662 farms were visited upon the invitation of the owner or tenant. All of this work necessitated the traveling of 122,290 miles within the various counties.

The above represents 259 months of service as the force of ten men on duty July 1, 1913, was increased month by month through the year until at the close twenty-seven county agents and one township agent were at work.

While we feel that much constructive work has been done during the past twelve months, we have greater hopes for the coming year. The recent decision of the Supreme Court in relation to the law on which our work is based, gives it a permanency not heretofore enjoyed, and the year's experiences will enable the men to avoid many pitfalls and proceed with more assurance. The share of the Smith-Lever funds due Indiana will make possible a great deal of assistance to the county agents in the form of special assistance to cope with particular problems.

REPORT OF BARTHOLOMEW COUNTY

From February 11 to June 30, 1914.

Since the county work began in Bartholomew County on February 11, 1914, until the close of the fiscal year on June 30, 1914, there have been 234 office calls, 164 farms visited, and 95 meetings held, with a total attendance of 4,723, necessitating the traveling of 2,153 miles.

ORGANIZATION OF WORK.

The first meetings held were the regular township meetings, at which a township organization was perfected, the problems of soil fertility discussed, and the testing of seed corn demonstrated and urged upon every farmer present. The result of twenty-seven such

meetings was the organization of a County Farmers' Bureau, the reaching of 2,073 farmers, a number of whom have later ordered limestone to correct the acidity of some of their fields, and at least 40 per cent. of whom have tested their seed corn this year.

HOG PRODUCTION AND HOG CHOLERA.

These meetings were followed by a hog cholera and hog production survey conducted in co-operation with Purdue University, who furnished two of her Extension men for the work. The results of the survey showed the urgent need of more hogs and other classes of live stock in the county. Three hog cholera meetings were held, with an attendance of 227 farmers. At the meetings the Purdue men discussed the latest and best methods of hog production, together with the preventative and remedial measures to be waged against hog cholera. Since these meetings were held in the latter part of March, there have been four cases of hog cholera in the county, but each of these was so handled that there was no further spread of the disease.

ORCHARD SURVEY.

Owing to the adaptability of the county for fruit raising, an orchard survey was carried on, with Purdue University co-operating. A number of orchards were inspected and two pruning and spraying demonstrations were conducted in the western half of the county. One hundred and seventy farmers witnessed the work, and in the immediate community surrounding the farm where one of the demonstrations was held, there were three power spray outfits sold the week following. As a further result of these demonstrations several barrel spray pumps have been sold, and merchants report that never before has there been such a strong demand for spray materials as there is this year. These demonstrations will be followed up next fall by the County Farmers' Bureau attempting to secure higher prices for the fruit grown by the farmer.

CLUB WORK.

A portion of the time has been devoted to boys' and girls' work. Thirty-eight school meetings were held the forepart of April and 1,501 boys and girls were reached. At these meetings the boys' and girls' clubs were put before the schools, and a permanent boys' and girls' club has now been formed. This year there are 33 boys in the acre corn growing contest and 35 girls in the bread baking contest. Prizes for the contests have been raised

through the Columbus Grange and the business men. The members of the club are scattered throughout the county, and it is hoped that next year the club work may be established on the township basis, and the contests extended to include fruit raising for the boys and sewing for the girls.

ALFALFA CAMPAIGN.

An alfalfa campaign was lodged during the latter part of May, Purdue University again co-operating with two of her Extension lecturers. During this county-wide campaign eighteen meetings were held and 285 people reached, 349 of whom participated in the entire tour. Two days were spent on the work and from seven to nine farms visited each day. For both days there was a total of sixty-two automobiles in the tour. From 15 to 30 minute stops were made at each farm, at which the success or the failure of the crop was discussed and the cultural methods brought out. That the tour met with the approval of the farmers was evidenced by the fact that before it was ended, they were asking for a winter wheat tour of a similar nature. There are at present approximately 125 acres of alfalfa in the county and by next year this acreage will be at least quadrupled. Farmers are realizing more fully each season the value of alfalfa on account of having had failure with their clover stand of late years. They see now that if they can grow enough alfalfa for hay, that they can turn the clover crop under for green manure and thus bring up the fertility of their soils to a larger degree and also become more and more independent of commercial fertilizer. The success of the tour may be credited to the hearty co-operation of the Grange, the Commercial Club, and the Retail Merchants' Association. At their regular meeting following the alfalfa tour, the Grange voted to have an alfalfa growing contest for this coming year. They offered \$25 for the best field of 1914 fall sown alfalfa on or about next May, 1915. Thus far several farmers have signified their intention of having the best field of alfalfa in the county and the entries to the contest do not close until August 1, 1914.

SILOS AND SILAGE.

Meetings have been held at which the value of silos and silage have been discussed, and arrangements have been made with the farmers of one township to make an inspection tour and study the various types of silos to be found in the county, so as to get a clearer idea of the merits and demerits of the different types.

EVENING MEETINGS.

Evening meetings were held during the spring of the year. These were more general, and such topics as "The Testing of Cows for Butter Fat Production and Cow Testing Associations," "Landscape Gardening," and "The Value of Farmers' Clubs" were lectured upon. Six such meetings were held, with a total attendance of 348.

CORN GROWING CONTEST.

A five-acre corn growing contest in co-operation with the Indiana State Corn Growers' Association is now being carried on. The Commercial Club and the Retail Merchants' Association have subscribed the prize money. These two organizations have also expressed their willingness of getting behind a county corn show to be held next fall. At present plans are being formulated for such a show, at which the five-acre contestants, and the boys and girls club contestants will exhibit their work in addition to the single ear, ten ear, and bushel classes that will be shown.

DEMONSTRATION PLOTS.

There are eighteen farmers conducting demonstration plots, some of which are in co-operation with Purdue University. These demonstrations consist of the different varieties of soybeans and cowpeas, on various types of soils, alfalfa production, clover seeding with the clover drill and without, and the use of lime on the different soil types. A five-acre experimental plot has also been outlined for the County Farm and experiments with varieties of alfalfa, corn, soybeans, and cowpeas, together with fertility plots are now being carried on.

FARMERS' BUREAU.

The County Farmers' Bureau has been able to secure a lower price on limestone for the farmers, a price which means a saving of from 50 to 75 cents per ton, depending upon the locality shipped to. At present the Bureau is assisting the farmers in the testing of their dairy herds for butter fat production, has arranged for a beef cattle feeders' meeting, and is assisting the farmers in getting their fruit upon the city market.

L. B. JOHNSON,
County Agent.

REPORT OF BENTON COUNTY.

July 1, 1913, to June 30, 1914.

Began work July 1, 1913, and spent most of the time the rest of the summer getting acquainted with the people in the county and the conditions under which they were working.

During the past year I have had many office calls and have visited a large number of farms and have had just as many different questions and problems confront me as I have had office calls, or farms visited. Very near all questions and problems pertained to farm life.

Have assisted in teachers' institutes, parent-teachers' associations, helped in the schools, farmers' institutes, and have had a large number of farmers' meetings on various subjects.

TEACHERS' INSTITUTES.

Attended the County Teachers' Institute at Fowler, August 25 to August 28, but was not on program.

Attended Township Teachers' Institutes in Pine, Bolivar, Oak Grove, Grant, Hickory Grove, Parish Grove, York and Richland townships. Also Teachers' Association meeting at Otterbein. Talked on the following subjects: "Agriculture for Schools," "Object of Agriculture in the School," "Soils," "Drainage," "Corn," and "Fertilizers." There were from 9 to 60 people at the different institutes, a total of 185.

PARENT-TEACHERS' ASSOCIATION.

The Boswell school had a Parent Day. Attended and presented "The Boys' Corn Club." Met with them on a later date, at one of their parent-teachers' meetings and talked on why agriculture should be taught in the schools.

Met with the Fowler Parent-Teachers' Association and talked on vocational work. Thirty-eight to 78 people attended, a total of 194.

SCHOOLS VISITED.

Visited and talked at the following schools: Freeland Park, Boswell (three times); Oxford (twice); Gilboa, Center, Ambia, Otterbein (twice); Fowler, Parochial School at Fowler, and three district schools in Pine Township.

County Agent McFarland, of Fowler, is on the job even though conditions are not very favorable.

Benton County farmers are very much interested in the proper method of administering serum to hogs for the control of cholera. County Agent McFarland and assistants giving a demonstration April, 1914.

Demonstrated budding and grafting, testing the acidity of soils with litmus paper and ammonia water, talked on dairying, horses and cattle, boys' corn club, school garden, Purdue egg show, advantage of having agriculture in the schools, and more and better corn. There were from 11 to 95 pupils at the different schools, a total of 443. Arranged for and had about 150 of the pupils from different parts of the county attend the Purdue Corn School one day.

FARMERS' INSTITUTES AND MEETINGS TO ARRANGE FOR SAME.

Attended the Farmers' Institutes at Earl Park, Fowler, Boswell and Oxford. Helped discuss boys' corn club, alfalfa, lime and fertilizer. From 75 to 366 people attended, a total of 743.

Nine committee meetings were held to arrange for the institutes; some were held in my office and some in the different towns. From 3 to 21 people attended, or a total of 84.

Was on program at the Farmers' Institute at Wingate, Browns Valley, Kingsbury, Tangier and Rosedale.

Subject of lectures: "Soil Fertility," "Uses of Fertility," "Improvement of Corn," and "Eradication of Hog Cholera."

COUNTY AGENT CONFERENCE.

Attended the County Agent Conference, Farmers' Institute, Speakers' Conference and Rural Life Conference at Purdue October 13-16.

PURDUE SHORT COURSE.

Attended the Purdue Short Course, January 12-16.

BETTER FARMING ASSOCIATIONS.

Organized better farming associations in York, Parish Grove, Hickory Grove, Grant, Oak Grove, and Pine townships. Aim to meet at least once each month, except in summer season, and discuss farm questions. Have some field meetings in summer time. Expect to have more townships organized next winter.

COMMUNITY CLUB.

In Boliver Township, the Willow Grove Community Club meets once each month. I have met with them four times. Explained my duties, boys' corn club, and discussed alfalfa and hog cholera. From 28 to 40 people attended, a total at the farm meetings of 132.

BENTON COUNTY FARMERS' ASSOCIATION.

The farmers about Atkinson Station have organized the Benton County Farmers' Association. The purpose of same is to market their own live stock and buy part of their supplies, as twine, clover seed, etc. Have met with them twice, but have nothing to do with the buying or selling.

HOG CHOLERA WORK.

Hog cholera was quite prevalent in this county last fall. Did all I could to get farmers to be more careful about spreading the disease and vaccinate if their hogs became exposed or infected with cholera. Had vaccination demonstration in the morning, October 2, at Wm. Van Natta's. Dr. Baker did the work. In the afternoon Dr. R. A. Craig of Purdue Experiment Station lectured in Fowler on "Hog Cholera and Its Control." Forty people were at the vaccination demonstration and 115 at the lecture.

The Benton County Farmers' Association met at Atkinson January 20 and I lectured on the "Eradication of Hog Cholera." Fourteen were present. February 27, we had a meeting at Oxford, and Dr. Clark of the Purdue Experiment Station lectured on "Hog Cholera and Its Control." Seventy-six were present.

Most all men that raise hogs are interested in the control of hog cholera, but they often wait until their hogs are sick before they vaccinate, and then many do not get the desired results.

HORTICULTURE.

Very little attention has been given to the orchards in this county. Got a number of men to prune and spray.

February 27th had an orchard demonstration (pruning and spraying) in Oak Grove Township at Lew Wallace's. H. J. Reed, County Agent of Parke County, assisted. March 16th, had an orchard demonstration at Charles Owen's in Pine Township, and March 17 at Lee Dinwiddie's, in Center Township. C. B. Durham of the Purdue Experiment Station assisted. March 30th, I held an orchard demonstration meeting at William Patterson's, in Grant Township, and April 23d at Frank Fisher's in Gilboa Township. From 5 to 97 people attended, a total of 188.

BETTER OATS AND POTATO MEETINGS.

From February 16th to March 24th, better oats and potato meetings were held in all the townships, except Richland. F. J.

Pipal of the Purdue Experiment Station assisted at the meetings in Union, Center and York townships. At all the meetings the better methods of oat culture were discussed and the treatment of oats for smut was demonstrated with the formaldehyde solution. The treatment of potatoes for scab was explained. All the meetings were held at the township high schools, except in Center, York, Grant and Pine townships, so part of the crowds were high school pupils. In all ten meetings were held. From 17 to 92 people attended, a total of 555.

A number of farmers treated their seed oats for smut and on June 24th, we had a smut tour in Pine Township. Three farms were visited, Charles Owen, George Matthews and John Kilmeyer. Mr. Owen had left a small part of one field that he did not treat. It was easy to tell when you crossed the line. In the untreated, 8 per cent. was affected with smut and in the treated, less than 1 per cent. was affected.

George Matthews and John Kilmeyer did not treat their oats for smut and there was 7 per cent. smut in Mr. Matthews' and eight per cent. in Mr. Kilmeyer's. June 26, we had an oat smut tour in Grant and Oak Grove townships. Three fields were visited—Charles Lawson's, R. Meyer's and Oscar Anderson's. Mr. Lawson and Mr. Meyer had treated their oats for smut and there was only about .2 of 1 per cent. of smut in their oats. Mr. Anderson only treated half of his field. Was easy to tell when you crossed the line, 12 per cent. of smut was in the untreated and only .3 of 1% was smut in the treated.

June 29th, we had a smut tour in York Township. Five farms were visited. J. Booty and T. M. Alexander did not treat their oats and there was 6 and 7% of smut in their fields. B. T. Shonkwiler treated part of his oats. There was 10.3% of smut in the untreated and less than 1% in the treated.

C. Kirkpatrick, treated part of his and 9.1% smut in the untreated and less than 1% in the treated. From 12 to 22 people were in the tour, a total of 47.

SEED CORN CAMPAIGN.

September 24th, 25th and 26th we conducted a seed corn campaign in this county. Twelve meetings were held. One in each township, except Center, and two in it. Prof. G. I. Christie and G. M. Frier assisted in the campaign. We met at the edge of a cornfield. Had a talk on seed corn, time to gather, why it should

be gathered then, kind of ears to select and kind of stalks to select from. We then husked a given number of hills in several different places, determined the per cent. of stand, yield and what the yield would have been had there been a full stand. At the twelve meetings from 25 to 140 people attended, a total of 735. Several men in the county told me there was more seed corn gathered last fall than there had been any previous year.

BETTER CORN MEETINGS.

Better corn meetings were held in York, Pine, Parish Grove, Hickory Grove, Oak Grove, and Grant townships. Discussed the better ways of corn culture, why they should test their seed corn, and showed them how they could do it with the sandbox or rag doll if they didn't want to get some tester that is on the market.

At the meeting in Parish Grove Township a man who has a Holden tester brought in two trays of one hundred ears each that were germinated. One was corn from the crib, and only thirty-three ears out of the one hundred germinated properly. The others were from corn gathered in the fall and properly cared for. Ninety-five of those ears had germinated properly.

One meeting was held in Grant Township and the insects that affect corn discussed. In all seven meetings were held and from 7 to 78 people attended, a total of 344.

FERTILIZER AND LIME.

Met the York Township Better Farming Association at Raub, Indiana, January 28th, and lectured on fertilizers and their uses. Forty people were present. Have eight fertilizer experiments in the county this year. All are on corn. The plan is as follows: On one quarter of an acre put potash, on the next quarter put acid phosphate and on the next put a mixture of both. In two of the tests there is a little nitrogen in the mixture. Hope to find out if commercial fertilizer will help produce better corn and if so what element does the most good. So far, it has been very dry and no results can be noticed. Have gotten four carloads of crushed limestone and distributed it to twenty-two farmers in different parts of the county. All are putting it on land where they expect to sow alfalfa or clover. We hope to find out whether lime is needed on this land. None has been on long enough as yet to tell. I advised them to apply about two tons per acre.

CONTESTS.

Have about fifteen boys in the Boys' Corn Club. Had more to start with, but others have dropped out. The ones that are still in are taking a great interest.

Had a five-acre corn contest, and thirty-three men have entered. Have one hundred twenty (\$120.00) dollars for prize money.

CORN SHOWS.

Judged a corn show last winter for Bates and Anderson hardware firm at Fowler. There were thirty-one exhibits and competition was keen. We expect to have a county corn show this winter.

ALFALFA.

Alfalfa is just being started in this county and is grown very successfully by some with little effort. Perry Johnson in Oak Grove Township had ten of his neighbors in January 20th, and I met with them and discussed alfalfa. April 8th, met with the York Township Better Farming Association and lectured on alfalfa. C. Harper of Purdue was at the meeting and lectured on poultry. Sixty-seven people present. June 3d and 4th we conducted an alfalfa campaign in this county. Ten farms were visited and lectures given at eight of them. R. A. Chitty, County Agent of Montgomery County, and F. G. King of the Animal Husbandry Department at Purdue Experiment Station assisted with the campaign. It was found that alfalfa was grown on land that was not tilled, had not been limed and had not been inoculated, but we found better alfalfa where the land was drained, and had been limed and had been inoculated. In some cases alfalfa had failed where the land had not been prepared properly. From 12 to 70 people attended the meetings, a total of 182. A number of farmers are going to sow alfalfa this summer.

SOY BEANS.

Soybeans is a new crop for this county. Several farmers inquired about them last winter and I encouraged them to try some. J. M. Fowler, Jr., has about seventy-five acres on his farms and so far they are looking fine. If they mature properly it may mean a change in the rotation of crops for part of the farmers in this county.

SUMMARY.

During the year I have had 693 office calls and visited 344 farms. The office calls and farm visits have been along all questions that pertain to farm life, and the larger part of them pertain to soils and crops. More people are getting interested in animal husbandry and horticulture.

Have attended 101 meetings during the year and talked to 3,275 people. Not as many people at all of the meetings as would have liked to seen there, but as a rule the more progressive farmers attend.

A number of farmers think there is nothing to this vocational work and say they know how to farm, but at the same time they are watching the men that do attend the meetings, the more progressive ones, the ones that aren't afraid to try something new and are willing for me to co-operate with them.

Expect to do more in the schools this year, have more farmers meetings and see much greater results at the end of the second year.

J. M. McFARLAND,
County Agent.

REPORT OF BOONE COUNTY.

Arriving at Lebanon, Boone County, Indiana, on July 1, 1913, as the first person to fill the office of county agent in that county. I found myself in much the same position that many other men were in at that time.

ORGANIZING THE WORK.

I was an entire stranger to the people and conditions were more or less strange to me, so the first thing to do was to become acquainted with my people and their conditions, crops grown, live stock produced and the amounts of each. The work being new in the county as it was over the State, the office was not understood and there was more or less prejudice to be overcome in many localities. However, office calls came in rather rapidly during the first two months and isolated farm visits were made in all sections of the county.

During the second week after being located here the business men of the town gave a reception for me, to which the farmers in particular were invited. Mr. T. A. Coleman, Assistant State

Leader, was present and addressed the meeting on the "New Vocational Law." This meeting afforded me an opportunity to meet people that I would not otherwise have had. In the third month the school work demanded a large portion of my time and since then the work of various kinds has gone steadily on occupying all the time.

DEMONSTRATION MEETINGS.

Series of demonstration meetings of various kinds have been taken up, the first of which were for the "Selection of Seed Corn." There were held on farms at various points of the county.

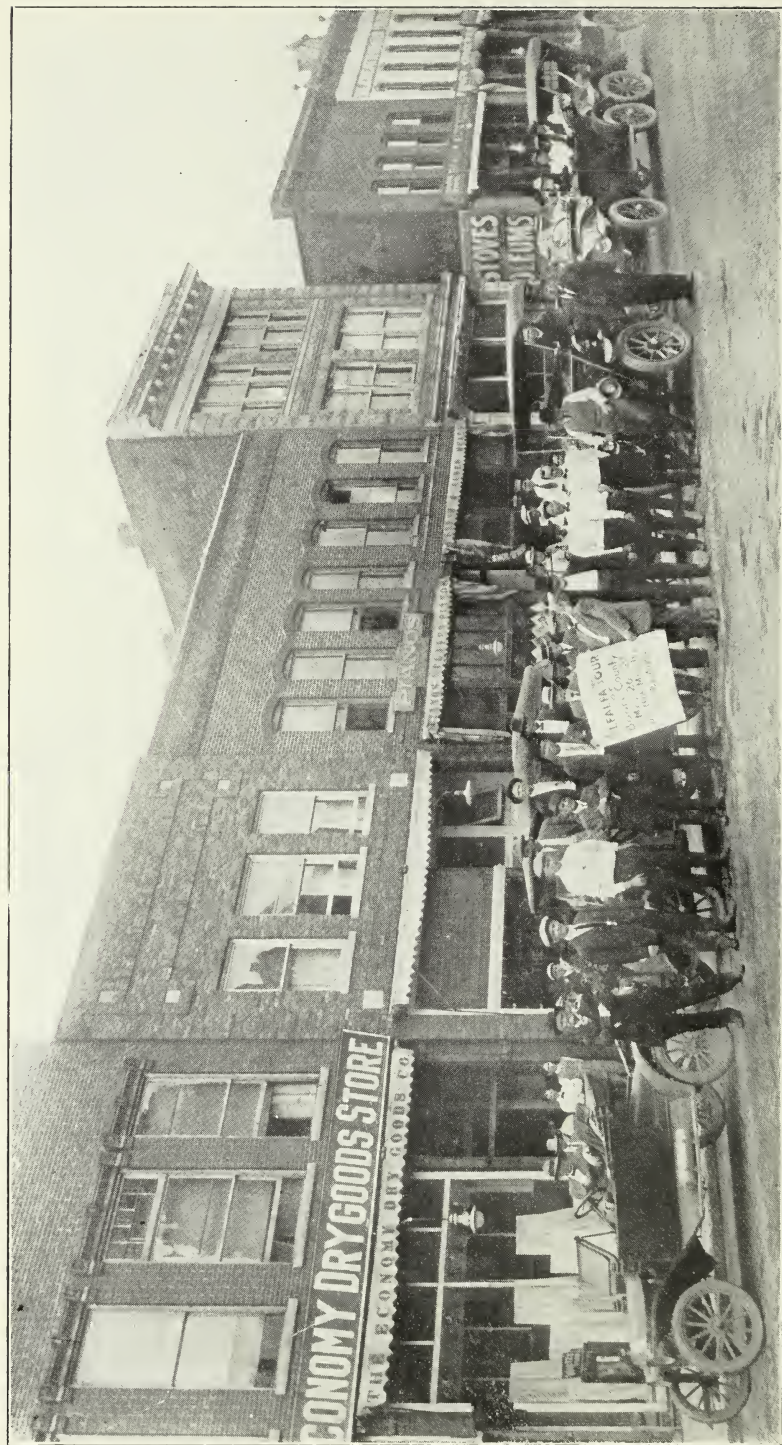

SEED CORN MEETINGS.

<i>Date.</i>	<i>Place.</i>	<i>Attendance.</i>
October 2.....	W. H. Nelson.....	8
October 2.....	M. J. Barker.....	30
October 2.....	John Eaton.....	10
October 2.....	Chas. Howard.....	17
October 3.....	No. 5 School, Jackson Twp..	18
October 3.....	J. S. Baird.....	55
October 3.....	O. H. Starkey.....	40
October 3.....	Geo. W. New.....	24
Total		202

At these meetings the assistance of J. P. Prigg of the Extension Department was secured. The plan of meetings was to give a description of ears to select for seed, and then have each person go to the field and select ears and stalks conforming to this description.

The storing of seed corn was also given an important place. While the attendance at these meetings was not large the interest was good, and results of it were noted throughout the county, as many made field selections of seed corn as they had not done before. To cite a specific example, I will quote T. W. Stevens, of Union Township:

"Before I attended your seed corn meeting I had selected several bushels of corn in one day, but after hearing the discussion at the farm of George New, I spent one day in gathering about fifty ears." On other farms, seed corn racks of various kinds were put to use and in the spring individual ear test work was carried on.

"READY FOR THE START."

Boone County farmers assembled for the first day's Auto Alfalfa Tour of the County, May, 1914.

SEED CORN TESTING WEEK.

The week of March 2-7, was set aside as the week to test seed corn in the public schools of the county. A circular letter was mailed out to each rural teacher, giving instruction how to make the test and the benefit to be derived from it. The co-operation of the patrons was asked, and results of school tests carried home to them. This work had the approval and support of the County Superintendent of Schools, E. M. Servies.

ORCHARD DEMONSTRATIONS.

Orchard pruning and spraying work has received a rather prominent place in the work. Demonstrations have been held at the following times and places:

<i>Date.</i>	<i>Place.</i>	<i>Attendance.</i>
October 8.....	H. A. Flickinger.....	75
October 9.....	D. C. Taylor.....	150
March 11.....	O. H. Starkey.....	25
April 15.....	L. O. Thompson.....	21
March 24.....	Henry Baker.....	6

At three of these meetings assistance was secured from the State Extension Department. Interest was very good at all meetings, and spraying work in particular has been given a heavy impetus. One of the leading drug companies selling spraying supplies reports selling ten times the amount of material sold in any previous year. Others have sold like quantities. I feel that as much or more progress has been made in orchard work than in any other.

MILK TESTING.

A small Babcock milk tester was secured and several testing demonstrations were held at rural schools and other meetings. A limited amount of work has been done on the farms of individual owners. The work appealed especially to school children, as results were something that could be actually seen. I also assisted a member of the Purdue Staff, H. S. Mordock, in forming a cow testing association in this county. A testing unit was also planned at Zionsville, but owing to change of plans by the State Department, no actual work was done, although 125 cows were enrolled to be tested. Farmers in general will be more ready to take up testing in another year, as a branch of a milk condensary is being installed at this place.

ALFALFA TOUR.

Alfalfa is a coming crop of Boone County. There is approximately 300 acres of old seeding of from two to four years old. That much more will be seeded in the next year, if weather conditions are at all favorable.

In view of the adaptability of much of the soil of the county for alfalfa production, an alfalfa tour was held in which a number of fields were visited and growing conditions noted. The following farms were visited, the auto loads going from place to place:

"DIGGING FOR THE NODULES."

Boone County farmers in the field studying effects of inoculating soil with the "nitrogen gatherers" for the alfalfa, May, 1914.

May 26—John Powell, Henry Klinger, Carey Powell, Adolphus Wysong, O. H. Starkey, Dr. E. D. Johns, E. B. Bender, John Sicks.

An average attendance of thirty-five. Fifteen autos.

May 27—Jerome Kersey, Victor Crane, C. O. Brown, G. I. Neptune, Marley Riley, M. J. Barker, O. E. Dixon, William Montgomery.

An average attendance of forty. Twenty autos.

This tour attracted more attention than any movement attempted since coming to the county. It was attended by business men and newspaper men, as well as farmers. The newspapers

gave the tour much publicity and favorable comment. It is evident that much interest in alfalfa was aroused throughout the county, as I devoted a large portion of my time for weeks afterward answering calls on alfalfa questions. Much ground is in the course of preparation for seeding, either this fall or next spring.

The tour was accompanied by G. M. Frier and F. G. King, of the Extension Department. They were a large factor in making the trip a success.

FIELD DEMONSTRATIONS.

I. *Formalin Treatment for Oat Smut.*

The seed to sow a 15-acre field was treated except a check strip.

When results were checking up 5 per cent. of the untreated check was found to be affected, while there was no noticeable smut on the treated oats. This was carried on with the assistance of T. W. Saltmarsh at his farm.

II. *Fertilizer Tests on Corn.*

(a) At the County Farm, eight tenth-acre plats are being used to demonstrate the comparative value of potash and phosphate fertilizers on clay and loam soils.

(b) On the farm of Earl Lowe, nitrogen, potash and phosphate are being used on tenth-acre plats, alone and in combination.

III. *Soy Bean Variety Test.*

(a) George Richmann.

(b) R. V. Snepp.

In conjunction with the Crops Department of the Experiment Station, I am assisting the above men to carry on a variety test of soy beans, three varieties being used.

IV. *Corn Variety Test.*

(a) L. M. Church.

With the assistance of Mr. Church and in conjunction with the Crops Department this test is being carried on the same as with the soy beans.

There will be no results to check up for some time.

CONTESTS.

I. *Boys' Acre Corn Growing Contest.*

This is being carried on under the rules governing the contest, as laid down by the State Extension Department. The township is a unit.

Prize money aggregating \$180 has been voted by the County Bankers' Association, and this will be awarded to the winner in each township.

There are approximately thirty contestants.

II. *Five-Acre Corn Growing Contest.*

This contest is conducted under the rules laid down by the State Corn Growers' Association, but the county is the unit.

The prizes for this aggregate \$150, and was raised as follows:

G. I. Neptune (farmer).....	\$100 00
Business Men	50 00

It will be distributed thus:

First prize	\$50 00
Second prize	30 00
Third prize	20 00
Next five	10 00

There are twenty entries in this contest and several of them are first-class corn raisers.

COUNTY HORSE BREEDERS' ASSOCIATION.

On February 21, 1913, a meeting of those interested in horse breeding in Boone County was called at the court house to organize a county horse breeders' association. There had been agitation in this direction for several months, and I thought it better to assist and be a part of such an association rather than to let it be organized without my help. I was elected secretary. March 21st, a stallion and mare show was held with forty-one entries. There were 1,000 people at the show. Ribbons were placed on the prize winners. Mr. J. Schwab of Purdue acted as judge. A colt show is being planned for this fall.

CHOLERA CONTROL.

During the summer and fall of 1913 hog cholera was prevalent throughout Boone County. At various times throughout the year meetings were held to discuss the control of the disease by sanitary precautions and vaccination.

The following meetings were held:

<i>Time.</i>	<i>Place.</i>	<i>Attendance</i>
November 7...	Lebanon	120
December 21..	Thorntown	75
June 23.....	E. S. Stansel.....	18
June 24.....	O. B. Knowlton.....	16
June 24.....	Fayette	55

In addition to these central meetings a large number of office calls and many farm visits have been made to help control cholera. The disease is not nearly so prevalent this season.

SCHOOL WORK.

The work in agriculture being new to the teachers as well as the pupils of the public schools of this county, much time has been devoted to assisting them. Two talks were given by myself at the Teachers' County Institute in August. All the township institutes were visited at least once during the winter and some of them twice. At these meetings the work for the month was taken up and discussed, and the teachers given an opportunity to ask questions pertaining to the work in agriculture. In addition to this, nearly all the rural schools of the county were visited and a short talk given on the agricultural work immediately before the pupils, or on any subject that the teacher was not able to make clear to the class. Milk testing demonstrations and weed seed identification work was done before the school. Each month a bulletin was issued to the rural teachers. This bulletin contained an outline of topics for the month. Teachers and pupils were encouraged to attend orchard demonstrations, seed corn meetings and the farmers' short course. The schools assisted in seed corn germination week, March 2-7, 1914, whenever conditions permitted them to do so.

FARMERS' CLUBS.

There are four active farmers' clubs in the county, that hold regular meetings at periods from two to four weeks. Each club

has its officers, and programs are arranged for, usually several weeks in advance. The meetings are held at rural school buildings, and the teachers were of very material aid in assisting in the organization of the clubs. The membership ranged from 50 to 200. The locations of the clubs are as follows:

Walnut Grove, Sugar Creek Township.

District No. 10, Jefferson Township.

District No. 5, Eagle Township.

District No. 6, Marion Township.

Twice each, during the winter months, I was on program at these places, either for a talk on some practical farm topic or for an illustrated lecture.

FARMERS' SHORT COURSE.

The Purdue Farmers' Short Course was with us for three days, December 15th, 16th and 17th. At this course, practical lectures and demonstrations were given on nearly every phase of farm life. The work was given by eight members of the Extension Department of Purdue. They had with them a carload of live stock and equipment for demonstration purposes. The attendance for the course was approximately 500 and interest very good.

SUMMARY.

Office work has constituted no small portion of the year's work. Each morning until 9:00 o'clock and all day Saturday have been devoted to office work. In addition to this, other time has been used as needed.

The calls that have come to the office have been along almost every line of farm work. The following are some representative topics: Setting of orchard trees, pruning and spraying of trees for various insect and plant diseases; fertilizers for wheat, corn and alfalfa; all the different steps in securing a stand of alfalfa and caring for same after getting it; testing soil for acidity, adaptability of soil for certain crops; culture of soybeans and cowpeas; where to obtain inoculating bacteria for different legumes; feeding of all classes of live stock, balanced rations, comparative value of feeds; use of concentrates, value of milk testing; breeds and breeding; vaccination of hogs, diseases of different kinds of live stock; analysis and value of fertilizers, home mixing of fertilizers; farm management problems, markets.

Farm visits were to take up such of the problems as could not readily be taken up at the office.

Meetings have been held throughout the year to discuss seasonable topics. Some of these are as follows: "Seed Corn Selection and Storage," "Pruning and Spraying of Orchards," "Cholera Prevention," "Alfalfa Growing," "Milk Testing," "Care and Management of Brood Sow," "Care and Management of Brood Mare," "Feeding the Dairy Cow," "Illustrated Lecture on Live Stock," "Corn Cultivation," "Use of Phosphate," "Co-operative Buying of Fertilizers," "Organizing a Cow Testing Unit," "Catch Crops," "Agriculture in the Schools," "Culture in Agriculture."

These meetings have had fair attendance throughout the year and interest always good. Just how much good results from these meetings it is difficult to estimate, but some evidence is seen that ideas gained at all of them are being practiced.

The following is a tabulation of that part of the work, that can be reduced to figures:

Number of meetings held.....	165
Number in attendance.....	8,997
Number of farm visits.....	294
Number of office calls.....	691
Number of miles traveled.....	4,998

R. W. IMEL,
County Agent.

REPORT OF CLARK COUNTY.

September 1, 1913, to June 30, 1914.

Upon arriving in Clark County the first thing that seemed necessary to me was to look over the county and find some few men who were leaders in their respective localities and gain from them what was thought of the work about to be taken up as well as the work along agricultural extension that had been done in the county previous to this time. It was also the idea to find out if possible the needs of the locality, its drawbacks, and also what it had that was good when compared with other nearby districts. It was useless to try to compare this county with those farther north in the State. Below is a summary of the existing conditions I found here and that seemed best for us to try to remedy first.

SUMMARY OF CONDITIONS.

1. There was a lack of organized work in the county for the distribution of experimental data that was available and useful for this county.

2. There were only four townships out of twelve that had any agricultural organization at all.

3. The schools and churches had taken but little part in bringing before the people subjects that pertain to their farm life.

4. That the yield of the crops was very low and barely profitable if the average as given in the statistical reports of the county were reliable.

5. That the soil as an average in the county was sour and needed lime to remedy it.

6. That there were few full-blooded animals in the county, and the grades that were here were of a poor quality.

I found, however, some profitable farms and farmers. A number of men had made some special subject their main profit producer. A number found that fruit was a line that they could realize the most from. Others that they could do best with full-blooded live stock, etc. I have endeavored to encourage these.

INCREASED PUBLIC SENTIMENT.

Now while it seemed impossible to bring about much of a change in the county in one year, it did seem possible to create and stir public sentiment so that here would be an increased demand for information regarding things agricultural and eventually develop a more profitable system for the county.

There was no trouble in getting the farmers together and in gaining their interest after the first few meetings. It was my plan to have an organization in each township and each organization to be directly connected with Purdue so that each winter it would have a regular farmers' institute under the direct supervision of Purdue. Nine of the townships will hold institutes this year and in each of the remaining three there has been a man appointed to have charge of any extension work that may be conducted there, this appointment being made by the chairman of the organized townships. Now when any meeting is held in any township there is a chairman ready. Owing to the fact that the schools are teaching agriculture the districts and teachers are more willing that these meetings be held in the schoolhouses. In fact a good number of my meetings have been called and advertised by the schools, the

lectures to be on the subjects they are studying in their classes. Fifty-two meetings have been held and 2,565 people were present.

TOPICS OF DISCUSSION.

The main topics discussed at these meetings have been liming the soil, selection of good seed, using of fertilizer, testing milk, spraying of orchards and growing of alfalfa. In the main I believe that the biggest gains have been in creating public sentiment in favor of a better method of farming and in regarding the experiments carried on at Purdue University and other experimental stations in a more favorable way. The one thing that opened the eyes of a great many to the value of the station was the fact that they had found a way to rid the soil of wild onions, which are an extensive pest here.

DEMONSTRATION WORK.

We have had some demonstrations but not as many as we hope to have this coming year. I feel that my lectures on liming the soil have been worth while, for fifteen more car loads have been used in the county this year and there are three lime crushers now working in the county. This must increase the crop yield. This year a good many orchards were sprayed and taken care of that had long been neglected, and still the work is just beginning.

Summarizing I would say that the work so far has been to interest the people as well as to bring before them something of value. It has also been the aim to organize the several forces working in the county, to unify their efforts and thus bring about a better system of farming for Clark County.

A. J. HUTCHINS,
County Agent.

REPORT OF CLINTON COUNTY.

September 1, 1913, to June 30, 1914.

GENERAL SURVEY.

The first work of the county agent upon entering his duties was to make a general survey of the conditions of the various phases of agriculture. This work included a study of the general system of farming, contrasting the more efficient with the crude. The object of this survey was to obtain a working knowledge of the best systems used so that they could be carried to farmers who were practicing less effective ones.

TYPES AND CONDITIONS OF SOILS.

Another phase of the survey consisted of a study of the types of soils and their condition with reference to humus and acid, etc. This study revealed the fact that a large portion of the soils of the county were acid. As nearly as can be estimated from the tests made as much as 90 per cent. of the soil would be benefited from the application of lime. On some farms humus was also found to be badly wanting.

CROPS.

A study of the crops showed that alfalfa, one of the most valuable as well as the most profitable crops, was being grown but very little, as were also cowpeas and soybeans. The need of encouraging the growing of these was very evident.

STOCK.

The stock survey revealed the fact that Clinton County first of all needs more live stock, especially in some sections of the county, to consume the feed produced on the farm so as to keep up the fertility of the soil. Better live stock, especially of the dairy breeds, was also found to need encouragement.

Only a small number of farmers used purchased protein feeds to balance the ration. The silo was found on only about 5 per cent. of the farms.

POINT OF CONTACT.

One of the biggest problems that confronted the agent when he first appeared in the county was the matter of getting in touch with the people.

Schools. (a) Teacher. The county agent of Clinton County was fortunate in coming into the county at the time of the session of the teachers' institute. This afforded a splendid opportunity to meet the teachers and also to suggest plans for the year's work.

(b) Children. A great many people were reached through the children in the various schools, which the agent visited often, resulting not only in giving the children a knowledge of agriculture but also enabled the agent to get acquainted with the children, who in return would make the connection with the parents. As many as 76 meetings were held at the schools, reaching 3,653 children.

Meetings. A few meetings held during the early part of the year helped to form the acquaintance of some of the influential men of the county.

Churches. Co-operating with the churches assisted me in meeting a great many people, some of whom it would have been impossible to meet in any other way. Arrangements for the first meeting in the county was made through the church. The success of some of the campaigns conducted later was due to a large extent to the co-operation of the men who were met through the agency of the church.

SELECTION OF INFLUENTIAL MEN IN VARIOUS PARTS OF THE COUNTY AS ASSISTANTS.

The selection of influential men in various parts of the county has assisted me in arranging meetings and in carrying out plans in general. At present I have several men in nearly every township who are a wonderful assistance to me in my work. This corps of men is made up of farmers, teachers, preachers, business and professional men.

ORGANIZATION.

The plan of organization at first was to have each township as the unit of an organization and to have the county as the center of all the organizations. With the limited knowledge, however, of the leaders in the various townships and the inability of getting those organized to carry on work without the assistance of the agent caused me to organize on a different plan, at least for the present. The present plan is to organize for special purposes, such as the promotion of alfalfa culture, farmers' co-operative exchanges, boys' and girls' clubs, etc. We now have the following organizations:

Clinton County Alfalfa Club with 55 members: This club has already purchased 40 bushels of high grade alfalfa seed at a reduced price, also 300 tons of lime. Besides doing this the club has held monthly meetings, at which time alfalfa problems were discussed.

Farmers' Co-operative Exchange, with a membership of 50: This is not a county organization but rather a community affair. The exchange has purchased lime, commercial fertilizer, binder twine and spraying material, valued at about \$1,400. There are several other communities in the county that are ready to organize a similar organization.

Boys' and Girls' Clubs, with a membership of 175: The boys to grow corn and the girls to do sewing and gardening and canning. Two farmers' clubs for the general promotion of agriculture.

DISSEMINATION OF INFORMATION.

Meetings: In order that a large number of people might receive information regarding agricultural subjects, meetings were held in the various parts of the county, at which time lectures and demonstrations were given either by the county agent or by members of Purdue University.

Dairy Meetings: Our first series of meetings held in the county was on the subject of dairying. A total of five meetings was held in the county, at which the attendance was 330, or an average of 66 for each meeting. Two of the meetings were held in town halls, one in a school, one in a church and another on a street corner in the city of Frankfort. Purdue University assisted in these meetings.

Oats and Potatoes: Five meetings were also given over to the discussion of oats and potatoes, giving the cultural methods of these crops, placing especial emphasis upon the treatment of oats for smut and potatoes for scab. All of these meetings, with exception of one, which was held in the office of the county agent, were held in schoolhouses. A total of 459 attended these meetings, of which 273 were school children. Assistance was also had from Purdue in all of these meetings.

Hogs and Hog Cholera: Two men of Purdue assisted in the three hog meetings, all of which were held in school buildings. The weather was extremely cold and stormy, especially during the first two meetings, which reduced the attendance for the three meetings to 95. A good deal of interest, however, was shown at all meetings by those present.

Orchard Demonstrations: Four demonstrations in pruning and spraying the orchard were conducted, two with the assistance of an expert on horticulture from Purdue, at which the attendance was 160, and two by the county agent, at which the attendance was 65. These demonstrations were very popular and gave the farmers much needed information.

Alfalfa: The most extensive campaign conducted in the county was that of promoting the culture of alfalfa. Twenty-seven meetings were held in the county, at which time the purposes and uses of this plant were discussed and cultural methods given. One thousand, three hundred twenty-nine people were in attendance at these meetings. To make the campaign more effective an alfalfa club was organized which now has a membership of 55, which meets regularly the first Saturday of each month.

On May the 27-28 a special campaign was conducted to place the value and possibilities of the alfalfa plant properly before the people of Clinton County. The first day was devoted to a tour over the county in automobiles to study alfalfa fields. Over three hundred people in sixty automobiles traveled fifty-five miles visiting ten fields. At each stop experts from Purdue pointed out the weak and strong features of each field.

On the second day there was what is known in Frankfort as "Alfalfa Day and Million Dollar Picnic." It was called a million dollar picnic because it is believed that alfalfa will add a million dollars to Clinton County. The day was spent in the nature of a picnic. In the morning there was an automobile parade from the city to the park, many of the automobiles being decorated with alfalfa. This was followed with drills by the school children of Frankfort. At noon a basket dinner was served, which was followed by speeches from prominent men in the State. The day concluded with a playlet, "The Marriage of King Corn and Queen Alfalfa," which was produced to inform the people that from that day on the two crops, corn and alfalfa, would work together in the county.

The attendance during the day was estimated to have been 8,000.

It is difficult to estimate the value of the campaign at this time, but it is certain to result in a great deal of good to the rapid promotion of alfalfa culture and the people of Clinton County.

GENERAL SUMMARY.

Number of meetings held.....	156
Attendance at all meetings.....	17,475
Number of office calls.....	767
Number of farms visited.....	208
Miles traveled	5,432

REPORT OF DECATUR COUNTY.

From August 1, 1913, to June 30, 1914.

Activities for the year beginning August 1, 1913, and ending June 30, 1914, comprise the following: 139 meetings with a total attendance of 9,002, 762 office calls, 500 farm visits with a mileage of 5,703. The farm and office calls related to practically every phase of farm work and crops.

FIELD WORK.

During the last half of September and the first half of October "seed corn selection meetings" were held in various parts of the county. Despite the busy season these were well attended.

During the winter four farmers' institutes were organized in addition to the three already in the county. Night meetings, at which various farm topics were under discussion, were held all through the winter and early spring. These were discontinued with the approach of the crop season.

There was an abundant apple crop in the northern part of the county for the year 1913. A commission firm was interested and induced to send a representative for purchase of surplus. Three carloads were shipped out. The apple crop is very short here this year.

Four orchard pruning and spraying demonstrations were held in the spring, and while attention to orcharding will never be a prominent activity in this county, farmers with farm orchards are beginning to realize the absolute necessity of spraying.

Co-operation with the teachers of the county schools was secured in seed testing work this spring, both in clover and corn. This work will be continued from year to year.

HOG PRODUCTION CAMPAIGN.

A "hog production" campaign, with the assistance of Messrs. Schwab and Clark, was conducted the latter part of March. Four meetings of this nature were held. Hog cholera vaccination was not followed to any great extent here and the loss from the disease was very large. As a result of these meetings and personal work with individual farmers, more was done this spring and summer, and the results have been sufficiently satisfactory that most farmers vaccinate when herds become infected.

ALFALFA TOUR.

The assessors' reports for the acreage for 1913 gave total of 95 acres. Report for 1914 gave 166. The county agent has been personally connected with over 250 acres seeded this past August. Some fields were sown in the spring, and where sown early enough and on well prepared ground are giving splendid results. Practically all fall seedings are showing well at present. Quite a number of the farmers sowing used limestone, and some few used hydrated lime. An alfalfa auto tour was held late in May, which has largely been responsible for the increased acreage. In this tour the attendance of only interested farmers was sought, and while the number was not large a good per cent. of those present are sowing this fall.

OFFICE MEETINGS.

During the spring, office meetings were held on Saturday afternoons, one each on clover seed, soybeans, oats.

A large part of this county has acid soil, and on that type of soil clover is not sown. Cowpea and soybean demonstration plots have been concluded this past season with very gratifying results. The farmers are interested, and where they do not seem inclined to take to the liming proposition, they will in a large measure adopt these crops. There will be quite a quantity of soybean seed for sale here this season.

DEMONSTRATION PLOTS.

In connection with the acid condition of the soil, limestone demonstration plots have been established, and while it is yet early to predict the outcome, where the clover was not killed by drouth, the appearance and stand of clover is improved at least 100 per cent. A local stone company has agreed to donate a car of limestone dust for use in demonstration purposes, and these will be established this fall.

Sweet clover is being tried in different parts of the county on broken land where blue grass has run out, but as the dry weather of the summer has made a short growth, results are yet to be determined.

Four vetch demonstration plots have been established and are now sown. A corn variety test plot is running, as is also an ear-to-row plot. Also three co-operative fertilizer tests.

SUMMARY.

A farm service bureau has been established, where stock and other farm articles are listed for sale, farm help secured, etc.

Boys' corn clubs and poultry clubs have been organized with an enrollment of about forty in each.

A men's five-acre corn contest is being conducted with about fifteen entries.

A soil fertility campaign was conducted in March, and since that time many calls have come in as to methods of increasing fertility.

While the time of service in this country has been one month less than a year, the support to the movement has grown very satisfactorily.

W. E. McCoy,
County Agent.

REPORT OF ELKHART COUNTY.

DRAINAGE.

Often farmers seek advice regarding fertilizer requirements when a good system of drainage is needed more than anything else. In fact good drainage is necessary before fertilizers can be profitably applied. With this end in view the county agent has assisted in laying out a few small drainage systems. The county surveyor kindly loans instruments for the purpose. Drainage is often misunderstood even in this well developed county, and many farmers seem to think that this drainage water is needed to tide them over spells of drouth. Thus the inability to grow good crops is often attributed to wrong causes.

SOIL FERTILITY.

Many experiments with commercial fertilizers on field crops under ordinary field conditions show that Elkhart County lands generally require phosphorus. Finely ground raw phosphate rock when applied with plenty of organic matter has given good results in two experiments. The lands also need nitrogen, because farmers have been producing very little clover and other nitrogen collecting legumes owing to the acidity of the soil. In order to correct this condition about forty carloads of lime have been applied. The results have been sufficiently gratifying to the farmers to warrant a large demand in the near future.

Some of the low black soils require lime and nearly all give good returns from applications of potash and phosphorus.

Purdue University has given advice regarding the treatment of about forty soils as determined by samples submitted. She has aided us greatly in determining acid neutralizing ability of nine samples of marl submitted which enabled us to locate three very valuable beds of this material.

LEGUMINOUS CROPS AS SOIL IMPROVERS.

The following demonstrations are being made with legumes as soil improvers:

<i>Kind of Crop.</i>	<i>Number of Demonstrations.</i>
Soybeans	5
Cowpeas	5
Sweet clover	1
Hairy vetch	3
Soy beans and corn for silage.....	1
Early and late cutting of clover hay with reference to its effect on seed production	2

In one case that came under observation wheat followed cowpeas on light sandy soil with good results. The cowpeas were cut for hay and the seedbed was prepared by harrowing with a spring-tooth harrow.

These demonstrations were suggested and planned by Purdue University.

VARIETY TESTS.

<i>Kind of Crop.</i>	<i>Number of Tests.</i>
Corn	6
Wheat	1

The corn variety tests were started this spring and are not yet completed. Several varieties were furnished by Purdue University and in addition several local varieties are being tested.

FARMERS' ORGANIZATIONS.

We have three organizations in Middlebury Township doing splendid work under the name of Farm Betterment Clubs. Union, Clinton, York, Cleveland, Concord and Jackson have organizations numbering from two to three each, whose purposes are not so

clearly defined. An attempt will be made to develop these into organizations having the same name and by-laws. Through these organizations more farmers' meetings were held during the last eleven months than in fifty years before.

FIELD CAMPAIGNS.

Purdue University has co-operated in all the activities of the county agent. Through the Extension Department the entire university has rendered a great service to the county. Any attempt to enumerate these benefits here would be useless. A few of the more specific ones are given below:

Seed Corn Campaign:

Attendance, 200. In this campaign seed selection and preservation took a prominent part. Farmers were advised to maintain a seed plot and were given plans for improving their seed.

Alfalfa Production Campaign:

A sufficient number of automobiles were provided to carry seventy-five men from Elkhart to several of the best alfalfa fields of the county. The methods used were discussed and the degree of success attained was observed.

Wheat Production Campaign:

Attendance, 400. One of the meetings was held at a picnic where about 2,000 people were present, but not all were interested in wheat. The points treated were as follows: Variety adaptability; preparation of seed bed; eradication of Hessian fly; treatment of disease; fertilization.

Oat Production Campaign:

Attendance, 300. Special reference was made to treatment of smut and incidentally to the points mentioned above in the study of wheat.

Hog Production Campaign:

Attendance, 150. Special reference was given to stamping out hog cholera. It has started a few times in this county this summer but by using prompt and effective measures it has been stamped out and there is no cholera in Elkhart County at present.

Short Course:

Attendance, 3,000. In many respects the Short Course was the greatest factor for agricultural development we have had this year.

It was well attended and the instructors all handled their parts with ability and success. They commanded the attention of their hearers and earned the respect of the entire people for the University. The details for another Short Course could easily be arranged in this county this year with assurance of a still greater success.

SCHOOL VISITS.

The school visits referred to below were in the interest of the Boys' and Girls' Club work. We have confined our efforts to the corn contests for the boys and the bread contests for the girls. Prizes will be given for exhibits from each township in the county, based upon the exhibit together with the book record as suggested by the university. Prizes will be given for other farm products also but special interest attaches to the contests mentioned above. A number of preliminary meetings are being held in different parts of the county which we believe will add greatly to the interest in the county meeting to be held later.

In the school visits an attempt was made to arrange a date with the teacher, thus giving parents an opportunity to be present. The township trustee was usually in attendance with the county agent and a general interest was manifested on the part of the local community in most instances. Often the visit was made the occasion for a community dinner at the schoolhouse or a nearby farm house, and the attendance splendid. The school furnished a program and their work in agriculture was attractively displayed.

FARMERS' INSTITUTES.

The Purdue Short Course held in February displaced some of the institutes which would have been held and were actually arranged. The Short Course being so much more complete, farmers thought institutes unnecessary. The institute held at Nappanee was the largest held in the county last year. It was a two-day institute and 800 people were present the second day. The institute held at Elkhart, although not so largely attended, was a success in every way. The management in this case was especially efficient and everything was conducted with great precision. Both of these institutes were valuable and appreciated by the farmers and business men.

The county agent assisted in institute work in Lake, Porter and St. Joseph counties. Dr. John S. Bordner of St. Joseph County originated the plan of farmers' schools which has been successfully used in St. Joseph and Elkhart counties.

FARM VISITS.

Ever since early spring the county agent has been unable to meet the demands in regard to farm visits. The farmers are much interested in soil conditions and lime requirements, preparation for alfalfa, applications of fertilizers, and the problems of building up depleted soils. The county agent is called upon in many instances to help plan farm fences, drains, rotations, barns for dairying, barns for pure bred stock, and plans for manure conservation. The farm visit plan is very popular, but so few farms can be visited that if the time is taken up in making visits and giving advice to individuals less will be accomplished than might be done by farm surveys and the working out of systems adapted to soil types and market conditions. The farm visit, however, is a powerful factor in increasing the efficiency of the farmer and giving him a wholesome respect for his business. It is a matter of first importance for the farmer to have a respect for his soil, a respect for his stock and a respect for his tools. Farm visits, meetings, contests and shows all exert a powerful influence. Many farmers call the county agent because they wish to start some crop like alfalfa, soybeans, vetch, etc., with which they are not familiar. There are very few cases where farmers do not follow advice exactly. The fact that we were able to stamp out the first outbreak of hog cholera this summer is proof that farmers are willing to act upon advice.

The following figures are submitted with the aim of indicating some of the activities of the county agent.

	<i>No. Office Calls.</i>	<i>Farm Visits.</i>	<i>School Visits.</i>	<i>Meetings.</i>	<i>Attend- ance.</i>	<i>Mileage.</i>
<i>1913.</i>						
August	45	36	..	4	84	305
September	60	58	..	9	320	509
October	67	62	50	7	702	641
November	44	45	..	6	215	500
December	118	15	9	30	2,068	480
<i>1914.</i>						
January	103	4	..	12	4,902	314
February	77	5	..	30	4,354	362
March	106	15	..	19	976	236
April	123	68	..	19	1,099	392
May	82	81	611
June	100	95	..	4	154	560

During February and March institute work was also done in St. Joseph and Porter counties.

C. L. COFFEEN,

County Agent.

REPORT OF GIBSON COUNTY.

The office of the county agent of agriculture for Gibson County was opened in Princeton, on September 1, 1913.

This office was backed by the county board of education and many of the progressive farmers of the county. However, there was no farmers' organization behind the movement. Since that time I have organized six township farmers' organizations that have been effective in helping to promote better agricultural conditions in the county.

A brief outline of the work directed in the county is as follows:

1. Seed Corn and Corn Cultivation.
2. Soil Fertility.
3. Commercial Fertilizer.
4. Legumes and especially Alfalfa.
5. Orchard Work.
6. Drainage.
7. Eradication of Wild Onions and Wild Garlic.
8. Control of Army Worm.
9. Aphis in Melon Section.
10. Dairy Testing.
11. Pure Stock Breeding.
12. Swine Cholera Control.

SEED CORN AND CORN CULTIVATION.

A seed corn campaign covering the entire county was conducted on October 7th, 8th and 11th. Meetings were held in the corn-fields and method of the selection and storing of seed corn was given to the farmers in detail. Mr. J. P. Prigg assisted in this campaign and in the eleven meetings held we talked to 506 people.

Attendance.

Eastern Johnson Township	28
Western Johnson Township	14
Union Township	55
Western Montgomery Township	56
Eastern Montgomery Township	58
White River Township	18
Patoka Township	20
Center Township	49
Columbia Township	105
Wabash Township	25
Rosebud Locality	78

Total 506

As a result of this tour many farmers did field-select their corn and much more of the seed corn was properly stored than in former years. Seed corn was also studied and scored in many of the schools, and this helped our seed corn situation.

Two seed corn schools or shows were given in the county, one in Barton Township and one in Center Township. At Somerville in Barton Township on December 13th we had a very good corn show, with 210 people present. The people of this section never had made much of a selection of seed corn before this time and the show was of value to them. At Francisco in Center Township, on January 10th, we had a corn show in which the boys were given premiums in a class separate from the farmers. The work of the boys was very good and the show awakened a lively interest in seed corn. There were 125 people present.

Realizing the importance of the testing of seed corn, on March 17th started a series of night meetings in the rural school on seed corn testing. Carried a seed corn tester, showed how to arrange corn and how to handle tester. Also gave talk on the value of the testing of seed corn. The results were good as many farmers either tested all or a part of the seed corn planted in the spring of 1914.

The meetings with the attendance were as follows:

<i>Date.</i>	<i>Location.</i>	<i>Attendance.</i>
Jan. 28,	Miller School, Center Twp.....	21
Mar. 17,	Kings Station, Patoka Twp.....	22
Mar. 19,	Pigeon School, Patoka Twp.....	31
Mar. 20,	White Oak School, Columbia Twp.	20
Mar. 21,	Maxam School, Center Twp.....	18
Mar. 23,	Hull School, Montgomery Twp...	26
Mar. 24,	Upton School, Columbia Twp....	46
Mar. 25,	Black River School, Mont. Twp...	24
Mar. 27,	Benson School, Montgomery Twp.	12
Mar. 28,	Harper School, Columbia Twp...	31
Mar. 30,	Somerville School, Barton Twp...	51
Mar. 31,	Mackey School, Barton Twp.....	65
Apr. 1,	Buckskin School, Barton Twp....	46
Apr. 10,	Wheeling School, Wash. Twp....	42
Total		455

Then during the year have had personal talks with the fifty-four farmers on the question of corn selection and corn cultivation. Have had three meetings on corn cultivation.

Attendance

White Oak, Columbia	8
Harpers, Columbia	12
Black River, Montgomery	20
<hr/>	
Total	40

The records show that during the year have talked to 1,380 people on the seed corn and corn cultivation subject.

SOIL FERTILITY.

The question of Soil Fertility has been one of importance in the county and have had many personal talks and meetings on the subject.

<i>Date,</i>	<i>Location.</i>	<i>Attendance.</i>
<i>1913.</i>		
Nov. 6,	Oakland City, Columbia Twp....	28
Dec. 3,	Hill School, Wabash Twp.....	25
Dec. 27,	Harpers School, Columbia Twp...	38
<i>1914.</i>		
Jan. 9,	Francisco, Center Twp.....	85
Jan. 16,	White Oak, Columbia Twp.....	16
Jan. 27,	Sheridan, Union Twp.....	38
Feb. 4,	Maxam, Center Twp.....	46
Feb. 6,	White Oak, Columbia Twp.....	6
Feb. 27,	Pigeon, Patoka Twp.....	87
Mar. 10,	Naube, Union Twp.....	40
<hr/>		
Total		409

Have had personal conferences with twenty-five farmers on the subject of soil fertility. The total number of people talked with on this subject is 434.

COMMERCIAL FERTILIZER AND LIMESTONE.

Commercial fertilizer has been used extensively throughout portions of Gibson County, and many farmers are dissatisfied with its use, due either to the using of the wrong material or not using it in the proper rotation. I have had many meetings and personal calls in which I have discussed the subject in full and tried to show where, if properly used, the commercial fertilizer was a good asset, but that commercial fertilizer alone was not the proper method. The subject of limestone is one that has been given considerable attention, as many of the soils are acid and we are using limestone not only for alfalfa but also for clovers and other legume crops.

A summary of the work is as follows:

<i>Township.</i>	<i>Location.</i>	<i>Attendance.</i>
Columbia,	Oakland City.....	26
Columbia,	Harpers	38
Columbia,	Oakland City.....	36
Union,	Sheridan	38
Patoka,	Orrs	22
Columbia,	White Oak	31
Total		191

In personal talks I have talked with ninety-one people on this subject, making a total of 282.

LEGUMES.

With the legume work more has been done along the line of alfalfa than any other one legume. However, I have many calls on the clover, cowpea, vetch, soybean and other legumes. In meetings I have tried to explain the way the legumes have the power of taking free nitrogen from the air, the necessity for a sweet soil and the high place these plants should have in the rotation.

On May 18th and 19th an automobile tour was run over the county in the interest of alfalfa. On the two days we had Professor Frier and Professor Thompson with us. We had forty-two automobiles, visiting thirteen fields; held five meetings with an attendance of 300 people. This tour did more good for the cause of alfalfa and better farming in Gibson County than any other one thing that I have accomplished in the county. Outside of the alfalfa tour I have held meetings and had personal visits as follows:

<i>Date,</i>	<i>Location.</i>	<i>Attendance.</i>
1913.		
Sept. 26,	Mt. Olympus, Washington Twp..	110
Oct. 25,	Wheeling, Washington Twp.....	32
Dec. 18,	District 10, Union Twp.....	20
Dec. 19,	Harpers, Columbia Twp.....	12
Dec. 27,	Harpers, Columbia Twp.....	38
1914.		
Jan. 20,	Black River, Montgomery Twp...	38
Feb. 21,	Harpers, Columbia Twp.....	47
Mar. 11,	Ft. Branch, Union Twp.....	42
Apr. 17,	White Oak, Columbia Twp.....	19
Total		358

In the office and on farms I have consulted with 142 people on the subject of alfalfa, clover and other legumes. In all, including the alfalfa tour, have presented the legumes subject to 800 people.

The legume problem is one that is growing in importance every month in the county and some of the results received from the alfalfa, clover, vetch, soybean, etc., are attracting the attention of many persons not heretofore interested in better agriculture.

ORCHARD WORK.

There is a portion of Gibson County that is well adapted to fruit raising, and have worked through this area helping them with spray mixture and showing the value of the hydrometer. The pear orchards are so bad with blight in most sections that the orchards are dying very fast. However, the apple and peach are in fair condition.

Meetings and demonstrations were held at the following points:

<i>Date,</i>	<i>Location.</i>	<i>Attendance.</i>	<i>Demonstration.</i>
1913.			
Dec. 20,	Columbia Twp., Harpers.....	28	No.
1914.			
Feb. 17,	Union Twp., Ft. Branch.....	38	Yes.
Apr. 17,	Columbia Twp., White Oak....	19	No
Mar. 18,	Union Twp., Ft. Branch.....	96	Yes.
Mar. 18,	Montgomery Twp., Owensville..	25	No.
Mar. 19,	Patoka Twp., Princeton.....	12	Yes.

On March 18-19, 1914, Mr. C. B. Durham of the Purdue Extension Department conducted the demonstration. Have had fifty-nine personal visits either on farms or in office on orchard questions. Total in meetings and visits, 277 people.

DRAINAGE.

Drainage in this county, which has three river bottoms, is a large question and the work is done in this drainage district. Tile is used here in the county very extensively. We have an area in the eastern part of the county that is very close soil and have tried dynamite in an experimental way on these land.

Have held the following meetings:

<i>Date,</i>	<i>Location.</i>	<i>Attendance.</i>	<i>Demonstration.</i>
1913.			
Dec. 2,	Oakland City, Columbia Twp..	50	Yes.
Dec. 3,	Francisco, Center Twp.....	87	Yes.
Dec. 4,	———, Wabash Twp.....	6	No.
1914.			
Feb. 14,	Patoka, White River Twp.....	50	No.
Feb. 3,	Ft. Branch, Union Twp.....	48	No.
Feb. 7,	Harpers, Columbia Twp.....	38	No.
Feb. 6,	White Oak, Columbia Twp.....	6	No.
		<hr/> 285	

Have held personal conferences with eleven persons on drainage subjects. Total number, 296.

ERADICATION OF WILD ONIONS AND WILD GARLIC.

The wild onion and wild garlic are two of the weed pests of the county that the farmers up to this year had no successful way of eradicating. When Purdue found that spraying orchard heating oil in the spring upon the young garlic and onions killed them, many farmers were very much interested. As a result we held eight spraying demonstrations in the county in April of this year. Our spray pump did not work as well as it should and as a result we did not do a perfect job of spraying. However, we did demonstrate that orchard heating oil will kill the garlic and onion.

Mr. Pipal of Purdue Botanical Department conducted the demonstration of April 18, 1914.

Demonstrations were held at the following places:

<i>Date,</i> 1914.	<i>Location.</i>	<i>Attendance.</i>	<i>Demonstration.</i>
Apr. 18.	Jno. Ballard, Patoka Twp.....	102	Yes.
Apr. 20.	Joe Cunningham, White River Twp..	20	Yes.
Apr. 21.	Alta Key, Patoka Twp.....	25	Yes.
Apr. 22.	Jno. F. Woods, Montgomery Twp....	30	Yes.
Apr. 23.	Oscar Daugherty, Union Twp.....	40	Yes.
Apr. 24.	Jackson DePriest, Center Twp.....	6	Yes.
Apr. 25.	Gerhardt Frohbieter, Johnson Twp..	4	Yes.

227

Outside of these demonstrations many farmers tried the spraying of small patches with very good results. Have given personal advice on the killing of the wild onions and wild garlic to forty-two farmers.

Some inquiries were received as to whether orchard heating oil would kill the snowdrop, or Star of Bethlehem, so on the farm of Thos. McElheney in Center Township we tried the spraying of this snowdrop, which is a pest in this locality, and was successful in killing them. In whole campaign and by personal conference, met 270 people.

CONTROL OF THE ARMY WORM.

During the latter part of May and the first of June we had an outbreak of army worms in Montgomery, Union and Patoka townships. We fought the worms by plowing furrows and spraying vegetation on both sides of the furrow with strong solution of arsenate of lead. We also used the arsenate of lead and wheat bran mixture as bait. We were successful in controlling the advance of the worm in all cases except one, on the farm of Jno. F. Wood, where they passed our sprayed area and damaged a cornfield.

APHIS IN MELON SECTION.

The aphid in the melon section were not bad this season, but have assisted some few of the growers in checking them by spraying with "Black Leaf 40".

DAIRY WORK.

While dairying is not the chief industry of the county, it is one of importance. I have tried to show the farmers that the profit was in keeping good milk cows. That the only test for a good cow is the use of the Babcock milk tester and the milk scale. We have placed milk testers and milk scales in some of the schools and through the students have interested the patrons of the school in keeping better cows, feeding better and giving better care to the milk.

During the ten months have held dairying methods at the following places:

<i>Date,</i> 1913.	<i>Location.</i>	<i>Attendance.</i>
Oct. 21,	Francisco, Center Twp.....	22
Oct. 21,	Ft. Branch, Union Twp.....	33
Oct. 23,	Sheridan, Union Twp.....	12
Oct. 29,	Princeton, Patoka Twp.....	*75
Oct. 30,	Francisco, Center Twp.....	*125
Oct. 31,	Oakland City, Columbia Twp....	*225
Nov. 13,	Ft. Branch, Union Twp.....	42
Nov. 16,	Francisco, Center Twp.....	18
Nov. 3,	Ft. Branch, Union Twp.....	50
Nov. 25,	Ft. Branch, Union Twp.....	42
Dec. 15,	Ft. Branch, Union Twp.....	45
<i>1914.</i>		
Jan. 8,	Owensville, Montgomery Twp....	300
Jan. 27,	Ft. Branch, Union Twp.....	43
Jan. 31,	Owensville, Montgomery Twp....	40
Jan. 2,	White Oak, Columbia Twp.....	21
Feb. 7,	Haubstadt, Johnson Twp.....	12
Feb. 7,	Harpers, Columbia Twp.....	38
Feb. 17,	Ft. Branch, Union Twp.....	42
Feb. 28,	Owensville, Montgomery Twp....	175
Mar. 7,	Harpers, Columbia Twp.....	100
Mar. 13,	Mackey, Barton Twp.....	156
Total		1,616

At these meetings have tested milk from 160 cows and have given instructions as to feeding of cows. *On October 29, 30, 31,

1913, the meetings were held with the Southern Railway that had a special dairy car on their road. On March 7-13, 1913, the meetings were illustrated lectures on the dairy industry. Besides these meetings I have had thirty-two personal conferences with farmers interested in the dairy question. In all have met 1,668 people on the dairy question.

PURE BRED STOCK.

The importance of pure bred stock, both cattle and horses, has been emphasized both in public meetings and private conferences; as a result we have several pure bred cattle sires and two pure bred Percheron sires that have been purchased this year.

Meetings were held at the following points:

<i>Date.</i>	<i>Location.</i>	<i>Attendance.</i>
<i>1913.</i>		
Nov. 8,	Mackey, Barton Twp.....	41
Oct. 25,	Wheeling, Washington Twp.....	32
Dec. 29,	Buckskin, Barton Twp.....	35
Dec. 20,	Harper, Columbia Twp.....	12
Dec. 19,	White Oak, Columbia Twp.....	25
<i>1914.</i>		
Apr. 30,	Oakland City, Columbia Twp...	40
Apr. 30,	Oakland City, Columbia Twp...	65
Total		250

Personal conferences have been held with thirty-two farmers on the question of better stock.

FEEDING OF BEEF CATTLE.

Feeding of beef cattle has an important place in the county. No strictly feeding meetings have been held, but have consulted with twenty-six of the beef cattle feeders of the country and have laid special emphasis upon the production of baby beef cattle. We have several farmers that are planning on trying the baby beef question this year.

SWINE AND HOG CHOLERA

Swine raising is the largest of the live stock raising in the county. Have given special attention to the feeding of the swine and especially the use of a protein supplement with corn. One

dealer in Princeton that had never sold a sack of tankage until last fall sold 26 tons of tankage during the winter of 1913-14. Every feeder, except those with skim milk, that used it in connection with corn, found it the best feed for young pigs and fattening hogs that they had ever used.

The question of hog cholera has been one that I have given attention. We have had several outbreaks of cholera, but none of which spread very far before being checked. Have always talked the sanitary methods of hog raising with every farmer, with but few exceptions, so that it is impossible for me to tell how many farmers I have talked this subject with. However, my records show 62 personal conferences where hog feeding and hog diseases were the reasons for the visit.

Meetings on hog cholera and swine raising have been held at the following points:

<i>Date,</i>	<i>Location.</i>	<i>Attendance.</i>
<i>1913.</i>		
Dec. 27,	Harpers, Columbia Twp.....	38
Dec. 29,	Buckskin, Barton Twp.....	34
<i>1914.</i>		
Jan. 9,	Owensville, Montgomery Twp....	300
Feb. 20,	White Oak, Columbia Twp.....	31
May 6,	Princeton, Patoka Twp.....	38
May 7,	Owensville, Montgomery Twp....	48
Total		489

On May 6, 7, 1914, Dr. Clark and Professor Schwab of Purdue addressed the farmers on hog cholera and hog raising. With the exception of one or two cases there has not been a case of sick hogs in the county that I have not been informed about, just as soon as one of the members of the township organization heard about the case, if the farmer himself did not directly report the case to me.

MISCELLANEOUS.

I have attended six teachers' township institutes and talked to teachers on the work of agricultural education in the schools. Agriculture is popular both with teachers and the students, and I have very often talked to the small district schools along some one agricultural subject. I have no record of many of the school visits.

Outside of the meetings mentioned in this report I have held sixteen meetings on various subjects such as tomatoes, farmers' round tables, etc., at which the attendance has been 263 people.

The number of office calls and farm visits recorded in the above report are 596. There have been ninety-six other calls and farm visits, making a total of 692 personal conferences.

The total number of people in attendance at meetings has been 5,942. Total number of people reached in county in meetings and personal conferences is 6,634.

In the performance of these duties I have traveled nearly 7,000 miles by automobile.

R. R. MARSHALL,
County Agent.

REPORT OF GRANT COUNTY.

Report of some of the work done during the year beginning July 1, 1913, and ending June 30, 1914, in Grant County: During the year we held 162 meetings with a total attendance of 16,622. One thousand five hundred and ninety-one persons called for advice and we visited 601 places, traveling 4,715 miles.

FIELD WORK.

We tried to do something in every phase of the work spoken of in the Stahl-Yarling Bill, Section 12. I helped in the organization of the farmers' institutes; spoke at every one, and assisted in giving an extra day's program at all but one institute. We helped to organize one new farmers' club and assisted those already organized in their work. We held demonstrations in cattle judging and milk testing at Matthews, Swayzee and South Marion. We conducted an alfalfa excursion of two days, a silo campaign and wheat campaign of the same length of time, also a potato scab and oat smut demonstration for two days, showing how seed could be treated. Several farmers treated their potatoes and oats.

We have demonstrated the scoring of poultry at several places and taught several how to caponize their cockerels. We helped organize a poultry association of sixty members and joined one already in running order. We held four meetings on hog cholera control, and with the State Veterinarian demonstrated vaccination to local veterinarians. We arranged for and held two orchard demonstrations; helped hold a two days' short course at Fairmount Academy.

CLUB ORGANIZATION.

We organized a boys' and girls' poultry club of sixty-five members, a boys' corn club of nineteen members and a 5-acre corn club of men of fourteen members. I raised the money for these clubs' prizes. I lectured at county teachers' institutes and township institutes, and visited country and town schools in the interest of agricultural education. During the winter I held an agricultural school each week on Monday evening for thirteen weeks. This school had an average attendance of eighty. We covered to a

County Agent Crane, Grant County, believes that the exhibition of the best products of the community will do much toward raising the standard of that community's production. Picture of one club's display at the "Grant County Fall Festival," October, 1914.

limited extent all the important topics in agriculture. We have held evening meetings at county schoolhouses, using lantern slides to present the important phases of agriculture. We induced one teacher to build a henhouse on the school ground and demonstrate the management of the laying hen. The experiment was very successful.

SUMMARY.

We have repeatedly lectured at county churches on moral and educational topics. As a result of this work, or from some cause, hog cholera is less virulent, fewer cases and more vaccination.

The acreage of alfalfa has doubled, more silos are being built. Three places have asked for night schools, office calls are being more frequent and the county agent work seems to be becoming more popular. Teachers come to my office every Saturday to consult me on agricultural work.

OTIS CRANE,
County Agent.

REPORT OF HENDRICKS COUNTY.

On entering the work of county agent in Hendricks County I found the first thing that confronted me was to get acquainted with the people, their methods, problems, general conditions, etc. Coming here as I did a perfect stranger, from a neighboring State, this proved to be no small task. I must say that I have found the people to be prosperous, energetic, progressive, open-minded and friendly. Of course the county is not without its knockers, but they are so much in the minority as not to deserve notice.

ORGANIZATION WORK.

My first work was to take up the matter of organization in the separate townships. The county is approximately 20 miles square and contains about 399 square miles. There are twelve townships and I found there were agricultural organizations in nine of these. These organizations were in a more or less thrifty condition and were maintained to carry on the annual farmers' institutes, and were attempting very little else. Other organizations have been made until now there is an organization in every township. In addition to this we have several community center meetings which promise some good results.

ALFALFA CAMPAIGN.

During the month of May we had a two-day campaign to study the alfalfa in the county. Farmers were invited to bring their autos filled with their neighbors and a tour of the county was made, visiting sixteen fields with a total of about 150 acres. On the first day the party consisted of some thirty machines, and a basket lunch was served at noon to 175 people. The second day we did not have as many people, but the enthusiasm was just as good and much interest was manifest. Since the alfalfa campaign was held much interest is being taken in the crop and I

am having many calls from farmers who want to try it. It is my opinion that September 1, 1915, will find more than 1,000 acres of alfalfa growing in this county.

This campaign brought men together from all parts of the county. Some of these were doubtful as to the possibilities of alfalfa in this country. Many new ideas were gotten and new acquaintances formed by these farmers. We found alfalfa growing on practically every type of soil to be found in the county. In one instance we visited a field that had at one time been a tile and brick yard and the soil had been removed to a depth of from 15 to 30 inches for the manufacture of brick and tile, and here found alfalfa growing with good success.

SUMMARY.

During the six months I have attended sixty-eight meetings, at which there was a total attendance of 5,758, or an average of 84.7 per meeting. I have had 161 office calls, visited 133 farms and traveled 2,321 miles.

I have undertaken some club work with the boys and girls of the county. I have organized four clubs, poultry, corn, sewing and baking, with a total of 460 members. There will be a contest held in each township, and the first, second and third prize winners in each township will enter the county contest to be held in the county seat. If the funds are raised the first prize in each case will be a trip to Purdue during Farmers' Week. Up to date only one township has raised any funds.

I feel that the work is progressing with satisfaction and the people are responding as well as might be expected with a new work.

A. W. ORR,
County Agent.

REPORT OF HENRY COUNTY.

When I took up my work in Henry County almost a year ago the item of greatest interest to our farmers was the wheat crop. In past years the yield had been small, so that many farmers were out of heart with the crop and would not sow, while others would not use it if they could get clover in any other way. Believing that if the crop is rightly cared for and the cultural conditions made right it could be made profitable, I set out to hold a series

of meetings whose aim was to carry to the farmers the principles set down in the foregoing and at the same time to meet my clients and get acquainted. One of these meetings was held in each township and the attendance and interest was fair. In the thirteen meetings we had an average attendance of twenty-one.

FERTILIZER VALUE.

Along with this precept on wheat we introduced a touch of the practical. We undertook to demonstrate the value of commercial fertilizer to the wheat crop. The standard test was used which is designed to show the need of the plant for certain elements. The results were very marked as there was a variation from the lowest unfertilized to the highest fertilized of almost 40 bushels, the plots having phosphorus giving much the best yields. The interest taken in these experiments all over the county was evidence that the work was appreciated.

SCHOOL WORK.

The next work that engaged our attention was the work the teachers were doing in the schools. I visited the schools as often as I could, helping the teachers to get at the subject from the right angle. In this connection boys' and girls' clubs were organized which took great interest in the plans for contest work. Some of these have lost their grip in the heat of summer but the majority of them are plodding along and will get much good out of the work.

ORCHARD WORK.

In the early spring we took up the subject of orchard pruning and spraying. Mr. Durham was with us one day, after which I took up the work myself and made a number of demonstrations, which were well attended. A great deal of interest was taken in this work and a great many trees pruned and sprayed that would otherwise not have been. In all, eight of these demonstrations were put on with an average attendance of thirty-five.

CORN PRODUCTION.

The fertilization of corn was taken up, and to demonstrate my recommendations along this line four plot tests to demonstrate the elements needed were put out. These are not far enough along yet to tell what they will teach, but from present indications the use of some commercial food will pay big.

SOIL IMPROVEMENT.

There is a great deal of badly run soil in the county, and to show what could be done with it and at the same time get some income from the land, a green manuring demonstration was installed. Corn and soybeans were contrasted in this work. Lime was used on both and check plots left to show its value. Part of each crop was also fertilized, and from present indications the beans will be a more profitable crop this year and will do the land good. It is the intention to follow the beans with clover.

Lime plots were also put out. The Muncie Stone and Lime Company furnished me with enough lime to put out a test in several parts of the county, and we hope for some interesting things from that work, as my observations lead me to believe that at least three-fourths of the county is slightly acid.

HORSE BREEDERS' ASSOCIATION.

The plans are under way to organize in the near future a horse breeders' association and also a cow testing association. The farmers are taking interest in this work and it promises some measure of success.

SUMMARY.

In addition to the above named projects, we have during the season conducted special campaigns on hog cholera and sanitation, alfalfa, silos, and the growing of more and better wheat. These have been well attended and much interest shown. The attendance was as follows:

Hog cholera, meetings held 8.....	77
Silos, meetings held 13.....	285
Alfalfa, meetings held 12.....	243
Wheat, eleven meetings.....	375

Throughout the year, I have attempted to organize farmers' associations at various points in the county. So far I have four good, strong clubs and hopes of several more. There does not seem to be any strong want in many sections and before we can organize we will have to create such a need. The success of other clubs is attracting attention and I feel that this phase of the work will have a steady growth.

E. C. RICHEY,
County Agent.

REPORT OF JASPER COUNTY.

During the year from July 1, 1913, to June 30, 1914, inclusive, the several and varied projects, including meetings, demonstrations, general farm visits, office calls, work with the boys and girls, etc., etc., are outlined below.

OUTLINE OF WORK.

Alfalfa in general has been the one subject of crops receiving the greatest amount of attention. No campaign was carried on, but much individual work, such as testing soil for acidity, methods and necessity of inoculation, and various methods of seeding have been discussed with individual farmers. Wheat production is at rather low ebb in this county, as is also horticulture and dairy production.

I am glad to say that hog cholera is not prevalent in this county, so it seemed advisable to conduct a campaign in a way of methods of control or prevention of same.

The silo, as was alfalfa, was given considerable attention with individual farmers. Seed testing was encouraged and to a considerable extent taken up in the schools of the county, especially the testing of corn.

SEED CORN SELECTION CAMPAIGN.

On September 23d and 24th a campaign was conducted encouraging the selection of seed corn from the field, instruction given as to type of ear and type of stalk as well as the most satisfactory methods of storing. There was a total of seven meetings in this campaign, with a total attendance of 170. Interest in general was very good. Meetings were held in the following townships: Hanging Grove, Milroy, Carpenter, Marion, Gillam, Wheatfield and Union, Wheatfield Township having the best attendance, with seventy-five.

Assistant State Leader Coleman from Purdue assisted in these meetings, giving concrete illustrations and demonstrations of the value of proper practice, and a considerable number of reports have come back to me of various farmers having selected their seed corn from the field who had never been known to do this work before.

During the month of November, twenty-four meetings were held, including one in each of the thirteen townships, and various

other ones in the different schools of the county. At these meetings there was a total attendance of 724. The interest in practically every case was good, the subject being the same as for the above demonstrations, seed corn, selection, and storing.

ALFALFA DISCUSSIONS.

During the month of December there was a total of twenty meetings, including one in each and every township, with others in schools, at which the subject of alfalfa was discussed.

In this discussion the subjects of liming, inoculating, seeding, and quality of hay as feed were discussed in some detail. At these twenty meetings there was a total attendance of 865. A fair degree of interest was shown, but although there are numerous illustrations and demonstrations to the effect that alfalfa can be grown in this county, there are many who are yet very skeptical regarding its adaptability.

FERTILIZERS.

During the month of January, at the regular township meetings and in the various schools, twenty meetings were held, at which there was a total attendance of 898. Fertilizer and fertilizing was the subject of discussion and at this series of meetings there was the greatest amount of interest shown. I advocated quite strongly the advisability of the farmers of the various communities getting together and buying the materials in a composite order in the form of raw goods and mixing them themselves and in two communities, namely, Marion Township and Gillam, this thing was done, and as near as we are able to figure, they saved between \$2,500 and \$3,000. There were many other farmers who bought their material in the form of muriate of potash and acid phosphate, mixing the two together in the proportion that they thought best for their individual needs, and I would roughly estimate that there was a saving brought about by this procedure in the county of about \$5,000. The goods were all of them purchased from local agents.

SOYBEANS AND COWPEAS.

During the month of February there was a total of twenty-four meetings, including the various township meetings, some work in schools, one institute meeting in Porter County and two in Laporte County. The subject in every case at these meetings was

soybeans and cowpeas. There was a total attendance of 1,564. The interest, however, was not as good as it had been in some of the other meetings, especially was that the case with the meetings held in this county. I attribute that to the fact that in general they are wholly unfamiliar with these crops in this locality. Largely through my recommendation there were many acres sown this year. I would estimate that there was between 300 and 400 acres each of soybeans and cowpeas planted in the county this year, most of which at the present time are looking very well.

OATS AND POTATO MEETINGS.

On February 24th and 25th we had planned a series of five demonstrations on the treatment of oats for smut and potatoes for scab. Professor Pipal from Purdue was here with me, but the roads were drifted so with snow that we were unable to get around, and as a result only two of these meetings were conducted—one in Rensselaer, with an attendance of twenty-four, and one in Wheatfield, with an attendance of seventy-two.

ADVISORY WORK.

The work during the spring months has been largely advisory work and work with the boys and girls in the boys' corn club and the girls' poultry club. On April 11th and 12th, Mr. Harper from Purdue, and with him County Superintendent Lamson and myself, conducted four meetings in the following named places: Gillam Township, Wheatfield Village, Remington and Rensselaer, at which the boys and girls of the county were urged to join in this club work. At these four meetings there was a total attendance of 280, of which 135 girls enrolled in the girls' poultry club and 96 boys in the boys' corn club. These I have followed during the latter months somewhat closely and in most cases they are all doing very good work.

Summary of work as follows:

Number of meetings conducted.....	119
Attendance at meetings.....	5,846
Number of office calls.....	649
Number of farm visits.....	252
Number of miles traveled.....	5,043

O. C. BARRETT,
County Agent.

REPORT OF LAKE COUNTY.

When I came to Lake County, January 31, 1914, there was a terrific snowstorm, which had blockaded the interurban, and delayed other traffic in general. Some of the main highways were not opened up for traffic until five weeks later. This made it somewhat inconvenient to commence work in a strange county.

DAIRY MEETINGS.

On March 5th a dairy demonstration meeting was held at William Newton's farm in the forenoon, and an inside meeting held in the assembly room of the court house in the afternoon. This was a very good dairy meeting, which was the preliminary to the reorganization of the two cow testing associations in this county. Having several two-day schedules with the different departments of Purdue, it became necessary for me to ask for outside help in the filling of the membership of these two associations. The Dairy Department sent a man here for the purpose, and we succeeded in getting these two associations straightened for another year.

OAT SMUT-POTATO SCAB CAMPAIGN.

An oat smut and potato scab campaign was carried on March 10-11, of which five meetings were held with an attendance of 179 people. Mr. F. J. Pipal was the Purdue speaker. He made a very good practical talk which did a lot of good.

FARM VISITS.

The week ending May 16th, the following report was made: In visiting one of the old run-down farms of this county, which is said to be the poorest in Lake County, which is in the swamp district, I found the following conditions: The soil was thin, rolling, and eroded on the upland. It lacked humus, physical properties, and limestone. In fact, it was very acid, while down along the dredge ditch, huge banks of peat and other debris had been dredged out of the ditch channel. Examination showed large quantities of marl. The advice given to the owner of the farm was to haul the dark humus, peaty soil, and the marl, upon the high, rolling land and apply to those thin spots. The fertilizer from the barnyard, as this man kept a dairy herd, with the use of legumes, can be used to build up this soil and thus make a profit-

able farm. This condition is not only true of his farm, but of adjacent farms on similar areas throughout the county. This information was given on April 12, 1914.

ORCHARD DEMONSTRATIONS.

April 14-15, C. B. Durham from Purdue was here for orchard demonstration work, but practically all the farmers were busy sowing oats. We made a general survey of the county on private and commercial farms; we also visited the truck gardening district, and in the evening of the first day held a meeting at Mr. Meyer's of Lowell. The second day a demonstration in pruning was held at Albert Foster's at Lowell in the afternoon. The attendance was small, consisting mostly of people living in town and retired farmers.

HOG CHOLERA SURVEY.

Dr. Clark from the Veterinary Department was here April 23-24, and we made a hog cholera survey of the county, finding that the disease was prevalent mostly in the southern part. We decided to hold a practical, educational demonstration meeting at John Brown's Son's, Shelby, Indiana, later on. This was held June 1st, at which time we had the local veterinarians of the county and Dr. Clark present, and vaccinated eighty-five head in a little over two hours' time. The meeting was a success and ended with good results.

COW TESTING ASSOCIATIONS.

The weekly report sent in May 2, 1914, says: The two cow testing associations of this county have the membership enrollment completed for another year's work. The Northwestern Association has been operating for some time and the Leroy commences work May 3d, at Charles Benjamin's. Mr. W. Q. Fitch from Purdue spent a week and one-half here helping to enroll the necessary membership. Unless something else turns up, there will be three or probably four herds doing the semi-official work. This is to be conducted by the interchanging of work of the two cow testers and the county agent.

CLUB WORK.

We have fifty-two boys and girls in the club work at present. There were a few more names, but they were withdrawn from one

school in particular because the parents objected to the children using so much ground and doing individual work.

On June 16th, Lake County succeeded in helping to send two ear loads of live stock to South Carolina for breeding purposes. Mr. Paul Calvin, government live stock expert of South Carolina, and Mr. Marett were the representatives from South Carolina, and with the assistance of the county agent looked up and found the necessary material in this locality.

On June 20th the LeRoy Cow Testing Association had a picnic, at which about 160 people attended, to see the results of one year's work in the cow testing association. Dorothy, the pure bred Holstein cow that had produced over 20,000 pounds of milk and a net profit of \$208, vs. Bridget, the cow that had produced 2,480 pounds of milk and made a net profit of \$12.65, were the principal objects of study during the day.

CITY MARKET.

This same day the Gary City Market opened, which enables the farmers or producers to bring anything that they might have on hand to the city for sale.

TESTING SEED CORN.

The test of seed corn was the subject taken up in the schools and at the local township meetings throughout the county. There were about twelve farmers making individual ear tests, but there are five farmers making variety tests.

There being but fifty-two acres of alfalfa, thirty-one of which had to be re-treated this spring, caused us to delay our alfalfa meetings until later on.

There had been 468 farm visits.

At the end of the year Lake County will have some data that will be of great value to the county and to the individuals who are at present engaged in different lines of work, which is a large field in this county.

S. J. CRAIG,
County Agent.

REPORT OF LAPORTE COUNTY.

The work of the county agent has been conducted much along the same lines as outlined in the last annual report, dividing the time about equally between the schools and the boys' and girls' contest work with the office, and giving direct consultation with the farmers. One hundred and four boys and girls entered the contest in growing the best corn and potatoes. The results were completed in a period covering this annual report. Forty-three of this number were awarded a free trip to the Farmers' Short Course at Purdue, with all expenses paid. We now have 850 entries in corn, potato, county fair and domestic science. This will make it possible for eighty-four to win the same trip with the same conditions this year as last year.

CORN CONTEST.

Consists in growing the largest number of bushels of corn from one acre at the least cost and the best written story as to how the crop was produced and as to the quality of the corn.

POTATO CONTEST.

Consists in growing the largest number of bushels of potatoes from one-eighth acre of ground, the quality of potatoes grown, the least cost and the best written story as to how the crop was produced.

COUNTY FAIR CONTESTS.

Consists in exhibiting one peck of the four main crops grown on the home farm, at the county fair.

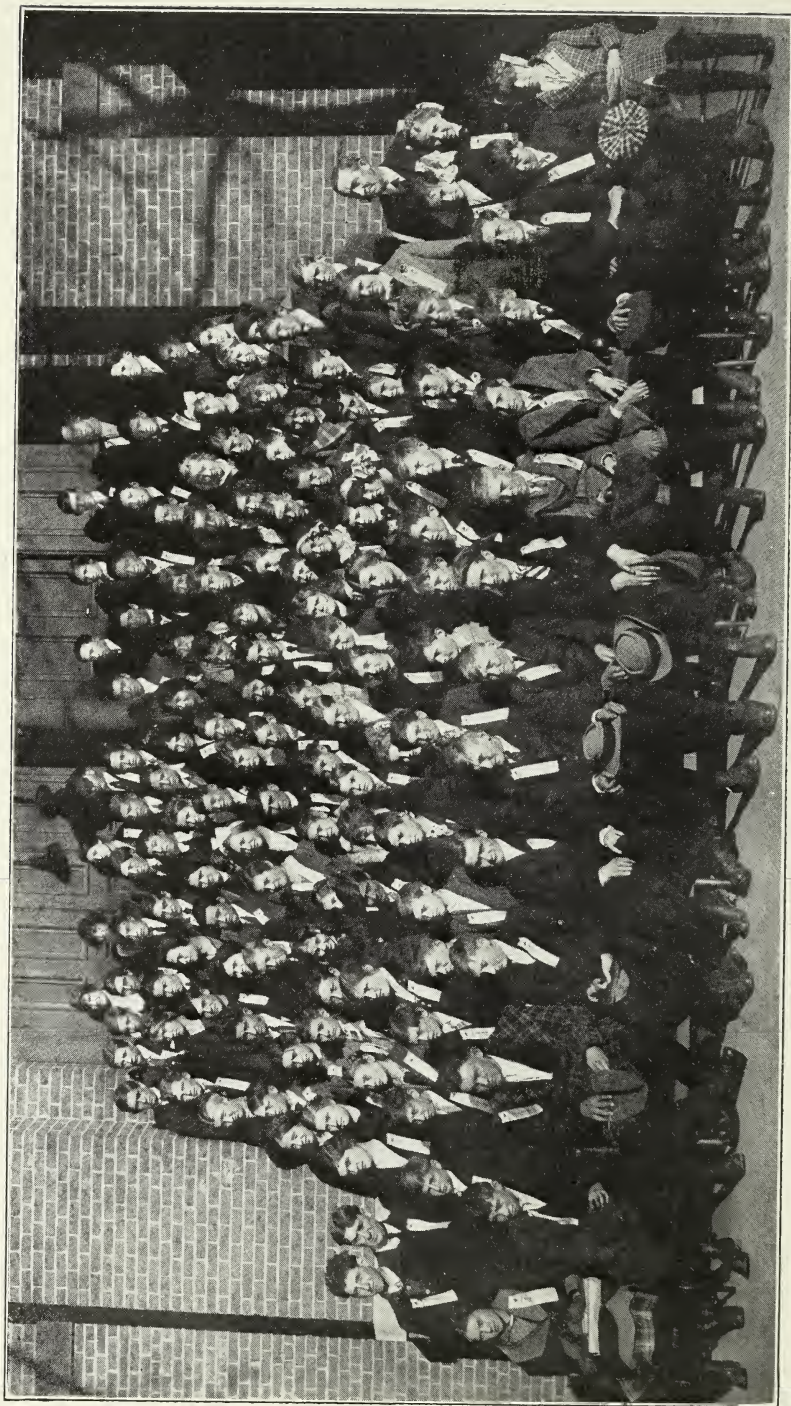

DOMESTIC SCIENCE CONTEST.

Consists in baking the best loaf of bread, canning the best can of tomatoes, the best sample of hand darning, the best hand-made apron and the best sample of patching.

The 104 contestants, who completed their work in November, were given a banquet at the Rumley Hotel with Congressman Barnhart and Purdue representatives as speakers.

SPECIAL BULLETINS.

Six special bulletins were issued in connection with County Superintendent Farnum during the school period, namely, corn selec-

170 Boys and Girls Completing Contest Work in Laporte County, 1914.

tion and corn shrinkage; census of live stock and special study of horses, hogs, cattle and sheep; the keeping of milk records and special study of cattle and poultry; soils, fertilizer and drainage; seeds and study of crop rotations and testing of seed corn and study of germination of many kinds of seeds. Purdue instructors assisted in giving special instruction to the schools as outlined by these bulletins.

County Agent L. B. Clore, Laporte County, *demonstrates* that lime is the one thing needed to convert some of his acid waste lands into luxuriant corn fields. Season 1913.

ALFALFA PRODUCTION.

The campaign that was started by issuing a special circular on alfalfa has produced wonderful results. The acreage has been tripled this year. This crop responds well with proper preparation. Many tons of limestone have been used with excellent results. Commercial fertilizer when properly used produced satisfactory results.

HOG CHOLERA WORK.

No disastrous epidemic of hog cholera, but Dr. Bailey of Stillwell, when it did exist, co-operated with Purdue and treated 400 head that were infected, saved 50 per cent and vaccinated 2,800 head, with splendid results.

CAMPAIGN WORK.

The county was thoroughly canvassed with the assistance of Purdue instructors on wheat production, selecting and storage of seed corn, oats and potato production.

A test of commercial fertilizer and the treatment of oats for smut was conducted on the County Poor Farm. A field of thirty-two acres of badly worn soil was divided. On twenty-four acres the seed was treated with formaldehyde and 200 pounds of 2-10-2 commercial fertilizer used and yielded forty-three bushels and twenty-four pounds. Of three acres no commercial fertilizer was used but the seed was treated for smut and yielded thirty-two bushels and eighteen pounds. On the remaining five acres of the field no commercial fertilizer was used, and no treatment for smut, and yielded eighteen bushels and twenty-four pounds. Accounts show that the average single drill row one rod in length when no treatment for smut was used contained 103 smut heads and ninety-two good heads. Scarcely any smut heads could be found when the seed was treated. The yield of wheat on the Homer Fitzpatrick farm was doubled by using limestone, commercial fertilizer and plowing under cowpeas.

L. B. CLORE,
County Agent.

REPORT OF LAWRENCE COUNTY.

August 1, 1913, to July 1, 1914.

ALFALFA CAMPAIGN.

In May we held a two days' alfalfa campaign. On the first day we had twenty-six autos carrying 110 people, while on the second day we had twenty-eight machines carrying 118 people. When the tour was completed we had about 1,000 acres of alfalfa in the county and now there are over 3,000 acres. In the two days we visited thirteen fields and inspected the alfalfa fields. At these meetings the culture and feeding value of alfalfa was thoroughly discussed.

SILO CAMPAIGN.

In July we had a two days' silo campaign. At that time there were 109 silos in the county. At the present time we have over one hundred and fifty.

WHEAT MEETINGS.

During August of 1913 we held three days of wheat picnics in different parts of the county that were well attended and a social time enjoyed by all.

This year we finished up a series of wheat experiments, testing out the different varieties. The results are as follows:

<i>Variety.</i>	<i>Yield.</i>
Rudy	26.4 bushels.
Dawsons Golden Chaff.....	22.0 bushels.
Egyptian Amber	22.4 bushels.
Michigan Amber	34.4 bushels.
Poole	39.2 bushels.
College Hybrid No. 128 (a club wheat from Wash. State).....	21.6 bushels.

This wheat was grown on sour upland soil in poor fertility. Wheat was sown on October 1st. Sowed 196 pounds of commercial fertilizer per acre containing the following substances: 1.8 per cent. nitrogen, 25 per cent. phosphoric acid, 3 per cent. potash. Plats, one-twelfth acre in size.

SEED CORN MEETINGS.

In October, 1913, we held two days' seed corn meetings with an attendance of over 300 farmers who were very much interested in the selection and care of their seed corn. As a result of these meetings about 200 bushels of first-class seed corn was ordered. Thirty-five farmers in the county for the first time set aside seed corn plats and gave it the best care possible and also detasseled, which was an unknown operation previously in Lawrence County.

CLUB WORK.

We have held two boys' corn contests, getting a yield of 109 bushels per acre when the average yield of our county is less than thirty bushels. The representative from our county won the state contest last year.

BETTER FARMING ASSOCIATIONS.

Five better farming associations that met monthly were organized in the county and good results were obtained through the meetings. This year we will make a special study at our meetings of farm management, while last year it dealt with animals and crops.

ORCHARD DEMONSTRATIONS.

In the spring we held three days of orchard demonstrations. Each meeting lasted for one day. During the morning pruning was demonstrated and explained. In the afternoon there was a demonstration of spraying with an explanation of methods. Nozzles were discussed, also pests and scales.

In January we held five township institutes, with a total attendance of 1,300. I assisted Purdue University in getting out cowpea, soybean and clover experiments.

C. J. JONES.

County Agent.

REPORT OF MADISON COUNTY.

October 1, 1913, to June 30, 1914.

The first few weeks was spent in familiarizing myself with conditions here. I called upon the trustees of each township, and in many instances the trustee went with me for a day, going over the townships and acquainting me with the best farmers and conditions in his township.

The lively interest in the work was manifested from the start. Office calls were numerous and many calls for farm visits were indexed on cards in the office.

TOWNSHIP ORGANIZATIONS.

The work of organizing farmers' township and co-operative clubs was started soon after I reached the county. Through the

township trustees I had little difficulty in singling out the leaders in each community. After calling on the man of this stamp in each township and explaining plans for organization and getting the right man on the right job we now have the following live organizations here in Madison County:

1. Union Township Farmers' Club.
2. Anderson Township Farmers' Club.
3. LaFayette Township Better Farming Club.
4. Monroe Township Community Improvement Club.
5. Fall Creek Township Farmers' Institute.
6. Adams Township Farmers' Institute.
7. Central County Farmers' Institute.
8. North Madison County Practical Farmers' Club.
9. Stony Creek Farmers' Institute.
10. Boone and Van Buren Township Farmers' Institute.
11. Richland Township Farmers' Club.
12. County Five Acre Corn contest.
13. Adams Township Boys' Pig Club.
14. Van Buren Township Boys' Corn Club.
15. Pendleton Boys' Corn Club.

All of these clubs are keeping up a lively interest, and much good toward strengthening the county agent work in this county has resulted from these organizations. During the fall I found hog cholera raging in certain localities. By visiting these seats of infection and advising sanitary quarantine and precaution and inducing men to vaccinate, the disease was checked and prevented from spreading to other parts of the county. Over 1,200 head of hogs were successfully vaccinated upon my suggestion.

Five seed corn demonstrations were held, Mr. Maurice Douglas, representative from Purdue Extension Department, assisting, during the fore part of October, with an enthusiastic attendance of over 200 men. As a result of these meetings over 1,200 acres were planted from field selected and tested seed corn.

SHOWS AND FAIRS.

During the fall the following shows and fairs were held, being assisted by the County Agent:

- Lapel Street Fair Corn and Horse Show.
- Elwood Merchants' Horse and Corn Show.
- Summitville Corn, Fruit and Horse Show.

Anderson Banking Company's Corn Show.
 Pendleton Banking Company's Corn Show.
 The Alexandria Corn, Fruit and Stock Show.

All of these fairs were first class from an educational standpoint, the merchants and bankers contributing liberally with premiums and entertainments. There were days set apart for talks by experts from the State Experiment Station and the educational features were emphasized.

Corn furnishes an interesting subject for the study of Madison County's schools.

INSTITUTES AND SHORT COURSES.

Madison County showed a progressive tendency last winter toward better agriculture in the interest and attendance at the farmers' institutes and short courses. The following shows places and attendance of meetings:

	<i>Attendance.</i>
Van Buren Township Institute, 2 days....	1,000
Adams Township Institute, 1 day.....	800
Pipe Creek, Duck Creek and Monroe Township, 1 day.....	110
Stony Creek Farmers' Institute, 1 day....	500
Central County Farmers' Institute, 1 day..	300
Total.....	2,710

The old-time impression farmers had that farmers' institutes were impractical affairs has been dispelled by the selection of good practical speakers by the Agricultural School. It was at these institutes that I met people who received suggestions and came to me afterwards for "follow up work."

During the winter two courses were held by Purdue in co-operation with the farmers and business men, one at Pendleton and one at Elwood. The instruction received by farmers at these short courses on all phases of farm activities were appreciated by the interested attendance. The total number in attendance at these two short courses was 3,835. Later, in conjunction with the Central County Farmers' Institute, we held a two days home talent short course at the Anderson high school. Work was given in live stock feeding and breeding, poultry management, potato growing, soil fertility and crop work, seed corn judging, farm mechanics, seed testing, domestic science, and many other subjects. The weather was severe and the attendance was not as large as we had expected. The total attendance for the two days was 678.

SPECIAL MEETINGS.

During the winter special meetings were held in various parts of the county with a representative of the Purdue University to do the talking. We held meetings on treatment of oats, wheat and potatoes with formaldehyde, orchard demonstrations, talk on boys and girls' farm clubs, seed corn testing campaigns, hog cholera and swine management, live stock feeding and breeding and farm management, etc. The schoolhouse meetings were well attended and met every two weeks. The county agent had night meetings where short talks were made by farmers and himself, after which practical discussions followed.

Demonstrations were held on treatment of oats for smut, pruning and spraying the farm orchards. Babcock testing and many other practical farm demonstrations were carried on.

This county has five daily papers, which are all enthusiastic supporters of the work. The county agent contributes articles on timely subjects for these papers. One paper has featured a farm page every Saturday, which has been highly profitable in molding public sentiment and has aided materially in pushing the work. Many queries from farmers are answered through this farm page, which is illustrated from photographs furnished by the county agent. The cost of the cuts and typing of this page are met by the

advertisements by merchants and dealers in farm necessities. This point was suggested by the county agent.

ALFALFA CAMPAIGN.

On the second and third of June the county agent was assisted in an automobile alfalfa tour by Assistant State Leader T. A. Coleman and Mr. McCoy, county agent of Decatur County. In the two days we visited twenty-two fields of alfalfa and reached a total of 162 acres of alfalfa. As a result of this tour we believe 800 acres of alfalfa will be sown here this season.

SUMMARY.

In summarizing the work from October 1, 1913, to June 30, 1914, we have the following to show:

1. Meetings held	127
2. Attendance	17,229
3. Office calls	1,090
4. Farm visits	468
5. Miles traveled	4,388
6. Farmers conducting demonstrations..	76
7. Acres planted to field selected seed corn	1,200
8. Farmers testing seed corn for germination	430
9. Acres of corn planted with tested seed.....	3,600
10. Farmers growing corn in contest.....	65
11. Acres of corn in contest.....	800
12. Farms treated seed oats for smut.....	20
13. Acres sown with treated seed.....	600
14. Farmers growing oats for seed.....	3
15. Acres of oats grown for seed.....	180
16. Farms using hill selected seed potatoes	12
17. Farms treating potatoes for scab.....	12
18. Farms growing potatoes in co-operation.....	12
19. Acres of potatoes grown.....	120
20. Farmers co-operating with clover....	3
21. Farms growing alfalfa.....	56
22. Acres of alfalfa grown.....	520
23. Orchards cared for in whole or in part	8

SUMMARY—Continued.

24. Cows tested by county agent.....	50
25. Hogs treated for cholera upon advice of county agent.....	1,200
26. Tons of commercial fertilizer used....	50
27. Tons of home-mixed fertilizer used...	10
28. Tons of lime used.....	250
29. Acres of clover grown.....	2,260
30. Acres of soy beans grown.....	60
31. Acres of cow peas grown.....	10
32. Farmers assisted with farm buildings	28
33. Farmers assisted with drainage.....	12
34. Seed sold for farmers:	
Bushels seed corn @\$2.50.....	120
Bushels of soy beans @\$2.50.....	165
Bushels of clover seed.....	120
Seed potatoes @90c.....	850
35. Live stock sold—total.....	\$2,500
36. Farmers helped with fertilizer prob- lems.....	96
37. Farms tested for acidity.....	50
38. Silos bought	40
39. Pure bred stock bought (No. animals)	20

Average for 39 weeks: Meetings held, 3.25; attendance, 135.80; office calls, 28; farm visits, 12; miles traveled, 112.

Many projects are planned following June 30, 1914, such as silos campaign, wheat production campaign, county fairs, seed corn demonstrations, wheat fertilizer experiments, alfalfa experiments, soy beans demonstrations, hog cholera crusades, results of corn and pig club contests, organizing live stock and fruit growing associations, farm management surveys, and a county farm bureau.

The work for this year has been highly gratifying, the county agent is receiving the best of support from farmers, school teachers, business men and bankers, the press and from the County Board of Education.

WILLIAM R. BUTLER,
County Agent.

REPORT OF MARION COUNTY.

In the summer of 1913 a movement was started in Marion County toward securing an agricultural agent under the provisions of the Vocational Education Law. The Marion County Agricultural and Horticultural Society, the Indianapolis Chamber of Commerce, banks, business men, and farmers all co-operated in raising the necessary fund. The present incumbent was chosen as agent and began work November 1, 1913.

GENERAL PLAN.

It was the wish of the Board of Education, expressed at the outset, that the county agent do as much work as possible in the public schools. In Marion County the schools are well consolidated and the school term is rather longer than in other rural communities, both of which factors are favorable to efficient teaching of agriculture. In order that the county agent might work to advantage with the County Superintendent of Schools, he asked for and was granted the use of Room 18, in the court house, this room being a part of the suite of the county superintendent. This has proved to be a very desirable arrangement. The county agent aims to keep in touch at all times with the Board of Education by attending all meetings and by consulting with the various members. Saturday is the official office day.

PRESENT SITUATION.

Marion County presents some peculiar agricultural problems; these problems became apparent at the outset and will doubtless always prove limiting factors in the work of the county agent. Chief of these problems is the diversity of farming types and systems. No particular system or systems of farming predominate. For this reason it is difficult to obtain any sort of organization having for its purpose the standardization of products. If one farmer in a community is raising truck, another is dairying, another is producing market hogs, another is orcharding, and another is raising cash crops for market, it is a hard proposition to make these men see that they have anything in common. This is much the situation that exists in Marion County.

Another problem is the means by which the overshadowing of the county by Indianapolis can be overcome. City affairs and amusements attract the people of the country and very little of

community interest exists. It is not necessary for the farmers of this county to seek their pleasures in their own communities. The meetings arranged by the county agent are only a few among hundreds of similar meetings having for their purpose education. The theatre, the city churches, the parks and other agencies kill all interest in local neighborhood matter.

Still another problem is how to reach the immense population of the county. One township alone, Wayne, has a population of over twenty thousand. The county districts are filled with commuters, who invariably farm on a small scale. It is the hope of the county agent that these people can be reached through special campaigns; making farm visits in this county is like hunting for a needle in a haystack.

In general, the special campaign is proving more effective in all ways than the other methods of reaching the public. Community clubs soon lag because of lack of community interest. But a special campaign well advertised seems to make a strong appeal; it is more in line with city propaganda methods. Campaigns for good roads, for the use of good seed corn, for improving the soil, and for alfalfa have been made with good results. The automobile campaign is no doubt one of the most effective methods ever devised for reaching farmers, as it combines business and pleasure and affords a means for farmers seeing a wide variety of methods.

BOYS' AND GIRLS' INDUSTRIAL CONTEST.

For the boys of Marion County a one-acre corn growing contest is being held this year. For the girls a cooking and sewing contest is under way. Forty-five boys and forty-eight girls are entered in these contests, and from present indications all of the contestants will complete their work. The Indianapolis Chamber of Commerce and the Board of Trade have jointly donated \$275 toward defraying the expenses of the contests. The township winners in the corn-growing contest will be sent to Purdue for a week of instruction. Further than this the prize list has not been announced. It has been the aim to encourage the young people to compete for the sake of learning rather than in the expectation of winning a prize.

ORGANIZATION OF COMMUNITY CLUBS.

In order to get the work before as many persons as possible community clubs have been organized where this was deemed advisable. Clubs were organized at Castleton, Oaklandon, Southport,

West Newton and Clermont. The clubs meet once a month, except during the hot months, for the discussion of agricultural subjects. The county agent has been present at all club meetings, unless otherwise engaged. Experience so far indicates that the success of community clubs depends largely on the community. They are very successful in some communities and absolute failures in others. This is due to the presence or absence of leaders who will make an effort to keep up interest by arranging good programs and getting a good attendance.

AGRICULTURE IN THE SCHOOLS.

Excellent work was done in most of the Marion County schools during the year along agricultural lines. In some of the small district schools the work in agriculture was neglected, a number of the lady teachers in such schools having neither the training nor the inclination to teach the subject well. But in all of the high schools and in the consolidated schools remarkably practical work was done. At Castleton, Acton, Wanamaker, Southport, Cumberland, Ben Davis, West Newton, Valley Mills and New Augusta such work was undertaken as testing soil for acidity, testing milk and cream for butter-fat content, germinating seeds, and live stock judging. A great deal of such work was done for farmers of the neighborhood in which the school is located. The Oaklandon school, in addition to the lines of work mentioned, did valuable work in pot-culture tests with plants. At the Valley Mills school a practical system of farm accounting devised by Superintendent Brandenburg was used throughout the year, data being secured from farms of the neighborhood. The county agent is endeavoring to strengthen the relationship between the school and the home by having the pupils do practical work that will not only interest their parents but that will be of some real value. A number of teachers' institutes were attended and advice was given relative to suitable methods for teaching agriculture.

FARMERS' INSTITUTES

During the season of farmers' institutes the county agent was kept busy giving talks, judging products, etc. The institutes were well attended and much interest was taken in the discussions. The county organization has been so perfected that all parts of the county will be reached by an institute the coming winter. The county agent has been appointed advertising manager for all of the institutes and expects to give them wide publicity.

GOOD ROADS CAMPAIGN.

During the week of April 20-25 a good roads campaign was undertaken in co-operation with the Indianapolis Chamber of Commerce. M. E. Eldridge, of the Office of Public Roads, Washington, D. C., was secured for four days. Road surveys were made in all parts of the county. Meetings were held at Broad Ripple, New Bethel, Cumberland, and Valley Mills. The county highway superintendent and his supervisors were present at a noon meeting at the Chamber of Commerce. In all six meetings were held with a total attendance of 500. Mr. Eldridge presented his subject in a very graphic and forceful manner. It is interesting to note that a considerable improvement has been made on the roads since this campaign.

SEED CORN CAMPAIGN.

An unorganized campaign for the use of good seed corn was made intermittently throughout the winter and early spring. From the large amount of good seed corn purchased there is no doubt that this campaign was extremely beneficial. The growing of a large type of white corn such as Johnson County White Dent has been discouraged, as it will not mature. There are very few if any acres of white corn now growing in the county. Statements from elevator men read at meetings proved beyond a doubt that white corn is not desirable for local conditions. The growing of better corn will be strongly urged at all times.

SOIL IMPROVEMENT CAMPAIGN.

The county agent has waged a constant campaign for soil improvement. The soil types found in the county are such that fertility is soon exhausted by improper methods. Very few farms of the county are maintaining the fertility. The growing and turning under of more legumes and the judicious use of commercial fertilizers has been incessantly advocated. Liming has been recommended in some instances where a test showed the soil to be acid.

FARM VISITS.

Since beginning work November 1, 1913, 225 farms have been visited. In every instance the writer was treated courteously. Just how much good was accomplished can never be definitely known. It is known, however, that in many instances where a farmer wanted specific information and received it he straightway

proceeded to make use of what he had learned. The value of farm visits, however, unless for a specific purpose, is likely to be over-estimated.

HOG CHOLERA CONTROL.

April 28-29 were spent with Dr. D. B. Clark, of Purdue Experiment Station, in visiting farms where hog cholera was suspected and in holding meetings for the discussion of the disease. Six farms were visited and two meetings were held, with a total attendance of 156; these meetings were held at Oaklandon and Glenn's Valley. At various other meetings the county agent has discussed this subject, insisting on good feeding methods and on immunization. Few cases of cholera have been reported.

SPRAYING DEMONSTRATION.

Assisted by C. B. Durham, of Purdue Experiment Station, the county agent held a spraying demonstration on the farm of J. J. Milhous, at Valley Mills, May 7. Owing to the busy season the attendance was small, only seventeen persons being present. Those in attendance, however, were all commercial orchardists and were greatly interested in the demonstration.

TOMATO CROP IMPROVEMENT.

Work toward improving the tomato crop has been carried on throughout the winter and summer. One meeting was held at Acton, February 7th, at which C. C. Osborn, of Irvington, and the writer, explained to the growers of the Acton Canning Company the best methods for raising the crop. Growers have been visited from time to time and newspaper articles have been written dealing with the subject.

CHINCH BUG CONTROL.

In co-operation with the State Entomologist measures toward the control of the chinch-bug have been taken during the summer. Instructions were given and carried out on the farms of A. J. Jones, Valley Mills; George Hardin, Ben Davis; Sterling R. Holt, Ben Davis, and W. A. Blessing, Ben Davis. Newspaper articles dealing with the control of the pest have been published. This line of work will be continued this fall when the insects are in their hibernating places.

OFFICE CALLS.

Since November 1st, when the work was begun, 245 persons have called at the office of the county agent. Practically all of these calls were for specific information. It is to be presumed that considerable good has been derived from this source.

GENERAL SUMMARY.

In all eighty-five meetings have been held since November 1, 1913, with a total attendance of 5,783. There have been 245 office calls and 225 farm visits. This work has necessitated the traveling of 3,530 miles.

H. J. STEVENS,
County Agent.

REPORT OF MONTGOMERY COUNTY.

ALFALFA CAMPAIGN.

A continued campaign to encourage the growing of more alfalfa in Montgomery County has been one of the principal lines of work of the county agent during the year. Assistance was offered all farmers in the matter of selecting the site for the alfalfa field, and advice offered regarding the preparation of the seedbed, method and time of seeding, use of fertilizers, lime, inoculation, etc. Twenty-two farmers followed the directions of the county agent in whole or in part in seeding new fields of alfalfa last fall. Of this number there was no complete failure and nineteen of the twenty-two secured good stands. In connection with the seeding of this alfalfa four car loads of finely ground limestone were used.

On May 28th and 29th, a two-day automobile tour was conducted in the county for the purpose of inspecting and studying the alfalfa fields. A total of 170 men were present on this tour. Sixteen alfalfa fields were visited and four meetings held, with an attendance of 220 persons. Professor M. L. Fisher of Purdue University and Maurice Douglas of Flat Rock, Indiana, were present and assisted in this tour.

ORGANIZATION OF COMMITTEES FOR THE CONTROL AND
ERADICATION OF HOG CHOLERA.

During the summer of 1913 thirteen committees were organized for the purpose of co-operating with the local station of the Bureau

of Animal Industry of the United States Department of Agriculture in an endeavor to control and eradicate hog cholera from Montgomery County. The county was so organized that every division of land two miles square has a representative on one of the committees. These committees are continuing active and are rendering valuable service through their co-operation.

SPECIAL OATS AND POTATO MEETINGS.

Five special meetings for the purpose of discussing oats and potato growing were held on February 3d and 4th, with a total attendance of 276. The Purdue Experiment Station was represented at these meetings by Mr. Pipal of the Botany Department, who gave instructions for the control of oats smut and potato scab.

HORTICULTURAL MEETINGS.

Assisted by Mr. C. B. Durham of the Horticultural Department of the Purdue Experiment Station, three horticultural meetings were held March 13th and 14th. Three hundred and two persons were in attendance at these meetings. During the spring months many requests for information regarding the spraying of fruit trees were received.

ASSISTANCE IN TEACHING AGRICULTURE.

During the winter months assistance was given many of the teachers in teaching agriculture. Three teachers' institutes were attended and instructions given in the teaching of elementary agriculture. Thirty-two school visits were made and individual assistance given the teachers. During March a circular giving instructions for testing seed corn in the rural schools was published and distributed in the schools. Practically all the schools were induced to do some work in testing seed corn. Three schools reported 980 ears of corn tested for their farmer patrons.

BOYS' PROJECT WORK.

In co-operation with the agriculture teachers, five high school boys were enlisted to conduct demonstrations with soybeans and cowpeas. These boys are each growing three varieties of soybeans and one variety of cowpeas in comparison and will report results to their teachers this fall. The educational value of this work was the only inducement offered these boys in getting them to undertake it.

State Leader G. I. Christie and County Agent R. A. Chitty lead the procession in the first Alfalfa Automobile Campaign, May, 1913.

This Montgomery County boy and his grandfather are very much interested in Prof. Christie's explanation of the use of nodules on the roots of the alfalfa. "Youth's enthusiasm, age's experience and the teacher's knowledge make a strong team in Rural Betterment." Snap shot taken while on first Alfalfa Campaign, May 28 and 29, 1913.

County Agent R. A. Chitty, Montgomery County, demonstrates how to treat wheat with formalin to eradicate smut. After which he *stands ready* to answer any question relative to the case.

(Picture 2.) Picture taken at the "All Day Farmers' Picnic" at John Oldshue's home near Waveland, August, 1914.

MEETINGS AND FARM AND OFFICE CALLS.

A total of twenty-nine meetings with an aggregate attendance of 1,881 persons were held during the year.

Three hundred and ninety-two farm calls and 691 office calls have been recorded during the year, covering all the various phases of agriculture.

R. A. CHITTY,
County Agent.

REPORT OF PARKE COUNTY.

In reporting the work of this office for the past year an attempt is made to detail the special projects briefly so that a general survey of the work may be had.

Our efforts in this county have been to wipe out a serious plague of hog cholera that was existing at the time the work was started; to stimulate an interest in better seed; to cause a better understanding of the need of conserving soil fertility; to increase the live stock industry and encourage the adoption of high producing crops. The county is well adapted to live stock production, dairying, fruit growing and general farming. The major portion of our soil is the Knox silt loam, with a long strip of Wabash silt loam extending along the Wabash river bottoms; small areas of Carrington silt loam, Knox sand, and meadow land are found in various parts of the county. The great per cent. of our land is sour and is in need of lime and also lacks a sufficient amount of organic matter, therefore the entire plan of work has been made to bring about an improvement in the above lines.

HOG CHOLERA CONTROL.

This work was the continuation of the work started in the spring of 1913. The most serious outbreaks of the disease occurred in the northern half of the county, including the farms around Rockville, and the disease raged until fall. The vaccination work was highly successful and the majority of the farmers became convinced of its value; but the work was delayed owing to our inability to get serum.

Every effort was made to get control of the disease, meetings were held, newspaper articles were published; the farmers were urged to keep pigeons and dogs away from their farms; to take sanitary precautions and the feeding of the diseased herds was given

attention. Purdue serum gave excellent results and the co-operation given us by Dr. Craig was effective and valuable. I am pleased to report that the farmers who vaccinated their herds and cared for them properly were pleased with the results and the disease was under control by February with no cases reported after March. As a rule the farmers will not clean the hog lots up thoroughly and this will be partially responsible for future outbreaks in the county.

Vaccination work done by our local veterinarians saved for the farmers at least 3,000 head of hogs and put the disease under control, and the best of all is that the greater part of the farmers appreciate the value of vaccination and the proper care of the infected herds.

AUTO DAIRY CAMPAIGN.

The statistics of Parke County revealed the fact that we had less than 3,500 cows in this county and the average yield was low, therefore a campaign was conducted to encourage herd improvement and better feeding.

Meetings were held at the farms of a number of our dairymen, July 28th to August 2d. Lectures were given by Mr. Garver and Mr. Sylvester of Purdue, and following the talks an auto tour was made to places of interest in the neighborhood where the people could see improved conditions and special features in the way of equipment. The latest statistics show that there are now 4,231 cows, an increase of 871, with an increase in the production of milk amounting to \$63,478.00 over the previous report, and part of this may have been due to the interest shown in the dairy meetings.

SEED CORN CAMPAIGN.

Owing to the short corn crop, resulting from the severe drought during the summer of 1913, much concern was felt regarding the seed corn for the 1914 crop. A seed corn campaign was planned and the Agricultural Extension Department furnished Mr. Prigg to assist in the work. The importance of field selection was emphasized, the characteristics of good seed corn explained and field trips were made to bring out the fundamental points. Mr. Prigg's talks were clear and to the point and his assistance was a valuable contribution to the success of the campaign. Ten meetings were held, with an attendance of 314. The week of October 6th was selected as seed corn week for Parke County, circulars showing the desirable type of corn to select were mailed to the farmers, newspaper articles were published in the local papers and a "follow up" post-

al card was mailed in the spring urging the testing of seed corn and showing the approved type of ear, kernel and tester, with details regarding the various points. Many farmers selected their seed from the field for the first time and were well pleased with the results.

HORSE IMPROVEMENT CAMPAIGN.

During the last twenty-five years the draft horses in this county have suffered from the infusion of trotting blood. Believing that the heavy horse would be more profitable to our farmers, and realizing that a great improvement could be accomplished by proper feeding and breeding, a series of meetings were held throughout the county to interest the farmers in the work. Prof. D. O. Thompson of Purdue visited the county and a great interest was manifested. Seven meetings were held with a total attendance of 499. The points taken were draft horse production, feeding, care and management of the farm horse.

THE FARMERS' SHORT COURSE.

The Better Farming Association of Parke County decided to obtain the Purdue Short Course for December 11th, 12th and 13th, and this proved to be a very interesting course of instruction for our farmers and it had an average attendance of 541 daily. A Home Economics Society was formed by the ladies who attended the domestic science classes and now has a membership of over 100 ladies. The work given in live stock, soils and crops, poultry and horticulture was interesting and valuable.

ALFALFA CAMPAIGN, MAY 26TH, 27TH, 28TH.

Parke County has thousands of acres of land which is unusually well adapted to the growing of alfalfa, and since it is a crop possessing so many valuable features, it was desired to stimulate an interest in the growth and management of the crop. More alfalfa means more live stock, one of the fundamental problems of the work in this county; therefore a campaign was planned, and Professor Wianke and Maurice Douglas were furnished us by the Agricultural Extension Department to assist in the work. Ten field meetings were planned on farms growing alfalfa in different parts of the county and one hour was allotted to each meeting in which the culture of the plant was discussed and the field was examined for inoculation, soil conditions were studied, time for cutting, methods

of handling the crop, its value as a feed and profitable ways of using the crop were discussed. The time of the meetings was exactly the time for cutting the first crop and the farmers had the valuable opportunity of seeing the crowns of the plants with the little shoots as they should be at cutting time.

The interest manifested by the farmers was highly gratifying and will result in increasing our acreage of alfalfa from 100 acres to more than 700 acres this fall. Envelopes containing strips of blue litmus paper and printed instructions regarding its use were distributed among those who attended so that they could make a test of their soil for acidity.

County Agent H. J. Reed, Parke County, shows his farmers just how to prune and care for their orchards. Work done in early spring of 1914.

Many farmers attended the meetings in automobiles and accompanied the party the entire day, and in this way many became acquainted with the management and habits of the crop under different conditions; but each meeting was made a complete unit owing to the fact that it was a very busy time for the farmers and it would have been impossible for them to have spent a day on the trip. The work of Professor Wiancke and Mr. Douglas was exceptionally good. Attendance, 361.

COMMUNITY CLUBS.

This office feels that the establishment of community clubs throughout the county is essential for the improvement of commu-

nity and social conditions, and many clubs are being organized. At present there are eight and many more are planned for next fall. The improvement of the community must come from within itself, and the rural agricultural club is one of the best means to use in bringing this about.

Programs are arranged by their own committee and an unusual interest in the work is displayed. This office provides stereopticon lectures for them occasionally and meets with them as often as it is convenient. These clubs usually meet at a schoolhouse in their district and in this way the community and the school are brought together, a feature which is certain to bring about a greater interest in the schools.

DEMONSTRATION PLOTS.

Demonstration plots are being conducted in different parts of the county, using such crops as alfalfa, soybeans, cowpeas and in one case crimson clover for the work. One demonstration orchard is being conducted with the prospect of having two more for next season. This little orchard consists of twenty-seven Ben Davis trees and was pruned and sprayed under the direction of this office and yielded a net profit of \$104 the first season.

NEWSPAPER WORK.

This office has been furnishing seasonal articles to the local newspapers under the heading of "Better Farming Notes," and in this way it is possible to reach a large number of people on subjects of interest. The papers here have been very generous and have given our meetings publicity which has helped in making them successful.

BOYS' CORN CLUB.

Through the co-operation of the schools we are conducting a boys' corn club this season and have about fifty prospective farmers enrolled between the ages of 10 and 18. The work of these clubs is known all over the county.

FARM VISITS.

Visits are made to the farms when a request is made for the same and the problems to be dealt with are those of farm management, soils, fertilizers, varieties, drainage, building arrangements, feeds and feeding, disease control, etc. Every effort is made to be thoroughly practical in all of the work and when there is doubt on a subject it is referred to the authorities at Purdue.

FARMERS' INSTITUTES.

This office has tried to co-operate with all of the Farmers' Institutes in the county and I have made addresses on farm topics at all the institutes and also at the local Chautauqua.

SUMMARY OF YEAR'S WORK.

General meetings held 71.....	attendance 3,590
Farmers' Institutes and Chau-	
tauqua, 31	attendance 7,321
Farms visited	342
Office calls	769

I consider the work successful for the last year. Considerable time was spent in trying to assist the County Superintendent of Schools in establishing the agricultural work in the schools over the county and we are planning to improve this for next season. The general attitude of the farmers with whom I have had contact has been pleasant and I am hoping that greater progress may be made for the next year.

H. J. REED,
County Agent.

REPORT OF PORTER COUNTY.

From August 1, 1913, to June 30, 1914.

When the county agent opened his office here in August, 1913, there seemed to be a general apathy toward the work by all but a comparatively few of the farmers of the county. At the present time interest in the movement is quite general except in two or three townships. At first there was no local organization of farmers of any sort through which the county agent could work. At present there is an organization of The Better Farming Association in the county, with branch organizations in all townships, fairly active in nine of the twelve townships, and numbering about 200 members. So far the meetings of the association have been mostly in the nature of community meetings, with varied programs, usually including papers by one or more of the members and a talk by the county agent.

FIELD CAMPAIGNS.

Seed Corn Campaign, September 17, 18, 19:

Mr. Martindale, of Purdue, assisting. Eleven meetings, total attendance 345. A good number were influenced through these talks to adopt better methods of selecting and handling seed corn.

Orchard Demonstrations, October 11, 13, 14:

Mr. Odell, of Purdue, assisting. Three meetings, total attendance about 230. As a result of these demonstrations not less than 25 orchards have been sprayed this year and three power sprayers, the first in the county, have been purchased.

Campaign on Treatment of Seed Oats and Potatoes, March 12, 13:

Mr. Pipal, of Purdue, assisting. Five meetings, total attendance 171. As a result of this campaign about 1,000 acres of oats were sown with treated seed. The average loss from smut in oats in this county this year, where seed was not treated, is 15%.

Orchard Campaign, April 21, 22, 23:

Mr. C. B. Durham, of Purdue, assisting. Four meetings, total attendance 172. Visited 17 orchards, examining conditions and discussing handling of trees.

Alfalfa Campaign, June 4, 5:

Professor Frier and Mr. Schwab, of Purdue assisting. Total number of automobiles in line, 21; number of field stops, 13; noon-day meetings, with addresses, 2; total attendance at field and other meetings, 126. As a result of this and other effort along the same line, the alfalfa acreage in the county will be more than trebled this year.

All of these campaigns were arranged for by consultation with a few interested people, and advertised through the papers, by personal letter, distribution of bills, announcements through the schools, etc.

In addition to the above campaigns the county agent managed locally the three days' short course for farmers, put on by Purdue under Professor Frier with six assistants, February 5th, 6th, 7th, in which the gospel of better farming and better housewifery were presented to about 1,100 persons.

Other lines of work with specific aims have been: The discovery of, and instruction as to the value of, a number [8] of beds of

marl of good quality located in different parts the county, a beginning in the use of which has already been made.

Examination of the soil in every part of the county with reference to locality, and urging the use of ground limestone. A start had been made in the use of limestone; the amount applied the past year has been double that applied in any previous year, going up into the thousands of tons—perhaps 5,000.

Constant effort to secure a more intelligent use of commercial fertilizers, an increasing quantity of which is being used. Advice concerning the growing of soybeans and cowpeas, with the result that about 75 acres of the former are being grown this year, whereas almost no one in the county had ever seen them before. Many times this acreage will be grown next year. The formation of a cow testing association, the first in the county.

Carrying on a variety test of soybeans, directing the preparation for and sending of two demonstration plots of alfalfa, testing in three fields the value in clay soil of subsoiling for corn, directing five fertilizer experiments.

Reviving a dead county fair association and helping to put on foot what promises to be a successful fair.

Five days of farmers' institute work outside the county and assisting in three institutes within the county.

During the ten months 394 farm visits were made, 529 calls were made on the county agent at the office, 172 meetings were held or addressed in the county, with an aggregate attendance of 7,561, and 4,232 miles were traveled in the county in carrying on the regular work.

Four boys' and girls' clubs with an aggregate of 44 members, have been organized by the county agent and are at work.

The county agent has written eighteen articles, from a half column to a column in length, on various matters of agricultural interest, for the press of the county, giving the copy to four of the five papers in the county—the fifth did not seem to care for it but the others used it gladly.

The second fiscal year in this county starts out with a greater interest in the work of the county agent, a clearer conception of the nature of his duties, and a more general willingness to profit by his office and the departments represented by it.

R. L. NYE,
County Agent.

REPORT OF PULASKI COUNTY.

November 1, 1913, to June 30, 1914.

BOYS' CORN CLUB.

After starting on duty, November 1, 1913, the first piece of work started was to visit the corn club boys and measure their acre of corn, which furnished a good means to get acquainted with the farmers and the general conditions of the county. Thirty-five members were interviewed on their farms. The corn club was organized again this year but the drought has destroyed many of the fields, which makes the outcome uncertain.

MEN'S FIVE-ACRE CORN CONTEST.

The men's corn contest was organized but the drought checked the progress.

TEACHERS' INSTITUTES AND SCHOOLS.

Fifteen teachers' meetings and institutes were visited. In the institutes the work was partly outlined and general discussions led for the purpose of giving light on the teachers' special problems. Several of the schools that requested help were visited and assistance given to the class and instructor. Experiments and devices suggested for class and laboratory work.

FARMERS' INSTITUTES.

An active part was taken in all the farmers' institutes. At Medaryville, February 23-24, the trains were snowbound and none of the speakers were able to fill their appointment, so the county agent was pressed into service and furnished the entire program for the first day and one-half. The subjects discussed were "Beef Cattle Breeds and Their Relation to Profitable Farming", "Utility Poultry," "Soil Fertility and Fertilizers," "Alfalfa." At Star City, February 16-17, the subject of "Our County Soils", was discussed. At Francesville the subject of Co-operation in Farming" was discussed and at Aldine, Starke County, "Utility Poultry."

PURDUE SHORT COURSE.

January 12-16, the Purdue short course was attended with the sixteen corn club boys.

HOG CHOLERA CONTROL.

February 7, Dr. Clark, former State Veterinarian of Wisconsin, now working for the Extension Department of Purdue, gave a lecture on "Control and Eradication of Hog Cholera."

SEED OATS AND POTATO CAMPAIGN.

February 26-27, Professor Pipal assisted in giving a series of demonstration meetings, in which we treated seed oats for smut and potatoes for scab. After this series I gave the same demonstration in every township in the county.

HOG PRODUCTION CAMPAIGN.

April 9-10, Dr. Clark and Mr. Schwab assisted in the hog production campaign. Mr. Schwab spoke on breeding, feeding and production, while Mr. Clark discussed the diseases and their control. The plan was to visit several of the successful hog farms in the county and then hold meetings in the afternoon and evening.

HORTICULTURAL DEMONSTRATIONS.

Dozens of orchards were visited and much San Jose scale found. Two demonstration orchards were started. Two assistants were made use of in this work, Mr. C. B. Durham, Purdue, and Mr. Thompson from Washington, truck and muck soil specialist.

VETERINARY WORK.

The State Veterinarian, Dr. Nelson, was called to the county to investigate the death of a number of calves near Medaryville.

ALFALFA CAMPAIGN.

June 4-5, an alfalfa campaign was conducted in which fifteen fields were visited and six meetings held. The object of the campaign was to study alfalfa as grown under a variety of conditions on individual farms. The meetings were thoroughly educational and good interest was taken in the campaign. County agent R. W. Imel and Mr. F. G. King assisted in the work. Over 200 people were reached.

SOIL CAMPAIGN.

June 29-30, Mr. J. C. Beaver, soil expert from Purdue, assisted in the investigation tour of the county in which many samples of

soil were taken for analyses. Emphasis was placed on the use of limestone because a greater part of the county soils are acid and a very small acreage of clover is the result.

The special campaigns were advertised by posters, newspaper articles and mailing cards. The attendance was usually good considering the population of the county, and the interest has been increasing with the later meetings. The results have been very satisfactory. Sixteen special meetings were held. Fifteen assistants furnished from Purdue and Washington.

Farm visits were made to help the farmer whenever called upon. This work consists of soil and fertilizer problems, livestock, drainage, farm management and social reform. Most of the meetings were held in schoolhouses and public buildings.

OFFICE CALLS.

Many people called at the office for specific information and a great variety of subjects were discussed.

SUMMARY.

Total number of meetings.....	82
Total number in attendance.....	8,851
Total number office calls.....	338
Total number farm visits.....	380
Total number miles traveled.....	3,347

WALTER V. KELL,
County Agent.

REPORT OF RANDOLPH COUNTY.

On taking up the work in Randolph County the first and most important need as county agent was to become acquainted not only with the farmers, but the citizens of the towns, county officials, roads, schools, teachers, etc. In this effort a good part of the time for the first few weeks was taken up, in attending farmers institutes, visiting schools and organizing farmers' clubs. Later, as the weather would permit, orchard pruning and spraying demonstrations were held throughout the county, not as a campaign but as special meetings arranged for in each section individually.

FARMERS' CLUBS.

The work in farmers' clubs in the county resulted in nine clubs or organizations which hold meetings once a month to discuss timely topics, usually by the farmers themselves or some local speaker who is known to be an authority on the subject under discussion. In this way the county agent does not have the burden of the work thrust upon him so heavily, yet he is present at each meeting and guides the actions so as to preserve harmony and secure the best results possible in connection with these farmers clubs. Six of them have lady auxiliaries which work in co-operation with the farmers' meetings, that is, both meet together for the entertainment part of the programme, such as singing, reading, recitations, etc., after which the men and women go to separate rooms, the men taking up their farm topics and the women subjects in regard to household duties. In this way the attendance is much better because the men do not have to stay at home to keep their wives company, and vice versa. This will also cause the children to be brought and while they may not take active part in the meeting they will inculcate the spirit of attending farmers' meetings and enjoy their games enough to want to attend regularly. These meetings have an attendance of anywhere from fifteen to three hundred and a lively interest is usually shown at every meeting. When the well-read and intelligent farmers get started in their discussions of their past experiences it is a matter of stopping them in time to go home rather than deciding what shall be done to pass away the time.

SCHOOL WORK.

In the schools the county agent would frequently give lectures on some agricultural subject which had been under discussion in the classroom recently and in this way became acquainted with the students and led directly to the organization of boys' corn clubs and girls' tomato clubs. One hundred fifty boys were enlisted in the corn clubs and about forty in a potato club, as one township preferred potatoes to corn, and twenty-five girls were enlisted in the tomato club work, but on recent visits it was determined that most of the girls had discontinued the tomato work, due to various causes, such as lack of energy, drouth, worms on the young tomato plants and poor tomato seed; however, there are some six or eight who, it is believed, will continue the work.

The boys have not all been visited recently but most of them are doing good work in spite of the long continued drouth which was broken July 13th.

ORCHARD WORK.

The results of the orchard work can only be guessed at at the present time. However, from the sale of lime sulphur solution and arsenate of lead as well as spray pumps, the indications are that there was about five times as much spraying done in Randolph County during the past six months as was done in the same season the year before. Even with this only a small percentage of the home orchards have been sprayed, but every part of the county has an orchard well sprayed which will serve as an example to the neighbors. The increase in spraying was stimulated by the county agent, but not due entirely to his efforts because many of the farmers saw trees dying and realized that something must be done, so were in a very receptive mood for this work.

ALFALFA PRODUCTION.

The county agent has spent more time on the subject of alfalfa than any other crop in Randolph County. This crop can be grown in every part of the county and is being grown at the present time more or less successfully in every part of the county. While the acreage is small at the present time, there are several farmers who have become interested in the crop and are starting alfalfa fields. During the continued dry weather mentioned above, the alfalfa of the county has held its green color and is giving a good yield.

As a whole Randolph County does not need liming, and as there is an abundance of sweet clover along the roadside in practically every part of the county, inoculation is not a very serious problem.

Drainage is very well taken care of on most farms, so alfalfa is only a question of time and patience. In trying to encourage this crop in the county an automobile alfalfa campaign was held on June 4th and 5th, during which twelve farms were visited and examined, eight meetings with lectures given by Mr. Maurice Douglass, and Mr. J. C. Beavers, who handled the subject with care and tact. On the first day of this campaign thirty-two automobiles were used during the day, twenty-seven were in line most of the day; on the second day thirty machines were used, about twenty-five being the average attendance. The attendance was good, ranging from 140 to 175. The interest was very good and the questions asked showed a knowledge of the subject and intentions of growing the crop.

OFFICE WORK.

County agent's office is furnished by the county and is very well placed, with the exception that no other office is held in conjunction, allowing the farmers to get in touch with the agent when he is out in the county at work. Saturday is given to the office work and is usually pretty well taken up with callers who come in to discuss some of their problems or ask advice.

On going to and from various meetings the agent tries to call on as many farmers, individually, as possible, to keep up with all the requests made by the farmers for individual calls.

C. A. MAHAN,
County Agent.

REPORT OF STARKE COUNTY.

The work of the county agent can best be reported by taking up the various phases of the work and discussing them separately.

GENERAL CAMPAIGN.

Visiting farms at the request of the farmers, making examination of soils, recommending crops, fertilizers and methods of soil improvement have probably been the most important lines of work done. In all 295 farms have been visited in this way, and it is certainly one of the most effective ways of getting in touch with the farmer and giving him definite help.

During the year, 629 people have called at the office to talk over or ask about some farm problem or some question that has had an influence on the agriculture of the county. These questions have been largely in regard to the soil. However, a great variety of questions have been asked concerning live stock management, dairying, spraying for insects and disease control of both fruit and vegetables, corn and wheat production, alfalfa growing, cowpeas and soybeans, and a variety of less important subjects.

During the year a total of ninety-nine meetings was held in the county, most frequently in connection with the schools, and at these meetings there was a total attendance of 6,278 people. This is probably one of the most effective means of getting in touch with the farmers, and those meetings that were held right out in the country, in the rural schoolhouses, were best attended.

It seems that farmers will come out to meetings in their own neighborhood, when it would have been inconvenient for them to get to a meeting in town. A stereopticon and sets of lantern slides have helped materially in making this work more interesting and instructive.

SCHOOL AND CLUB WORK.

This being the first year that agriculture and domestic science have been included in the school curriculum, considerable time has been spent in an effort to help the teachers in presenting these subjects. Some work in agriculture was presented at the county institute last fall and further work was presented from time to time at the township institutes. Following up this work a boys' corn club of 172 members and a girls' poultry club of 92 members have been organized. This work requires a large amount of time at present and will continue to do so until the end of the season. In many cases parents have been reached through this type of work.

PUBLICITY WORK.

During the year thirty newspaper articles of timely interest have been prepared for publication in the local papers, whose editors have all been most courteous in giving space to the same, and have given the work a great deal of publicity along the right lines. Besides publishing these articles, they have written up many other items of interest pertaining to the county agent work. Two circulars, one of twelve pages, discussing the soil problems of this county, and one of four pages, on the testing of seed corn, have been published and distributed over the county to the farmers. With the aid of representatives for the Purdue University Agricultural Extension Department, the following special meetings have been held during the year: Two days' seed corn selection meetings; two days' horticulture meetings; two days' dairy meetings; two days' hog cholera and hog production meetings, and two days' truck crop meetings with Mr. Thompson, Department of Agriculture, Washington, D. C.

FARM IMPROVEMENT.

As a result of the introduction of anti-hog cholera serum, a great many hogs were vaccinated last fall and a large number was saved by its use. A number of orchards have been sprayed for San Jose scale and codling moth. An enormous quantity of potash

and mixed fertilizers has been used and there is a decided tendency toward the use of raw materials and home mixing, a practice that will be a big money saver to those who use fertilizers. Hundreds of acres of sandy land, which have heretofore been grown up with weeds, have been planted in cowpeas this year. This is by far the most profitable crop that can be grown on this land. There is quite a large acreage of acid soil in this country that has never produced anything, on which ground limestone has been used. In some parts of the county marl is being hauled out and scattered over the acid soil. All of this work has necessitated a large amount of correspondence, requiring the writing of 780 personal letters and the sending out of 2,355 copies of circular letters. It has required the traveling of 5,320 miles in an automobile.

SUMMARY.

In discharge of my duties for the past year, I have met with nothing but the most courteous treatment from farmers, from business men, professional men, school teachers, in fact everyone. If there are those who do not think the work worth while they have not had the courage of their convictions to come to me and unburden their minds, and hence I cannot help thinking that they constitute only a small minority of the body politic of this, one of the most progressive counties in the State.

H. R. SMALLEY,
County Agent.

REPORT OF ST. JOSEPH COUNTY.

St. Joseph County was the fourth in the State to take up the county movement. What has been accomplished can be summarized only in part, and what the possibilities of the movement are only the future can show and the present idealize.

Figures in themselves are valueless. They are, however, very important, in that they set out graphically whether or not the movement has made possible the getting to work out on the farms of St. Joseph County some of the scientifically obtained knowledge which our able Secretary of Agriculture, Dr. Houston, says experiment station records are all cluttered up with at present.

The figures herewith submitted speak for themselves.

FARMERS' MEETINGS HELD.

SOIL FERTILITY FIELDS.

- 1. The St. Joseph County Farm—
Field under direction of Soils and Crops Department of Purdue University.
Test: Relative value of phosphoric acid, from rock phosphate, steamed bone meal and acid phosphate.
 - 2. The Pleasant Valley Bogus Soil—
Field on farm of Hiram McCreary.
Test: Value of potash and phosphoric acid with and without lime on this type of soil.
- Demonstrations with leguminous crops: Soybeans, 6; cowpeas, 4; sweet clover, 2; vetch, 1; alfalfa variety tests, 24; corn variety tests, 1.
- Soil Analyses—Phosphorus, potassium, nitrogen and in some cases calcium determinations per United States Association of Agricultural Chemists' methods. Total, 14.

There is, however, a larger meaning of these figures, and to the movement than figures can portray, which probably only those who are actively engaged in its advancement can fully appreciate, namely, this: As the Master said when he walked among men, "Man liveth not by bread but by every word that cometh forth from the mouth of God." So this movement, which at first started as purely an economic proposition (for material necessities must come first), has grown with us far beyond being purely economic. Growing larger crops is a worthy ambition and always will be, but living a useful, happy life out in the midst of Nature's acres is more lofty and laudable, and is quite as essential to a permanent agriculture as the productive soil or pure bred live stock.

DEMONSTRATIONS.

Demonstrations, now under way, are studies in soil fertility, the value of various legumes, i. e., alfalfa, sweet clover, soybeans, compeas and vetch; comparative studies of grains, wheat and corn and oats grown on different soil, soils differently treated, and variety tests of alfalfa, soybeans, sowpeas and corn. These are largely in co-operation with Purdue University.

FARM BUREAU.

The St. Joseph County Farm Bureau, with a mailing list of 250, held two meetings each month during the fall, winter and spring months. Its function has been largely economic, and to this end it has obtained the services of a purchasing agent, who does all the buying of such products as the Farm Bureau has been called on to purchase. Thus far, ground limestone, rock-phosphate, alfalfa, soybeans and cowpeas seed have been the main commodities handled.

MANAGEMENT OF POOR FARM.

The management of the St. Joseph County Poor Farm is also directed by the county agent, as a practical demonstration in farm management, soil improvement and crop production. On this farm is located the St. Joseph County farm field, where the relative value of rock phosphate, acid phosphate and steamed bone meal is tested when used with ground limestone in a ten-year period in a corn, wheat and clover rotation; also the value of steamed bone meal and muriate of potash with ground limestone in alfalfa production.

SOIL STUDIES AND CROPPING SYSTEMS.

The county agent has also made partial soil studies of different types of soil in different parts of the country. In this the total phosphorus, potassium, and in some cases nitrogen and calcium, were determined according to methods adopted by the United States Association of Agricultural Chemists.

Working plans for twelve farms have been prepared, in co-operation with the owners, and maps and tentative cropping systems arranged, with two things in view, viz., profit and soil fertility. Tentative crop rotations are planned in each case for from one to two rotations.

A farmers' educational exhibit, open to the public for six days, was held under the auspices of the County Farm Bureau last

October. The exhibits were selected to show relative results from different conditions of soil treatment, planting, spraying, etc.

GENERAL WORK OF COUNTY.

The boys' and girls' club work has also in part been under the direction of the county agent. This work is limited at present to corn for the boys and sewing for the girls. The winners this past year were given a trip to Purdue for farmers' week.

The teaching of agriculture in the country schools was directed by the county agent through outlines presented at the preliminary institutes and circular letters sent out from time to time, six in all during the year.

Recently a Market Gardeners' and Fruit Growers' Association was also organized with a membership of forty. Its primary motive is to create a better understanding of local demands, to promote standardization of all garden and orchard products and establish a public wholesale market in South Bend.

Meetings have been arranged from time to time, at which men from Purdue and the United States Department of Agriculture have addressed the farmers on hog cholera, hog diseases, farm sanitation, dairying and horticulture.

A general propaganda against hog cholera and for more hogs was conducted in the county last winter and this spring. This was in co-operation with the Animal Husbandry and Veterinary Departments of Purdue University.

The Horticulture Department of Purdue University has also assisted in some very successful vineyard and orchard demonstrations.

SUMMARY.

Recently a general reception room and private office has been arranged for the county agent. This office is open on all week days. It is equipped with desks, typewriter, Home and Bell telephone service, microscope, etc. The stenographic and general office work requires the assistance of one stenographer, who devotes all her time to this work.

A county farm bureau press club has also been organized, the members of which are farmers of the county. All farmers are eligible. These farmers have furnished articles from time to time for our daily papers and other local publications. These articles deal directly with local conditions and are strictly practical.

JOHN S. BORDNER,
County Agent.

REPORT OF SULLIVAN COUNTY.

September 1, 1913, to June 30, 1914.

The office of county agent was opened September 1, 1913. The first duty which presented itself was that of learning the problems of the agriculture of the county in greatest need of immediate attention and study. It was at once observed that little care, generally considered, was given to fall field selection, storing and testing of seed corn. The per cent of stand of corn in the county was quite poor, much of which could be attributed to poorly selected seed of low vitality.

SEED CORN SELECTION.

The Farmers and the Schools are equally interested. Meeting in cornfield near consolidated school in Sullivan County, September, 1913.

On October 9th and 10th a series of seed corn selection meetings were held at eight centrally located cornfields in different townships in the county. At all of these meetings except two, besides the farmers being in attendance, were the seventh and eighth grade and high school pupils of nearby township schools. Mr. J. P. Prigg, of the Extension Department of the Purdue Experiment Station, assisted. Cornfields were inspected and undesirable samples of seed ears and stalks were studied. Storing of seed corn was discussed. The total attendance at the meetings was 616, with an average attendance of 77. It is safe to say that as a result of this campaign over 1,000 bushels of seed corn were fall field selected, stored, and most of it tested in the spring. It was

a very common sight during the winter to see seed corn stored for safe keeping.

INSTITUTE MEETINGS.

The county agent attended and addressed many teachers' institutes during the fall. As much help as possible was given in the way of agricultural instruction, suitable for the grade and high school pupils. All township farmers' institutes were attended and addressed. There were nine of these, their total attendance reaching about 2,000 with an average attendance of 200. The topic most frequently called for and discussed was "Soils and Soil Fertility Problems."

EXCURSIONS.

During the year a number of excursions of high school agricultural classes were personally conducted by the county agent. There were for the purpose of testing soils in the field for acidity; the study of the growth of legumes; the inspection of hog yards; actual pruning of trees; and the inspection and study of small fruits.

MILK TESTING.

Six co-operative milk testing associations among the agricultural students in as many township high schools were organized during December and January. These were, in most cases, continued until the close of the school year. Through these organizations the pupils were taught the testing of the efficiency of their cows by the use of the Babcock tester and milk scales. Considerable interest was aroused and much satisfactory work was completed. Profitable and non-profitable cows were quickly discovered by the students. The agricultural teachers helped with working out the data gathered; the parents helped furnish arbitrary figures on cost of certain feeds, barn rent, etc.

BETTER FARMING ASSOCIATION.

In order to facilitate the work of the office and to reach the farmers quickly, a better farming association was organized December 21. The organization meeting was well attended, all townships in the county being represented except one. This association with its township branches has been of very valuable service to the county agent in the way of helping to arrange for and create interest in school, church and hall meetings about over the county. Most of the winter months were spent attending such meetings.

The principal topics discussed at these were soil questions relating to drawings, supplying humus, adding limestone, growing legumes and applying phosphates.

CLUB WORK.

During February and March a county corn club, comprised of boys, and a girls' canning and gardening club were organized. This work was undertaken in order to help make more efficient agricultural instruction in the schools and to encourage more young people to take up vocational studies. Newspaper publicity, circular letters to teachers and bankers, and addresses at teachers' and farmers' gatherings were all used as means in helping launch the club movement. The Sullivan Commercial Men's Association donated \$200 to be used in prizes for the boys' corn club.

The first prize for the township winner in each of the clubs is a free trip, including all expenses, to the one-week short course held at Purdue University during the month of January, 1915.

Thirty boys, representing all townships in the county, will complete the corn club work. Three girls are all who stayed with the gardening and canning clubs. They have made remarkably good showings on their tenth-acre plots.

ORCHARD DEMONSTRATION.

Neglected, disease-ridden orchards prompted an orchard spraying and pruning demonstration, which was held March 21st, in Fairbanks Township. Mr. C. B. Durham of Purdue Extension Department assisted in this work.

Three trees were carefully pruned and sprayed before the audience. Each detail of the work was explained and many questions asked and answered. There was an attendance of 125. As a result of this demonstration several spraying outfits were purchased and used and many good orchards pruned and shaped up in general. The county agent conducted four smaller pruning demonstrations following this one.

MINERS' GARDEN PROJECT.

The idea of miners' project gardens was touched upon in a miners' meeting held in Hymera, March 20th. While nothing definite was accomplished, much interest was aroused relative to handling garden soils, and, as a consequence, one or two carloads of finely ground limestone were obtained and spread upon the acid garden soils of the community.

EGG SHOW.

On April 25th the county agent took an active part in helping the agricultural club of the Sullivan high school conduct a very successful egg show. Five classes of eggs were exhibited and premiums awarded on some by local merchants. Mr. Chapin of Purdue University assisted in scoring the eggs and delivered a lecture on poultry raising. Eggs from this show won first prize at the Purdue egg show held in May.

Sullivan County's farmers are interested in studying the vital factors in wheat production.

Picture taken at home of one of Sullivan County's best wheat producers.

Wheat Campaign, August, 1914.

HOG PRODUCTION CAMPAIGN.

In order to direct intelligent effort towards prevention of hog cholera and towards profitable feeding and rearing of hogs, a hog production campaign was conducted May 4th and 5th. The principal hog raising townships of the county, Turman, Hadden, Gill and Fairbanks, were visited. Hog houses and yards were inspected and three meetings were held; eight good sized herds of hogs were visited. Dr. Clark and Mr. J. W. Schwab, both of Purdue Experiment Station, assisted in this campaign. An attendance of 150 was had at the meetings and an average attendance of about 70.

ALFALFA CAMPAIGN.

Considerable demand was made for information relative to growing alfalfa throughout the year. Dry seasons and failing clover crops probably have done a good deal toward creating a need for a somewhat permanent, high-yielding legume. In recognition of the requests for information concerning alfalfa, a two-day automobile alfalfa tour was conducted in the townships of Fairbanks, Turman, Gill and Hadden. These were the only townships making a reasonable start at growing the crop, and, therefore, the only places to find fields for inspection. This tour was held May 21st and 22d. Mr. T. A. Coleman and Mr. G. M. Frier, both of Purdue, assisted in the work. Fourteen alfalfa fields were carefully inspected by the automobile travelers. The failures and successes of the various fields were carefully gone into. These fields were located on the different big soil areas found in the county. Thirteen automobiles were in attendance the first day of the tour. Three meetings were held, with an attendance of over 200 and an average attendance of about 60. Two picnic dinners were served on the tour.

VARIETY TESTS.

Some variety test work has been undertaken with three varieties each of soybeans, cowpeas and corn. Farmers located on different soil types are carrying on these tests. The plan is to determine which varieties of the crops tested are most likely to prove profitable on the different soils and in this latitude.

SEED CORN TESTS.

A series of well attended seed corn testing meetings were run in Hamilton Township and one adjoining during the spring. Mr. Johnson, the agricultural instructor in the Sullivan high school, ably assisted the county agent in this work. These were local neighborhood meetings, held in schoolhouses. Six of these meetings were held, with a total attendance of 300 and an average attendance of 50.

SUMMARY.

The big problem of giving the ordinary farmer definite, tangible help and information concerning the most immediate needs has always been of first consideration. Farm visits on subjects relating to liming acid soils, drainage, fertilization and the location of

alfalfa fields have taken much time of the county agent. Early in the year a series of newspaper articles on Sullivan County soils and their needs was published in the county papers.

Saturdays have been selected as office days. The farmers very generally recognize this and the interested ones are more and more dropping in on business and for pleasant greetings.

During the year the county agent has been directly and indirectly responsible in helping bring into the county over 400 tons of ground limestone for use upon acid soils. The sowing of clover on very acid soil has been discouraged until the time comes when limestone can properly be applied. Several carloads of high grade phosphate fertilizers have been used through the recommendations of the county agent. One home-made limestone spreader has been designed and put into operation through his efforts.

The county agent personally addressed 158 meetings, with an attendance of 7,440 persons; 588 office callers were received, and 343 farms visited. About one hundred news articles concerning farm practices were written for the county papers; seventy-five personal letters answering inquiries were written; over 3,000 circular letters were sent out to farmers and other residents. Help was given relative to the purchase of pure bred seed corn, cowpeas, soybeans, clover and alfalfa seed.

The year has been one of activity, and, from present indications, of profitable labor.

A. W. HAYES,
County Agent.

REPORT OF WASHINGTON TOWNSHIP, HAMILTON COUNTY.

The officers of the public high school of Washington Township, Hamilton County, in their efforts to enlarge the instruction offered in the agricultural course of the school, and among the farmers, adopted the plan of co-operation with the Agricultural Extension Department of Purdue University, the United States Department of Agriculture, and the Better Farming Association of the township. The fact that a Better Farming Association had been organized as the direct result of the local short course conducted by the Extension Department of Purdue, made possible the co-operation plan, since this association furnished 75% of the funds for the summer work.

According to the plan, an instructor was employed to teach agriculture in the high school during the eight months' term and do extension work for the township the remaining four months. As it developed it seemed necessary to do considerable extension work during the school year.

SCHOOL WORK.

The school work consisted of conducting the class work of five sections, having charge of the study hall for three periods and the boys' basement during the noon recess period, besides attendance upon county and township institutes. The subject-matter given students this year consisted of general selected phases of elementary agriculture for eighth grade, agricultural botany for the first-year high school and animal husbandry for the others. Free use was made of Purdue and United States bulletins; also inspection of animals, farms, Indianapolis stock yards and Kingan's packing house. The work has been popular with the students and their parents, though we feel sure it can be made stronger in several respects.

WEEKLY MEETINGS.

At the end of the heavy fall work of the farmers, at the suggestion of T. A. Coleman, Assistant State Leader, we began holding Saturday afternoon meetings at the office of the township agent. Each week the agent, using the United States franking privilege, mailed announcements of the subject which would be discussed at the following meeting. Fourteen of these meetings were held, with an average attendance of fifteen, and total of 210. Such topics as: "Getting a Stand of Clover", "Testing Seed Corn", "Liming the Soil", "Soil-Fertility", "Silos and Silage", "Spraying the Fruit Trees", "Hog Management", "Feeding Beef Cattle", "Contagious Abortion of Cows", "Sowing Oats", "Feeding Beef Cattle", and "Peas and Tomatoes for the Factory" were discussed. These meetings were very informal, and while the attendance was far less than desired, and the interest of the general public much less active than it should have been, those who did attend seemed keenly interested, and entered into the discussions freely, in many cases departing with great reluctance.

The room in which these meetings were held was supplied generously with papers and magazines, a number of books on agricultural subjects, and a case of about 2,500 bulletins from Purdue

University and United States Department of Agriculture. Persons attending were invited to select such bulletins as they felt were of value to them. On account of the press of farm work, the Saturday afternoon meetings closed April 11th.

INSTITUTE WORK.

The township agent was asked to discuss general topics on agriculture before the township institute on three occasions during the school term. He also discussed "The Dairy Cow" before the county institute. On all these occasions teachers and others present gave evidence of appreciative interest in the subject of agriculture.

SEED CORN MEETINGS.

The two meetings we had on "seed corn" were excellent demonstrations of efficiency. Through the courtesy of the Extension Department of Purdue, Mr. Prigg, with his charts, came to us absolutely free. The efficiency referred to appears from the fact that of the two meetings he addressed that day, one was a small group of farmers in a remote barn, the other made up chiefly of the teachers of the township institute. Mr. Prigg and his charts seemed perfectly adapted to both situations.

ORCHARD WORK.

On May 25th and 26th the township agent had the assistance of Mr. C. B. Durham, orchard expert, furnished without cost by Purdue. Three objects were in view: to ascertain the condition of orchards in this locality, to instruct owners as to proper management and to plan an orchard demonstration of pruning and spraying, all of which was later accomplished to a reasonable degree of satisfaction. Eleven orchards were inspected, all of which presented about the same conditions. From these inspections it was clear that, with little exception, owners are just awakening to the fact that pruning, spraying and attention to soil condition is imperative. It also appeared that before that knowledge is acted upon, a large per cent. of the living trees will fall victims to neglect. The agent has given much general advice on this subject, which is well received.

DAIRY WORK.

This township contains a large number of small dairies, therefore it seemed practical to attempt something to improve their

operation. With this in view the assistance of the Dairy Extension Department at Purdue was solicited. With its co-operation we have in process of organization a "cow testing association." On account of the co-operation of the local creamery in making tests, this will be practically without extra cost to the farmer and give him a fair knowledge of his individual cows. The plan is to have the farmer weigh his feed and milk, furnish samples to the creamery, where it is tested free of charge. The Extension Department of Purdue will provide a man to instruct the farmers as to the details of their part of the work. Since the success of this plan depends so largely upon the farmer, the association will be small and composed of those of most executive ability. While it may not serve a large number, we think it will have a good influence in general. The maturing of this plan is in the care of C. R. George of the Dairy Extension Department.

CLUB WORK.

Recognizing the value of the corn club in increasing interest in agriculture, and especially turning the current of the boy's thought and action into the proper channel, we proceeded with the organization of a "boys' corn club." This club consists of sixteen members who are having the opportunity to see the effect of their mode of management when the greatest controlling factor (moisture) is omitted for an unusually long period, the drought of several weeks having been broken on August 2d. We find the boys on the more remote farms more easily interested in this work than those about the villages.

SILOS AND SILAGE.

The subject of silos has claimed a large share of the agent's time, because of the wide general and favorable interest in them. As so many kinds of silos are sold today, many persons are in doubt as to what selection to make, and for that reason the agent has had a large number of inquiries to answer. The effort to answer these questions fully and accurately has led to a very broad investigation of the subject. In its efforts to meet the heavy demand upon agents for this information, Purdue Extension Department issued a special bulletin for their use which covered the ground well. The greatest service we have rendered in reference to silos is to counteract the adverse representation as to the use of cement in silo construction. We have ardently encouraged the building of silos, and many are being constructed this year.

CONTAGIOUS ABORTION.

Knowledge of contagious abortion in cows is quite limited, though many cases have occurred in the locality. The agent has spent considerable effort in informing farmers of the general facts relating to this disease. Three parties have applied to him for definite direction in controlling outbreaks, and have followed his advice. The point impressed is that no treatment can be fully depended upon. The agent has spared no pains to get the truth on this subject from many sources, and is glad to serve the farmers as to this only partially understood and distinctive disease. Especially does he warn them as to the uncertainty of patent cures, giving instead careful directions for disinfection, "carbolic acid" treatment and "methylene blue" treatment.

HOG CHOLERA CONTROL.

Some work in controlling hog cholera was done in this period, but as most of it was done immediately following, will defer it and make report complete.

WINTER INSTITUTES.

The greatest public event of this period was the winter agricultural institute of January 17th, 18th and 19th. This event was the combined effort of the Agriculture Extension interest and the local Farmers' Institute. The latter furnished the complete program one day, and the agricultural agent two days. The program, as follows, was excellent:

January 17—

Speakers.....	Wm. M. Jones, Julia Fried Walker
"The Dawn of Plenty".....	Evening Stereopticon Entertainment
"Human Tuberculosis".....	Dr. Thompson
"Profits in Draft Horse Breeding".....	Chas. McComel
"Good Roads".....	Baily Hawkins
"Feeding Beef Cattle".....	T. A. Coleman

Evening—

Concert.....	Purdue Glee Club
--------------	------------------

January 19—

"Hog Cholera and Its Control".....	Dr. Balser
"Question Box".....	Dr. Nelson
"The Growing of Tomatoes".....	J. J. Doan

Evening—

Concert.....	DePauw Glee Club
--------------	------------------

A total of 1,650 persons listened to these programs. Attendance on the day lectures was highly satisfactory and the people were well pleased. The influence of this institute is permanent. This meeting was planned sufficiently long before the date to give opportunity for extensive advertising, in which the franking privilege was of great aid.

T. A. Coleman, Dr. Balser and Dr. Nelson came free of charge. Mr. Jones and Julia Fried Walker were likewise furnished by the State, for which the community is very grateful. Mr. C. D. Barker, president of the Farmers' Institute, and H. M. Dixon, superintendent of schools, admirably directed the work of the three days. The township agent regretted he could not attend on account of sickness.

In the time covered by this report the number of miles traveled are, 668; number of calls, 188; number of visits to farms, 152.

In his daily contact with the public the agent has been treated with a confidence and respect, which is the mark of the splendid attitude which rural folk are assuming toward their environment and is opening to them a fuller and richer life.

WM. E. FURNAS,
Agricultural Agent.
